Multifactorial or Polygenic Inheritance in Ophthalmology

J. François†, Gent 1

Introduction	1
Closed-Angle Glaucoma	10
Open-Angle Glaucoma	13
Congenital Glaucoma	16
Ocular Refraction and Refractive Errors	18
Strabismus	26
Convergent Strabismus	27
Divergent Strabismus	28
Microphthalmos	28
Lattice Degeneration of the Retina	29
Iris Colour and Iris Structure	29
Conclusions	30
References	30

So-Called 'Acute Retinal Necrosis Syndrome' – An Acute Ocular Panvasculitis Syndrome

S.S. Hayreh, Iowa City, Iowa 40

Introduction	40
Case Reports	41
Comments	55
Clinical Features	55
Laboratory Studies	69
Systemic Studies	71
Stages of the Disease	71

Contents	VI
Differential Diagnosis	72
Treatment	73
Pathogenesis	74
Terminology	75
Summary	75
Acknowledgements	76
References	76

Phthisis bulbi – An Intraocular Floride Proliferative Reaction

F.H. Stefani, München 78

Introduction	79
The Terms Atrophia and Phthisis bulbi	80
Materials and Methods	82
Clinical Findings	83
Mechanism of Trauma	83
Age Distribution	84
Sex Distribution	85
The Wound	86
Intraocular Lesions	86
Primary Surgical Repair	86
Posttraumatic Function	87
Postoperative Findings	87
Gross Pathology of the Outer Eye	90
Gross Pathology of the Inner Eye	92
Lesions Involving the Uvea	93
Intraocular Hemorrhages	94
Inflammation	95
Retrolental Membranes	96
Retinal Detachment	96
Retinal Pigment Epithelium	99
Microscopy	99
Primary Tissue Defects	99
Intraocular Hemorrhages	101
Hemosiderosis	105
Inflammatory Response	107
Vascular Reactions	111
Lesions of Barrier Tissues	112
Granulation Tissue at the Site of Perforation	114
Proliferation of Collagen-Producing Cells	114
Collagen of the Cornea	122
Collagen of the Sclera	122
Calcium Deposits	122
Bone Formation	123
Discussion	125

Contents	VII
Phthisis bulbi as a Result of Wound Healing	125
Cellular Reactions	128
Sites of Cellular Reactions	132
Mediators	136
Intraocular Environment	138
Hypotensive Tissue Reactions	142
Future Outlook	143
Summary	143
References	144
Subject Index	161
