

Contents

| | |
|---|------|
| Note on Translation | xv |
| Chronology | xvii |
| Introduction | 3 |
| 1. Keeping the Fixed Points Fixed | 8 |
| Narrative: What to Do When Water Refuses to Boil at the Boiling Point | 8 |
| Blood, Butter, and Deep Cellars: The Necessity and Scarcity of Fixed Points | 8 |
| The Vexatious Variations of the Boiling Point | 11 |
| Superheating and the Mirage of True Ebullition | 17 |
| Escape from Superheating | 23 |
| The Understanding of Boiling | 28 |
| A Dusty Epilogue | 35 |
| Analysis: The Meaning and Achievement of Fixity | 39 |
| The Validation of Standards: Justificatory Descent | 40 |
| The Iterative Improvement of Standards: Constructive Ascent | 44 |
| The Defense of Fixity: Plausible Denial and Serendipitous Robustness | 48 |
| The Case of the Freezing Point | 53 |
| 2. Spirit, Air, and Quicksilver | 57 |
| Narrative: The Search for the "Real" Scale of Temperature | 57 |
| The Problem of Nomic Measurement | 57 |
| De Luc and the Method of Mixtures | 60 |
| Caloric Theories against the Method of Mixtures | 64 |
| The Calorist Mirage of Gaseous Linearity | 69 |

| | |
|--|-----|
| Regnault: Austerity and Comparability | 74 |
| The Verdict: Air over Mercury | 79 |
| Analysis: Measurement and Theory in the Context of Empiricism | 84 |
| The Achievement of Observability, by Stages | 84 |
| Comparability and the Ontological Principle of Single Value | 89 |
| Minimalism against Duhemian Holism | 92 |
| Regnault and Post-Laplacian Empiricism | 96 |
| 3. To Go Beyond | 103 |
| Narrative: Measuring Temperature When Thermometers Melt and Freeze | 103 |
| Can Mercury Be Frozen? | 104 |
| Can Mercury Tell Us Its Own Freezing Point? | 107 |
| Consolidating the Freezing Point of Mercury | 113 |
| Adventures of a Scientific Potter | 118 |
| It Is Temperature, but Not As We Know It? | 123 |
| Ganging Up on Wedgwood | 128 |
| Analysis: The Extension of Concepts beyond Their Birth Domains | 141 |
| Travel Advisory from Percy Bridgman | 142 |
| Beyond Bridgman: Meaning, Definition, and Validity | 148 |
| Strategies for Metrological Extension | 152 |
| Mutual Grounding as a Growth Strategy | 155 |
| 4. Theory, Measurement, and Absolute Temperature | 159 |
| Narrative: The Quest for the Theoretical Meaning of Temperature | 159 |
| Temperature, Heat, and Cold | 160 |
| Theoretical Temperature before Thermodynamics | 168 |
| William Thomson's Move to the Abstract | 173 |
| Thomson's Second Absolute Temperature | 182 |
| Semi-Concrete Models of the Carnot Cycle | 186 |
| Using Gas Thermometers to Approximate Absolute Temperature | 192 |
| Analysis: Operationalization—Making Contact between Thinking and Doing | 197 |
| The Hidden Difficulties of Reduction | 197 |
| Dealing with Abstractions | 202 |
| Operationalization and Its Validity | 205 |
| Accuracy through Iteration | 212 |
| Theoretical Temperature without Thermodynamics? | 217 |
| 5. Measurement, Justification, and Scientific Progress | 220 |
| Measurement, Circularity, and Coherentism | 221 |
| Making Coherentism Progressive: Epistemic Iteration | 224 |
| Fruits of Iteration: Enrichment and Self-Correction | 228 |
| Tradition, Progress, and Pluralism | 231 |
| The Abstract and the Concrete | 233 |

6. Complementary Science—History and Philosophy of Science as a Continuation of Science by Other Means 235

The Complementary Function of History and Philosophy of
Science 236

Philosophy, History, and Their Interaction in Complementary
Science 238

The Character of Knowledge Generated by Complementary
Science 240

Relations to Other Modes of Historical and Philosophical Study
of Science 247

A Continuation of Science by Other Means 249

Glossary of Scientific, Historical, and Philosophical Terms 251

Bibliography 259
