

## Contents

ACKNOWLEDGEMENTS .....	4
EXTENDED SUMMARY .....	6
1. GENERAL BACKGROUND .....	8
1.1 Purpose and Scope .....	8
1.2 Location .....	8
1.3 Physiography .....	9
1.4 Climate .....	11
1.4.1 Paleoclimate .....	11
1.4.2 Present Climate .....	12
1.5 Vegetation .....	13
1.6 Surface Water .....	14
1.6.1 River Flow Regime .....	14
1.6.2 Baseflow .....	16
1.7 Previous Work .....	18
1.8 Methods Employed for the Present Study .....	18
2. GEOLOGY .....	19
2.1 Metamorphic Rocks .....	19
2.2 Sedimentary Rocks .....	19
2.3 Igneous Rocks .....	20
2.4 Structures .....	21
3. HYDROGEOLOGY .....	22
3.1 Water Bearing Characteristics of Various Geological Formations .....	22
3.1.1 Hydrogeological Units .....	22
3.1.2 Aquifer Parameters .....	27
3.2 Structural Control of Groundwater .....	32
3.3 Occurrence and Movement of Groundwater .....	32
3.4 Discharge of Groundwater .....	33
3.5 Present Development of Groundwater .....	33
3.6 Groundwater Recharge .....	36
3.6.1 East of the Major Surface Water Divide .....	36
3.6.2 West of the Major Surface Water Divide .....	36

---

4. HYDROCHEMISTRY .....	38
4.1 Methods of Analyses and Constrains.....	38
4.2 Chemical Analyses Results .....	39
4.3 Water Quality.....	41
5. GROUNDWATER RESOURCES.....	46
6. CONCLUSIONS and RECOMMENDATIONS .....	49
6.1 Water Resources Development .....	49
6.2 Future Exploration .....	50
REFERENCES.....	52
