

Table of Contents

Introduction	
Chapter 1. Introduction	1
Chapter 2. Regular Expressions and Automata	17
Chapter 3. Words and Transducers	45
Chapter 4. N-Grams	85
Chapter 5. Part-of-Speech Tagging	125
Chapter 6. Hidden Markov and Maximum Entropy Models	175
Chapter 7. Phonetics	219
Chapter 8. Speech Synthesis	255
Chapter 9. Automatic Speech Recognition	291
Chapter 10. Speech Recognition: Advanced Topics	343
Chapter 11. Computational Phonology	371
Chapter 12. Formal Grammars of English	395
Chapter 13. Syntactic Parsing	437

Chapter 14. Statistical Parsing	469
Chapter 15. Features and Unification	501
Chapter 16. Language and Complexity	541
Chapter 17. The Representation of Meaning	557
Chapter 18. Computational Semantics	595
Chapter 19. Lexical Semantics	623
Chapter 20. Computational Lexical Semantics	649
Chapter 21. Computational Discourse	695
Chapter 22. Information Extraction	739
Chapter 23. Question Answering and Summarization	779
Chapter 24. Dialogue and Conversational Agents	827
Chapter 25. Machine Translation	877
Index	929
