An introduction to the <i>Fundamentals of Biomedical Science</i> series	xii	3.3 Kidney function tests	62
Online learning materials	xiii	3.4 Kidney disease	74
Preface	xv	3.5 Specific kidney disease	79
Contributors	xvii	<i>Summary</i>	85
Abbreviations	xix	<i>Further reading</i>	86
Reference ranges	xxiii	<i>Questions</i>	86
<b>1 Biochemical investigations and quality control</b>	<b>1</b>	<b>4 Hyperuricaemia and gout</b>	<b>89</b>
<i>David Cameron</i>		<i>Joanne Marsden</i>	
1.1 Nature of biochemical disorders	3	4.1 Sources of purines	92
1.2 Historical background	4	4.2 Purine catabolism and excretion	93
1.3 Modern clinical biochemistry laboratories	5	4.3 Hypouricaemia	95
1.4 Point-of-care testing	14	4.4 Hyperuricaemia	96
1.5 Evaluation of a clinical method	15	4.5 Clinical features of gout	97
1.6 Quality control	22	4.6 Diagnosis of gout	98
1.7 Audit	27	4.7 Treatment and management of gout	100
<i>Summary</i>	29	<i>Summary</i>	102
<i>Further reading</i>	29	<i>Further reading</i>	102
<i>Questions</i>	30	<i>Questions</i>	102
<b>2 Automation</b>	<b>33</b>	<b>5 Fluid and electrolyte disorders</b>	<b>104</b>
<i>Tim James</i>		<i>Tim James</i>	
2.1 Historical context	34	5.1 Water homeostasis	105
2.2 General automated chemistry systems	35	5.2 Assessing fluid and electrolyte status	108
2.3 Automated immunochemistry analysers	44	5.3 Disturbances of plasma sodium	110
2.4 Integration of processes and robotics	46	5.4 Disturbances of plasma potassium	114
2.5 Automation in specialized areas of clinical biochemistry	50	5.5 Plasma and urine osmolality	120
<i>Summary</i>	51	5.6 Chloride and bicarbonate	121
<i>Further reading</i>	51	<i>Summary</i>	123
<i>Questions</i>	52	<i>Further reading</i>	123
<i>Questions</i>		<i>Questions</i>	124
<b>3 Kidney disease</b>	<b>53</b>	<b>6 Acid-base disorders</b>	<b>125</b>
<i>Edmund Lamb</i>		<i>David Tierney</i>	
3.1 Renal anatomy	54	6.1 Hydrogen ion ( $H^+$ ) and pH	125
3.2 Renal physiology	57	6.2 Acids, bases, and buffers	127

6.3 Physiological role of H <sup>+</sup>	130	9 Abnormalities of lipid metabolism	190
6.4 Production of surplus H <sup>+</sup>	130	<i>Mike France</i>	
6.5 Hydrogen ion homeostasis	131		
6.6 Classification and investigation of acid-base disorders	137	9.1 Types of lipids	191
6.7 Metabolic acid-base disorders	139	9.2 Lipoproteins	194
6.8 Respiratory acid-base disorders	146	9.3 Lipoprotein (a)	202
6.9 Mixed acid-base disorders	150	9.4 Classification of lipid disorders	204
6.10 Interpretation of acid-base data	151	9.5 Hypercholesterolaemia	206
<i>Summary</i>	155	9.6 Hypocholesterolaemia	209
<i>Further reading</i>	155	9.7 Hypertriglyceridaemia	212
<i>Questions</i>	156	9.8 Lipids, atheroma, and heart disease	213
<i>Answers</i>	157	9.9 Measurement of lipids in clinical samples	215
		9.10 Assessment of cardiovascular risk	217
		9.11 Management of hyperlipidaemias	218
		<i>Summary</i>	222
		<i>Further reading</i>	222
		<i>Questions</i>	223
<b>7 Clinical enzymology and biomarkers</b>	<b>157</b>		
<i>Paul Collinson and Amy Lloyd</i>			
7.1 Enzymes and enzyme activities	158	<b>10 Disorders of calcium, phosphate, and magnesium homeostasis</b>	225
7.2 Isoenzymes	159	<i>Nessim Ahmed</i>	
7.3 Biomarkers	161	10.1 Distribution, function, and regulation of calcium	226
7.4 Cardiac disease	161	10.2 Disorders of calcium homeostasis	232
7.5 Cardiac disease, electrocardiogram, and biomarkers	163	10.3 Distribution, function, and regulation of phosphate	240
7.6 Development of heart disease	164	10.4 Disorders of phosphate homeostasis	242
7.7 Cardiac biomarkers in clinical practice	165	10.5 Distribution, function, and regulation of magnesium	247
7.8 Biomarkers of muscle damage for the diagnosis of acute myocardial infarction	169	10.6 Disorders of magnesium homeostasis	249
7.9 Natriuretic peptides	170	10.7 Bone metabolism	254
7.10 Possible future biomarkers in cardiac disease	171	10.8 Markers of bone disease	255
<i>Summary</i>	171	10.9 Metabolic bone disease	256
<i>Further reading</i>	172	<i>Summary</i>	260
<i>Questions</i>	172	<i>Further reading</i>	260
		<i>Questions</i>	261
<b>8 Liver function tests</b>	<b>173</b>		
<i>Roy Sherwood</i>			
8.1 Liver	173	<b>11 Abnormal pituitary function</b>	263
8.2 Diseases of the liver	178	<i>Garry McDowell</i>	
8.3 Liver function tests	181	11.1 Endocrine system	263
8.4 The current liver function tests: pros and cons	188	11.2 Structure of the hypothalamus and pituitary gland	265
<i>Summary</i>	188		
<i>Further reading</i>	188		
<i>Questions</i>	189		

11.3	Anterior pituitary hormones	268	13.13	Hypoglycaemia	329
11.4	Posterior pituitary hormones	271		Summary	331
11.5	Disorders of pituitary function	271		Further reading	332
11.6	Anterior pituitary hyperfunction	272		Questions	333
11.7	Anterior pituitary hypofunction	277			
11.8	Posterior pituitary dysfunction	280	<b>14</b>	<b>Adrenal disease</b>	<b>334</b>
	<i>Summary</i>	282		<i>John Honour</i>	
	<i>Further reading</i>	282	14.1	Adrenal glands	335
	<i>Questions</i>	283	14.2	Disorders of adrenal glands	345
		284	14.3	Investigation of adrenal disorders	355
			14.4	Management of adrenal disorders	364
				<i>Summary</i>	365
		284		<i>Further reading</i>	365
		286		<i>Questions</i>	366
		288	<b>15</b>	<b>Reproductive endocrinology</b>	<b>367</b>
		289		<i>Ian Laing and Julie Thornton</i>	
		289	15.1	Reproductive endocrinology in the female	368
		292	15.2	Hormonal changes in the menstrual cycle	372
		295	15.3	Menopause	375
		295	15.4	Causes of anovulatory infertility	376
		297	15.5	Polycystic ovary syndrome	378
		297	15.6	Investigations in female reproductive endocrinology	384
		298	15.7	Management of anovulatory infertility	387
			15.8	Reproductive endocrinology in the male	389
			15.9	Limitations in assays for steroid and polypeptide hormones	393
				<i>Summary</i>	394
				<i>Further reading</i>	395
				<i>Questions</i>	396
		300	<b>16</b>	<b>Biochemical nutrition</b>	<b>397</b>
				<i>Patrick Twomey and William Simpson</i>	
		302	16.1	Types of nutrients	397
		302	16.2	Specific nutrients: macronutrients	399
		306	16.3	Specific nutrients: organic micronutrients	400
		306	16.4	Specific nutrients: inorganic micronutrients	408
		309	16.5	Assessment of nutritional status	410
		309	16.6	Disordered eating patterns	414
		316	16.7	Nutritional intervention	416
				<i>Summary</i>	417
				<i>Further reading</i>	418
				<i>Questions</i>	418
		324			
		324			
		327			

<b>17 Gastrointestinal disorders and malabsorption</b>	<b>420</b>	20.2 Effects of a metabolic block	505
<i>Garry McDowell and Gordon Brydon</i>		20.3 Approaches to treatment	506
17.1 Gastrointestinal biochemistry and physiology	421	20.4 Laboratory testing for inherited metabolic disorders	506
17.2 Biochemical investigation of gastrointestinal tract diseases	431	20.5 Groups of metabolic disorders	509
17.3 Management of gastrointestinal disease	441	20.6 Antenatal diagnosis	529
<i>Summary</i>	442	20.7 Newborn screening	530
<i>Further reading</i>	443	<i>Summary</i>	532
<i>Questions</i>	443	<i>Further reading</i>	532
<i>Questions</i>		<i>Questions</i>	533
<b>18 Specific protein markers</b>	<b>445</b>	<b>21 Therapeutic drug monitoring</b>	<b>534</b>
<i>Gerald Maguire</i>		<i>Robin Whelpton, Nigel Brown, and Robert Flanagan</i>	
18.1 Plasma proteins	445	21.1 Drug administration, distribution, and elimination	535
18.2 Albumin	448	21.2 Pharmacokinetics	541
18.3 Alpha 1-antitrypsin	450	21.3 Analytical methods	546
18.4 Haptoglobin	452	21.4 Therapeutic drug monitoring: practicalities	551
18.5 Caeruloplasmin	453	21.5 Therapeutic monitoring of specific drugs	554
18.6 Transferrin	453	<i>Summary</i>	558
18.7 C-reactive protein	454	<i>Further reading</i>	558
18.8 Immunoglobulins	455	<i>Questions</i>	559
18.9 Measuring concentrations of specific proteins	461	<b>22 Chemical toxicology</b>	<b>560</b>
<i>Summary</i>	474	<i>Gwendolen Ayers</i>	
<i>Further reading</i>	474	22.1 Types of poisons and poisoning	560
<i>Questions</i>	475	22.2 Clinical features of poisoning	563
<b>19 Cancer biochemistry and tumour markers</b>	<b>477</b>	22.3 Biochemical features of poisoning	563
<i>Joanne Adaway and Gilbert Wieringa</i>		22.4 Management of the poisoned patient	564
19.1 Causes of cancer	478	22.5 Laboratory investigation of poisoning	566
19.2 Types of cancers	479	22.6 Toxicology of specific compounds	572
19.3 The effects of cancer	480	<i>Summary</i>	582
19.4 Cancer treatments	485	<i>Further reading</i>	582
19.5 Tumour markers	487	<i>Questions</i>	582
19.6 The future of clinical biochemistry in cancer diagnostics	497	Answers to self-check questions	584
<i>Summary</i>	499	Answers to case studies	590
<i>Further reading</i>	500	Answers to end-of-chapter questions	599
<i>Questions</i>	500	Glossary	605
<b>20 Inherited metabolic disorders and newborn screening</b>	<b>502</b>	Index	629
<i>Mary Anne Preece</i>		Structure of the hypothalamus	
20.1 Modes of inheritance	503	Pituitary gland
