

Contents

List of Abbreviations	vii
List of Symbols	ix
I Theoretical background	1
1 Introduction to optimization	5
1.1 Convex programming	7
1.2 Linear programming	12
2 Background of mathematical statistics	17
2.1 Probability and random variables	17
2.1.1 Probability space	17
2.1.2 Random variable	18
2.2 Functions describing a random variable	19
2.2.1 Probability mass function	19
2.2.2 Probability density function	20
2.2.3 Cumulative distribution function	20
2.3 Moments of random variables	21
2.4 Selected probability distributions	23
2.4.1 Selected discrete probability distributions	23
2.4.2 Selected continuous probability distributions	24
2.4.3 Empirical distribution	26
3 Stochastic programming	29
3.1 Classification of stochastic programming models	30
3.1.1 Stages and periods	30
3.2 General methodology for stochastic programming	32
3.3 Risk measures	34
3.3.1 Static risk measures	36
3.3.2 Dynamic risk measures	39
3.4 Single-stage models of stochastic programming	42
3.4.1 Mean-value approach	42
3.4.2 Worst-case approach	43

- 3.4.3 Chance-constrained approach 44
- 3.4.4 Scenario-based approach 45
- 3.4.5 Single stage models with a risk measure 46
- 3.5 Two-stage models of stochastic programming 51
- 3.6 Multi-stage models of stochastic programming 56
 - 3.6.1 Scenario trees 58
 - 3.6.2 Nonanticipativity 60
 - 3.6.3 Time consistency 60
 - 3.6.4 General formulation of a multi-stage model 61
- 4 Fuzzy optimization 69**
 - 4.1 Introduction to fuzzy mathematics 70
 - 4.2 Selected approaches to fuzzy linear programming 74
- 5 Basic facts on emissions trading 83**
 - 5.1 An introduction to emissions trading in the EU 83
 - 5.2 Flows of emission allowances 85
 - 5.3 Phases of the EU ETS 87
 - 5.4 Ways of influencing the costs induced by the EU ETS for companies 88
- II Optimization models of emissions management 91**
- 6 Optimization of companies' behaviour within the EU ETS - state-of-the-art analysis 95**
- 7 Input data for models 99**
 - 7.1 Uncertain demand 99
 - 7.2 Uncertain prices of emission allowances 100
 - 7.3 Deterministic input data 104
- 8 Stochastic optimization models 107**
 - 8.1 Mean-variance model 108
 - 8.1.1 Structure of the mean-variance model 109
 - 8.1.2 Results of the mean-variance model 110
 - 8.1.3 The conclusion to the mean-variance model 113
 - 8.2 Mean-CVaR model 113
 - 8.2.1 Structure of the mean-CVaR model 115
 - 8.2.2 Results of the mean-CVaR model 118
 - 8.2.3 The conclusion to the mean-CVaR model 119
 - 8.3 Multi-stage stochastic model 119
 - 8.3.1 Structure of the stochastic multi-stage model 122
 - 8.3.2 Results of the stochastic multi-stage model 123
 - 8.3.3 The conclusion to the stochastic multi-stage model 126

9 Fuzzy optimization models	129
9.1 Single-period fuzzy optimization model	130
9.1.1 Structure of the single-period fuzzy model	130
9.1.2 Results of the single-period fuzzy model	132
9.1.3 The conclusion to the fuzzy single-period model	133
9.2 Dynamic fuzzy optimization model	134
9.2.1 Structure of the fuzzy multi-priod model	135
9.2.2 Results of the fuzzy multi-period model	138
9.2.3 The conclusion to the fuzzy multi-period model	140
10 Conclusion	143
III Appendix	145
A Notes on software for mathematical programming	147
B GAMS codes for the introduced models	155
B.1 GAMS Code for the mean-variance model	155
B.2 GAMS Code for the mean-CVaR model	158
B.3 GAMS Code for the fuzzy single-period model	163
B.4 GAMS Code for the multi-period fuzzy model	165
References	175
List of Tables	177
List of Figures	180
Summary	183
