

Contents

Part I Segmentation and Uncertainty

Lung Segmentation of MR Images: A Review	3
---	----------

Tatyana Ivanovska, Katrin Hegenscheid, René Laqua, Sven Gläser,
Ralf Ewert, and Henry Völzke

Fast Uncertainty-Guided Fuzzy C-Means Segmentation of Medical Images	25
---	-----------

Ahmed Al-Taie, Horst K. Hahn, and Lars Linsen

muView: A Visual Analysis System for Exploring Uncertainty in Myocardial Ischemia Simulations	49
--	-----------

Paul Rosen, Brett Burton, Kristin Potter, and Chris R. Johnson

Part II Visualization of 3D Medical Images

Combined Volume Registration and Visualization	73
---	-----------

Arlie G. Capps, Robert J. Zawadzki, John S. Werner,
and Bernd Hamann

Feature Lines for Illustrating Medical Surface Models: Mathematical Background and Survey	93
--	-----------

Kai Lawonn and Bernhard Preim

Remote Visualization Techniques for Medical Imaging Research and Image-Guided Procedures	133
---	------------

Peter Kohlmann, Tobias Boskamp, Alexander Köhn,
Christian Rieder, Andrea Schenk, Florian Link, Uwe Siems,
Marcus Barann, Jan-Martin Kuhnigk, Daniel Demedts,
and Horst K. Hahn

Part III Visualization for Diffusion-Weighted Imaging

Visualization of MRI Diffusion Data by a Multi-Kernel LIC Approach with Anisotropic Glyph Samples	157
--	------------

Mark Höller, Uwe Klose, Samuel Gröschel, Kay-M. Otto,
and Hans-H. Ehrlicke

Exploring Crossing Fibers of the Brain's White Matter Using Directional Regions of Interest	179
--	------------

Andreas Graumann, Mirco Richter, Christopher Nimsky,
and Dorit Merhof

Multi-Modal Visualization of Probabilistic Tractography	195
--	------------

Mathias Goldau and Mario Hlawitschka

Part IV Cohort Studies and Time-Varying Phenomena

Visual Analytics of Image-Centric Cohort Studies in Epidemiology	221
---	------------

Bernhard Preim, Paul Klemm, Helwig Hauser, Katrin Hegenscheid,
Steffen Oeltze, Klaus Toennies, and Henry Völzke

Three Dimensional Visualisation of Microscope Imaging to Improve Understanding of Human Embryo Development	249
---	------------

Anna Leida Mölder, Sarah Drury, Nicholas Costen,
Geraldine Hartshorne, and Silvester Czanner

Quantitative Analysis of Knee Movement Patterns Through Comparative Visualization	265
--	------------

Khoa Tan Nguyen, Håkan Gauffin, Anders Ynnerman,
and Timo Ropinski

Part V Visualization in Life Sciences

Interactive Similarity Analysis and Error Detection in Large Tree Collections	287
--	------------

Jens Fangerau, Burkhard Höckendorf, Bastian Rieck,
Christian Heine, Joachim Wittbrodt, and Heike Leitte

Efficient Reordering of Parallel Coordinates and Its Application to Multidimensional Biological Data Visualization	309
---	------------

Tran Van Long and Lars Linsen

Extraction of Robust Voids and Pockets in Proteins	329
---	------------

Raghavendra Sridharamurthy, Talha Bin Masood,
Harish Doraiswamy, Siddharth Patel, Raghavan Varadarajan,
and Vijay Natarajan

Author Index	351
