

TABLE OF CONTENTS

Dušek L., Hřebíček J., Jarkovský J., Svobodník A., Žižka J.

Computational Biology and its Contribution to the Education at Faculty of Science and Faculty of Medicine of Masaryk University in Brno, Czech Republic1

MODERN INFORMATION AND COMMUNICATION TECHNOLOGIES IN COMPUTATIONAL BIOLOGY

Educational papers:

Jan Žižka

Inductive Machine–Learning Tools for Reasoning.....14

Michal Kozubek, Pavel Matula, Petr Matula and David Svoboda

Analysis of Biomedical Image Data Acquired using Optical Microscopy21

Papers of students:

Jan Hubený

Enhancement of Images Acquired using Optical Microscope.....29

Jiří Hroza

Protein Secondary Structure Prediction by Machine Learning Methods.....38

Lukáš Kokrment

Supervised Machine Learning Techniques for Microarray Data44

Tomáš Hudík and Matěj Lexa

Segmentation of Texts and Biological Sequences into Lexical and Structural Units using a Machine-Learning Approach50

Eva Budinská and Eva Gelnarová

A New Concept for Detecting Breakpoints in the CGH Microarray Data..... 57

ADVANCED ANALYSIS OF BIOLOGICAL AND CLINICAL DATA

Educational papers:

František Huňka

Object Oriented Modeling and Cluster Analysis of Clinical Data64

Papers of students:

Klára Kubošová, Ondřej Hájek, Milan Chytrý and Miroslav Svoboda

Predictive Modelling of Spatial Distribution of Species Using Presence/Absence Data71

<i>David Hampel</i> Refractory Period and its Role in Information Transfer.....	75
--	----

<i>Vladimír Ulman</i> Quantitative Analysis of Intracellular Processes in Living Cells.....	84
--	----

<i>Petr Bureš</i> Dose Response Curves: Benchmark Dose Approach of Data Processing.....	95
--	----

<i>Petr Lidman, Zdenko Staníček, Filip Procházka, Rostislav Vyzula, Jan Žaloudík, Ladislav Dušek, Jiří Jarkovský, Eva Budinská</i> Rule-based Systems: Employing an Intelligent Computer Assistant in Biomedicine and Clinical Practice	100
--	-----

<i>Eva Gelnarová, Lucie Neuvirtová</i> How to Model Epidemiological Data: Age-period-cohort Models on Diagnosis C50	105
--	-----

COMPUTATIONAL APPROACHES IN ENVIRONMENTAL INFORMATICS AND HUMAN RISK ASSESSMENT

Educational papers:

<i>Jiří Jarkovský, Ladislav Dušek, Petr Pavliš, Roman Šmíd, Jan Hodovský</i> Information Systems in Biomonitoring: Challenge for Biology, Data Analysis and Informatics	117
--	-----

<i>Danka Némethová</i> Multivariate Statistical Analysis in Community Ecology: Possibilities and Limitations	124
---	-----

<i>Jaroslav Ráček, Jana Sedláčková</i> Measurements of Biological Software.....	140
--	-----

Papers of students:

<i>Petr Pavliš, Jiří Jarkovský, Ladislav Dušek, Jan Hodovský, Roman Šmíd</i> TRITON – Complex Information System for Surface Water Quality Assessment.....	144
---	-----

<i>Jan Mužík, Ladislav Dušek, Jana Koptíková, Petr Pavliš, Miroslav Kubásek, Jan Žaloudík, Rostislav Vyzula</i> SVOD - Information System for Inventive Analysis of Cancer Epidemiology	150
--	-----

<i>Miroslav Kubásek, Jan Mužík, Ladislav Dušek, Jana Koptíková, Petr Brabec, Jan Žaloudík, Rostislav Vyzula</i> Technological Background of Web Portal SVOD as National Information Platform for Cancer Epidemiology in the Czech Republic	156
---	-----

Jan Pavlovič
Modern Computer Methods in Optimization of Remedial Process162

Roman Šmíd, Miroslav Kubásek, Jiří Jarkovský, Blahoslav Maršálek, Jakub Hofman, Luděk Bláha, Pavel Čupr and Ivan Holoubek
Interactive Information System for Ecotoxicological Tests – DATEST 2.0.....166
