# 1 Contents

1	Contents .....	1
2	List of labels and abbreviations .....	3
3	Introduction.....	4
3.1	Objectives .....	4
3.2	Medical and biomechanical background.....	5
3.2.1	Spinal cord injury and the levels of the lesion .....	5
3.2.2	Focus Group.....	5
3.2.3	Gait analysis terminology .....	5
4	Orthoses and Exoskeletons for lower limbs .....	7
4.1	Materials in orthotics .....	8
4.2	Lower limb Passive Orthoses for individuals with paraplegia .....	9
4.2.1	RGO.....	9
4.2.2	Walkabout .....	10
4.2.3	Primewalk .....	10
4.2.4	HALO Orthosis .....	11
4.2.5	Evaluation of passive orthoses.....	12
4.3	Active Exoskeletons for paraplegics .....	12
4.4	Requirement list .....	13
5	Design of new Exoskeleton Ortholeg 2.0 .....	14
5.1	Used materials.....	14
5.2	Ankle and Shoe insert.....	14
5.3	Electronics .....	15
5.4	Best-fit enhancements .....	15
6	New active exoskeleton @halo .....	16
6.1	Halo - device update.....	16
6.2	Calculation of hip and ankle moments by inverse dynamics .....	16
6.3	Mechanical design of powered exoskeleton @halo .....	17
6.3.1	Selection of servomotor .....	17
6.4	@halo control unit .....	19
6.4.1	Servoamplifier .....	21
6.4.2	Interface boards .....	21
6.5	Lofstrand crutch and integrated manual switch .....	21
6.6	Control system of actuator.....	21

6.6.1	Block diagram of control system .....	22
6.6.2	Control parameters of PI controller .....	22
7	Experiment procedure and set up.....	23
7.1	Selection of Exoskeleton for further research.....	23
7.2	Walking with <i>Halo</i> and <i>@halo</i> .....	24
7.3	Experimental setup.....	24
7.4	Description of experiment trial .....	25
7.5	Actuator output data during actuated gait cycle .....	25
8	<i>Halo</i> and <i>@halo</i> gait analysis .....	27
8.1	Motion analysis and data processing .....	27
8.2	Step length.....	27
8.3	Velocities .....	27
8.4	Center of gravity displacement .....	28
8.4.1	CoG calculation procedure .....	28
8.4.2	Evaluation of CoG displacement .....	28
8.5	Linear force impulse from crutches and GRF .....	30
8.5.1	Calculation of linear force impulse from crutches and GRF.....	30
8.5.2	Linear force impulse from crutches and GRF evaluation .....	30
8.6	Moments and forces in glenohumeral joint.....	32
8.6.1	Inverse dynamics model of the human upper extremity.....	32
8.6.2	Results and Evaluation of forces in Glenohumeral joint .....	33
8.6.3	Results and Evaluation of moments in Glenohumeral joint.....	34
8.7	Glenohumeral joint power .....	35
8.7.1	Calculation of Glenohumeral Joint Power.....	35
8.7.2	Results and Evaluation of Glenohumeral joint Power.....	35
9	Conclusions.....	37
9.1	Exoskeleton ORTHOLEG 2.0.....	37
9.2	Exoskeleton <i>@halo</i> .....	37
9.3	Contribution for scientific discipline .....	38
9.4	Contribution for practice.....	39
9.5	Recommendation for further research .....	39
10	References.....	40
11	Published papers .....	43
