## CHAPTER 1 INTRODUCTION TO PERSONALITY PSYCHOLOGY ..... 1

### Personality Defined 2

Personality Is the Set of Psychological Traits ... 3

And Mechanisms ... 4

Within the Individual ... 4

That Are Organized and Relatively Enduring ... 5

And that Influence ... 5

His or Her Interactions with ... 5

And Adaptations to ... 6

The Environment 6

### Three Levels of Personality Analysis 7

Human Nature 7

Individual and Group Differences 8

Individual Uniqueness 8

### A Fissure in the Field 9

Grand Theories of Personality 9

Contemporary Research in Personality 9

### Six Domains of Knowledge about Human Nature 10

Dispositional Domain 11

Biological Domain 11

Intrapsychic Domain 12

Cognitive-Experiential Domain 12

Social and Cultural Domain 13

Adjustment Domain 13

### The Role of Personality Theory 14

### Standards for Evaluating Personality Theories 15

## Is There a Grand Ultimate and True Theory of Personality? 16

### Key Terms 17

## CHAPTER 2 PERSONALITY ASSESSMENT, MEASUREMENT AND RESEARCH DESIGN ..... 18

### Sources of Personality Data 19

Self-report Data (S-Data) 19

Observer-report Data (O-Data) 22

Test Data (T-Data) 24

Life-outcome Data (L-Data) 28

Issues in Personality Assessment 29

### Evaluation of Personality Measures 31

Reliability 31

Response Sets 31

Validity 34

Generalizability 35

### Development of Measurement Instruments 35

Scale Development 36

Scale Diagnostics 36

### Research Designs in Personality 37

Experimental Methods 37

Correlational Studies 39

Case Studies 42

When to Use Experimental, Correlational and Case Study Designs 43

### Summary and Evaluation 43

### Key Terms 44

## Part 1 The Dispositional Domain

### CHAPTER 3 TRAITS AND TRAIT TAXONOMIES..... 48

#### What Is a Trait? Two Basic Formulations 50

Traits as Internal Causal Properties 50

Traits as Purely Descriptive Summaries 50

#### The Act Frequency Formulation of Traits – An Illustration of the Descriptive Summary Formulation 51

Act Frequency Research Program 51

Evaluation of the Act Frequency Formulation 52

#### Identification of the Most Important Traits 53

Lexical Approach 53

Statistical Approach 55

Theoretical Approach 56

Evaluating the Approaches for Identifying  
Important Traits 57

#### Taxonomies of Personality 57

Eysenck's Hierarchical Model of Personality 58

Cattell's Taxonomy: The 16 Personality  
Factor System 61

Circumplex Taxonomies of Personality 62

Five-factor Model 65

#### Summary and Evaluation 75

#### Key Terms 75

### CHAPTER 4 THEORETICAL AND MEASUREMENT ISSUES IN TRAIT PSYCHOLOGY.....76

#### Theoretical Issues 77

Meaningful Differences between Individuals 78

Consistency over Time 78

Consistency across Situations 79

Person–Situation Interaction 82

Aggregation 86

#### Measurement Issues 87

Carelessness 88

Faking on Questionnaires 89

Beware of Barnum Statements in Personality Test  
Interpretations 90

#### Personality and Selection 91

Personnel Selection – Choosing the Right  
Person for the Job 92

Selection in Business Settings –  
The Myers-Briggs Type Indicator 94

Selection in Business Settings –  
The Hogan Personality Inventory 97

#### Summary and Evaluation 99

#### Key Terms 99

### CHAPTER 5 PERSONALITY DISPOSITIONS OVER TIME: STABILITY, COHERENCE AND CHANGE ..... 100

#### Conceptual Issues: Personality Development, Stability, Coherence and Change 101

What Is Personality Development? 101

Rank Order Stability 101

Mean Level Stability 102

Personality Coherence 102

Personality Change 104

#### Three Levels of Analysis 104

Population Level 104

Group Differences Level 105

Individual Differences Level 105

#### Personality Stability over Time 105

Stability of Temperament during Infancy 105

Stability during Childhood 107

Rank Order Stability in Adulthood 110

Mean Level Stability in Adulthood 113

#### Personality Change 116

Changes in Self-esteem from Adolescence to  
Adulthood 116

Autonomy, Dominance, Leadership  
and Ambition 117

Sensation Seeking 118

Femininity 119

Independence and Traditional Roles 121

Personality Changes across Cohorts: Assertiveness and Narcissism	121
<b>Personality Coherence over Time: Prediction of Socially Relevant Outcomes</b>	122
Marital Stability, Marital Satisfaction and Divorce	123
Alcoholism and Emotional Disturbance	124
Religiousness and Spirituality	124
Education, Academic Achievement and Dropping Out	124
Health and Longevity	125
Predicting Personality Change	126
<b>Summary and Evaluation</b>	127
<b>Key Terms</b>	128

## Part 2 The Biological Domain

<b>CHAPTER 6 GENETICS AND PERSONALITY</b>	<b>132</b>
<b>The Human Genome</b>	133
<b>Controversy about Genes and Personality</b>	135
<b>Goals of Behavioural Genetics</b>	136
<b>What Is Heritability?</b>	137
Misconceptions about Heritability	137
Nature-Nurture Debate Clarified	138
<b>Behavioural Genetic Methods</b>	139
Selective Breeding – Studies of Humans’ Best Friend	139
Family Studies	139
Twin Studies	140
Adoption Studies	143
<b>Major Findings from Behavioural Genetic Research</b>	144
Personality Traits	144
Attitudes and Preferences	146
Drinking and Smoking	147
Marriage	150
<b>Shared versus Non-shared Environmental Influences: A Riddle</b>	150

<b>Genes and the Environment</b>	152
Genotype-Environment Interaction	152
Genotype-Environment Correlation	153
Environmental Modulation of Gene Expression	154
<b>Molecular Genetics</b>	155
<b>Behavioural Genetics, Science, Politics and Values</b>	157
<b>Summary and Evaluation</b>	158
<b>Key Terms</b>	159

## CHAPTER 7 PHYSIOLOGICAL APPROACHES TO PERSONALITY.....160

<b>A Physiological Approach to Personality</b>	164
<b>Physiological Measures Commonly Used in Personality Research</b>	165
Electrodermal Activity (Skin Conductance)	165
Cardiovascular Activity	165
Brain Activity	166
Other Measures	168
<b>Physiologically Based Theories of Personality</b>	169
Extraversion–Introversion	169
Sensitivity to Reward and Punishment	171
Sensation Seeking	175
Neurotransmitters and Personality	180
Morningness–Eveningness	182
Brain Asymmetry and Affective Style	185
<b>Summary and Evaluation</b>	188
<b>Key Terms</b>	189

## CHAPTER 8 EVOLUTIONARY PERSPECTIVES ON PERSONALITY.....190

<b>Evolution and Natural Selection</b>	192
Natural Selection	192
Sexual Selection	193
Genes and Inclusive Fitness	193
Products of the Evolutionary Process	194

<b>Evolutionary Psychology</b>	195	Id: Reservoir of Psychic Energy	229
Premises of Evolutionary Psychology	196	Ego: Executive of Personality	229
Empirical Testing of Evolutionary Hypotheses	196	Superego: Upholder of Societal Values and Ideals	230
<b>Human Nature</b>	198	Interaction of the Id, Ego and Superego	232
Need to Belong	198	<b>Dynamics of Personality</b>	233
Helping and Altruism	200	Types of Anxiety	233
Universal Emotions	201	Defence Mechanisms	233
<b>Sex Differences</b>	202	<b>Psychosexual Stages of Personality Development</b>	239
Sex Differences in Aggression	203	<b>Personality and Psychoanalysis</b>	241
Sex Differences in Jealousy	205	Techniques for Revealing the Unconscious	242
Sex Differences in Desire for Sexual Variety	208	The Process of Psychoanalysis	244
Sex Differences in Mate Preferences	209	<b>Why Is Psychoanalysis Important?</b>	245
<b>Individual Differences</b>	210	<b>Evaluation of Freud's Contributions</b>	246
Environmental Triggers of Individual Differences	211	<b>Summary and Evaluation</b>	248
Heritable Individual Differences		<b>Key Terms</b>	249
Contingent on other Traits	212		
Frequency-dependent Strategic Individual Differences	212	<b>CHAPTER 10 PSYCHOANALYTIC APPROACHES: CONTEMPORARY ISSUES</b>	250
<b>The Big Five, Motivation and Evolutionarily Relevant Adaptive Problems</b>	214	<b>The Neo-analytic Movement</b>	251
<b>Limitations of Evolutionary Psychology</b>	215	Repression and Contemporary Research on Memory	252
<b>Summary and Evaluation</b>	216	Contemporary Views on the Unconscious	258
<b>Key Terms</b>	217	<b>Ego Psychology</b>	259
		Erikson's Eight Stages of Development	260
<b>Part 3 The Intrapsychic Domain</b>		Karen Horney and a Feminist Interpretation of Psychoanalysis	265
<b>CHAPTER 9 PSYCHOANALYTIC APPROACHES TO PERSONALITY</b>	221	Emphasis on Self and the Notion of Narcissism	265
<b>Sigmund Freud: A Brief Biography</b>	223	<b>Object Relations Theory</b>	267
<b>Fundamental Assumptions of Psychoanalytic Theory</b>	224	Early Childhood Attachment	268
Basic Instincts: Sex and Aggression	224	Adult Relationships	270
Unconscious Motivation: Sometimes We Don't Know Why We Do What We Do	225	<b>Summary and Evaluation</b>	272
Psychic Determinism: Nothing Happens by Chance	226	<b>Key Terms</b>	273
<b>Structure of Personality</b>	228	<b>CHAPTER 11 MOTIVES AND PERSONALITY</b>	274
		<b>Basic Concepts</b>	276

Need	277
Press	277
Apperception and the TAT	278
<b>The Big Three Motives: Achievement, Power and Intimacy</b>	282
Need for Achievement	282
Need for Power	284
Need for Intimacy	285
<b>Humanistic Tradition: The Motive to Self-actualize</b>	286
Maslow's Contributions	287
Rogers' Contributions	291
<b>Summary and Evaluation</b>	296
<b>Key Terms</b>	297

## Part 4 The Cognitive/ Experiential Domain

### CHAPTER 12 COGNITIVE TOPICS IN PERSONALITY ..... 301

<b>Personality Revealed through Perception</b>	304
Field Dependence	304
Pain Tolerance and Sensation Reducing/ Augmenting	308
<b>Personality Revealed through Interpretation</b>	310
Kelly's Personal Construct Theory	310
Locus of Control	312
<b>Personality Revealed through Goals</b>	314
Personal Projects Analysis	316
Social Cognition	317
<b>Summary and Evaluation</b>	320
<b>Key Terms</b>	321

### CHAPTER 13 INTELLIGENCE, *By John Song* ..... 322

<b>Why Does Intelligence Matter?</b>	323
<b>Defining Intelligence</b>	324

<b>Implicit Theories of Intelligence</b>	325
<b>History of Intelligence and Models of Intelligence</b>	329
Psychometric Approaches to Intelligence	329
Cognitive-Experiential Approaches to Intelligence	336
<b>Intelligence Tests</b>	337
The Stanford-Binet Test and the Wechsler Scales	337
General Intelligence Tests: Raven's Progressive Matrices	340
Modern Intelligence Tests	340
Other Approaches to Intelligence Tests	343
<b>Genetics, Environment and Race Issues in Intelligence</b>	347
Genetics	347
Environment	348
Race	350

### Intelligence, Learning Styles and Personality in Education ..... 351

<b>Summary and Evaluation</b>	355
<b>Key Terms</b>	356

### CHAPTER 14 EMOTION AND PERSONALITY ..... 357

<b>Issues in Emotion Research</b>	359
Emotional States versus Emotional Traits	359
Categorical versus Dimensional Approach to Emotion	360
<b>Content versus Style of Emotional Life</b>	362
Content of Emotional Life	362
Style of Emotional Life	376
Interaction of Content and Style in Emotional Life	380
Personality and Well-being	380
<b>Summary and Evaluation</b>	383
<b>Key Terms</b>	384

### CHAPTER 15 APPROACHES TO THE SELF ..... 385

<b>Descriptive Component of the Self: Self-concept</b>	387
--	-----

Development of the Self-concept	388	Personality Predictors of Tactics of Manipulation	428
Self-schemata: Possible Selves, Ought Selves and Undesired Selves	390	<b>Panning Back: An Overview of Personality and Social Interaction</b>	431
<b>Evaluative Component of the Self: Self-esteem</b>	392	<b>Summary and Evaluation</b>	434
Evaluation of Oneself	392	<b>Key Terms</b>	435
Research on Self-esteem	393		
<b>Social Component of the Self: Social Identity</b>	402	<b>CHAPTER 17 SEX, GENDER AND PERSONALITY</b> .....	436
The Nature of Identity	402	<b>The Science and Politics of Studying Sex and Gender</b>	437
Identity Development	403	History of the Study of Sex Differences	438
Identity Crises	404	Calculation of Effect Size: How Large Are the Sex Differences?	438
<b>Summary and Evaluation</b>	406	Minimalists and Maximalists	439
<b>Key Terms</b>	407	<b>Sex Differences in Personality</b>	440
		Temperament in Children	440
<b>Part 5 The Social and Cultural Domain</b>		Five-factor Model	441
		Basic Emotions: Frequency and Intensity	444
<b>CHAPTER 16 PERSONALITY AND SOCIAL INTERACTION</b> .....	410	Other Dimensions of Personality	445
<b>Selection</b>	411	<b>Masculinity, Femininity, Androgyny and Sex Roles</b>	449
Personality Characteristics Desired in a Long-term Romantic Partner	412	The Search for Androgyny	449
Assortative Mating for Personality: The Search for the Similar	412	Gender Stereotypes	452
Do People Get the Mates They Want? And Are They Happy?	415	<b>Theories of Sex Differences</b>	454
Personality and the Selective Break-up of Couples	417	Socialization and Social Roles	454
Shyness and the Selection of Social Situations	418	Hormonal Theories	456
Selection in the Digital Era: Personality Expressed Using Facebook	418	Evolutionary Psychology Theory	458
Other Personality Traits and the Selection of Situations	420	An Integrated Theoretical Perspective	458
<b>Evocation</b>	421	<b>Summary and Evaluation</b>	459
Aggression and the Evocation of Hostility	421	<b>Key Terms</b>	460
Evocation of Anger and Upset in Partners	421	<b>CHAPTER 18 CULTURE AND PERSONALITY</b> .....	461
Evocation through Expectancy Confirmation	424	<b>Cultural Violations: An Illustration</b>	462
<b>Manipulation: Social Influence Tactics</b>	425	<b>What Is Cultural Personality Psychology?</b>	463
A Taxonomy of Eleven Tactics of Manipulation	426	<b>Three Major Approaches to Culture</b>	463
Sex Differences in Tactics of Manipulation	427	Evoked Culture	463
		Transmitted Culture	466

Cultural Universals	478
<b>Summary and Evaluation</b>	486
<b>Key Terms</b>	487

## Part 6 The Adjustment Domain

### CHAPTER 19 STRESS, COPING, ADJUSTMENT AND HEALTH ..... 490

<b>Models of the Personality–Illness Connection</b>	492
<b>The Concept of Stress</b>	495
Stress Response	496
Major Life Events	497
Daily Hassles	498
Varieties of Stress	499
Primary and Secondary Appraisal	500

<b>Coping Strategies and Styles</b>	500
Attributional Style	500
Optimism and Physical Well-being	503
Management of Emotions	504
Disclosure	507

<b>Type A Personality and Cardiovascular Disease</b>	509
Hostility: The Lethal Component of the Type A Behaviour Pattern	510
How the Arteries Are Damaged by Hostile Type A Behaviour	512

<b>Summary and Evaluation</b>	513
<b>Key Terms</b>	514

### CHAPTER 20 DISORDERS OF PERSONALITY ..... 515

<b>The Building Blocks of Personality Disorders</b>	517
<b>The Concept of Disorder</b>	518
What Is Abnormal?	519
What Is a Personality Disorder?	520

<b>Specific Personality Disorders</b>	522
The Eccentric Cluster: Ways of Being Different	522
The Erratic Cluster: Ways of Being Unpredictable, Violent or Emotional	525
The Anxious Cluster: Ways of Being Nervous, Fearful or Distressed	535

<b>Prevalence of Personality Disorders</b>	541
Gender Differences in Personality Disorders	542

<b>DSM-V: Hybrid Model of Personality Disorders</b>	543
Dimensions and Categories: Rationale for DSM-V	543
Proposed structure of the DSM-V	544

<b>Causes of Personality Disorders</b>	545
--	-----

<b>Summary and Evaluation</b>	547
-------------------------------	-----

<b>Key Terms</b>	547
------------------	-----

### CHAPTER 21 SUMMARY AND FUTURE DIRECTIONS ..... 548

<b>Current Status of the Field</b>	549
------------------------------------	-----

<b>Domains of Knowledge: Where We Have Been, Where We Are Going</b>	550
---	-----

Dispositional Domain	550
Biological Domain	551
Intrapsychic Domain	553
Cognitive/Experiential Domain	554
Social and Cultural Domain	554
Adjustment Domain	555

<b>Integration: Personality in the Twenty-first Century</b>	556
---	-----

Glossary	557
References	593

Subject Index	684

# Subject Index

**Boldface** page numbers indicate key terms. *Italic* page numbers indicate figures or tables

## A

- Abnormal, **519**
- Abnormal psychology, **519**
- Academic achievement, 124–5
- Acculturation, **469**
- Achievement
  - need for, 282–4
  - promoting in children, 283–4
  - see also* Need for achievement (nAch)
- Acquiescence, **31**
- Act nomination procedure, 51
- Actigraph, 25–6, **107**
- Action tendencies, **358**
- Active genotype-environment
  - correlation, **153**
- Actual self, **391**
- Acute stress, **499**
- Adaptation, **6**
- Adaptations, **192**
  - adaptive problem, **194**
  - by-products of adaptations, **195**
  - evolutionary by-products, **195**
  - xenophobia, **195**
- Adaptive problems, **194, 458**
- Additive effects, **499**
- Adjacency, **62**
- Adjustment domain, 13, **13–14**, 555–6
  - about the adjustment domain, 489
  - see also* Coping with stress; Stress
- Adoption studies, **143**
  - environmental influences, 151
- Adulthood stability, 110–16
  - mean level Big Five personality traits, 114, 115
  - mean level stability, 113–16
  - Negative effect decline, 115
  - Neuroticism decline, 115
  - personality dispositions over time, 116
  - rank order stability, 110–13, 113
  - stability coefficients, 111
- Affect intensity, **376**
  - AIM questionnaire, 379
  - as an emotional style, 376–8
  - and mood variability, 378–80, **379**
  - research findings, 378–80
- Affective forecasting, **420–1**
- Age, and personality disorders, 522
- Aggregation, **81**, 86–7
- Aggression
  - childhood studies, 108
  - and evocation, 421
  - sex differences, 203–4, 442–3
- Agreeableness, **68–9**
  - sex differences, 442
- AIDS/HIV epidemic, 491
- Alarm stage, **496**
- Alcoholism
  - Behavioural genetics, 147–50
  - heritability studies, 147–51
  - and personality coherence, 124
- Alleles, **134**
- Alpha press, **278**
- Alpha wave, **185**
- Altruism, 200–1
- Ambivalent relationship style, **270**
- Ambivalently attached, **269**
- American Beauty* (film), 287, 405
- American Psychiatric Association, 178, 518, 522, 526, 544, 519–20
- American Psychological Association, 149, 245, 257
- Amygdala, **397**
- Anal stage, **240**
- Analytical (explanations), **474**
- Androgynous (persons), **449**
  - see also* Masculinity/femininity/androgyny
- Anger
  - evoking in partners, 421–4
  - proneness to, 375
- Anterior cingulate, **373**
- Antisocial personality disorder, **526–9**
  - assaultive, 527
  - children, 526–7
  - easily irritated, 527
  - impulsivity, 527
  - irresponsibility, 527
  - lack of remorse, 528
  - psychopathy, 528
  - recklessness, 527
  - repeated lying, 527
- Anxiety, **173, 233, 293, 370–4**
  - cognitive theories, 373–4
  - crying, 371–2
  - Eysenck's biological theory, 372–3
  - moral anxiety, **233**
  - neurotic anxiety, **233**
  - and neuroticism, 370–4
  - objective anxiety, **233**
  - see also* Defence mechanisms
- Apperception, **279**
- Arousability, **170**
- Arousal level, **170**
- Arteriosclerosis, **512–13**
- Ascending reticular activating system (ARAS), **170**
- Assaultive behaviour, 527
- Assertiveness change, 122
- Assessment of Men, The* (Murray), 24
- Assortative mating, **413–14**
- Attachment, **268**
- Attitude traits, 146–7
- Attraction *see* Selection, long-term partners
- Attraction similarity theory, **413**
- Autonomic nervous system, **165**
- Autonomy, **538**
- Autonomy change, 117–18, 118
- Average tendencies, **3, 87**
- Avoidant personality disorder, **536–7, 537**
- Avoidant relationship style, **270**
- Avoidantly attached (infants), **269**

## B

- Balancing selection, **214**
- Barnum statements, **90**
- Behavioural activation system (BAS), **171–4**
- Behavioural genetics, 136–50
  - activity level differences, 144
  - attitudes/preferences, 146–7
  - Cloninger's theory of personality, 145
  - drinking/smoking, 147–50
  - extraversion, 144
  - family studies, **139–40, 140**
  - gender identity disorder (GID), 149, **149**
  - marriage, 150

- morningness-eveningness disposition, 145, 145  
 neuroticism, 144  
 personality traits, 144–6  
 psychopathic personality traits, 144  
 and science/politics/values, 157–8  
 selective breeding, 139  
 sexual orientation, 148–9  
 twins reared apart studies, 145, 146  
*see also* Heritability; Twins studies
- Behavioural inhibition system (BIS), 171–4
- Bell Curve, The* (Herrnstein and Murray), 337, 347
- Belongingness needs, 288
- Beta Press, 278
- Big Five *see* Five-factor model
- Biological Basis of Personality, The* (Eysenck), 170
- Biological domain, 11–12, 12, 551–3
- Biological factors
  - biological measurements, 345–7
  - Eysenck's hierarchical model of personality, 61
  - intelligence tests, 345–7
  - neuroticism/anxiety, Eysenck's theory, 372–3
  - and personality disorders, 518
  - see also* Physiological measures
- Bipolarity, 63
- Blindsight, 227
- Borderline personality disorder, 529–33, 532
- Brain activity, 166–8
- Brain asymmetry, 185–8
  - alpha waves, 185
  - assessing without EEG, 186–7
  - EEG wave measurement, 185–6
  - frontal brain asymmetry, 186
  - meditation and stress effects, 187–8
  - thresholds for responding, 187
- Brain injury, 161–4
- Bullies and whipping boys, 109–10
- Business settings, personnel selection, 94–8
  - Hogan Personality Inventory (HPI), 97–8
  - Myers-Briggs Type Indicator (MBTI), 94–7
- By-products of adaptations, 195
- C**
- California Psychological Inventory, 21
- Candidate gene associate studies, 155
- Cardiac reactivity, 166
- Cardiovascular activity, 165–6
- Cardiovascular disease, 509–13
- Case study method, 42–3
- Castration anxiety, 240
- Categorical approach (to emotion), 360
- Categorical view (personality disorders), 543
- Cattell's 16 personality factor system, 61–2, 63
  - Raymond Cattell, 61
- Causal attribution, 315
- Change *see* Personality change
- Child abuse, 222–3
  - adult effects, 255–8
  - child sexual abuse (CSA), 256–8
- Childhood stability, 107–10
  - actigraphs, 107
  - aggression and violence, 108, 109
  - bullies and whipping boys, 109–10
  - longitudinal studies, 108
  - self esteem, 110
  - stability coefficients, 107
  - validity coefficients, 107
- Children
  - ambivalently attached, 269
  - antisocial personality disorder, 526–7
  - attachment, 268
  - avoidantly attached, 269
  - early childhood attachment, 268
  - independence training, 283
  - intelligence, psychometric approaches, 329–30
  - promoting achievement, 283–4, 284
  - securely attached, 268
  - separation anxiety, 268
  - sex differences, temperament/personality, 440–1
  - strange situation procedure, 268
  - temper tantrums, 28–9, 126
- Choice reaction time, 336
- Chromosomes, 133
- Chronic stress, 499
- Circadian rhythms, 182
- Circumplex taxonomies of personality, 62–4, 64, 65
  - adjacency, 62
  - bipolarity, 63
  - interpersonal traits, 62
  - Jerry Wiggins, 62
