Preface xxi

About the Authors xxiv

PART I An Overview of Development

- 1 Introduction to Motor Development 1**
 - Human Motor Development 2
 - The Importance of Motor Development 3
 - The Domains of Human Development 4
 - Development, Maturation, and Growth 6
 - Development 6
 - Maturation and Growth 8
 - General Motor Development Terms 8
 - Developmental Direction 8
 - Differentiation and Integration 9
 - Gross Movement and Fine Movement 10
 - The Process–Product Controversy 11
 - Terms for Age Periods Throughout the Lifespan 12
 - Stages of Development 14
 - The History of the Field of Motor Development 14
 - An Interdisciplinary Approach to Motor Development 17
 - Designing Research in Motor Development: Cross-Sectional, Longitudinal, or . . . ? 18
 - Summary* 20
 - Key Terms* 21
 - Questions for Reflection* 21
 - Internet Resources* 22
 - Online Learning Center* 22
 - References* 22

2 Cognitive and Motor Development 24

Psychomotor or Motor? 25

Jean Piaget and Cognitive Development 25

Piaget's Theory of Cognitive Development 26

Infancy: The Sensorimotor Stage and Motor Development 28

Childhood: Preoperations and Motor Development 32

Later Childhood and Adolescence: Cognitive and Motor Development 34

Concrete Operational Stage 34

Formal Operational Stage 35

Adulthood: Postformal Operations 36

Adulthood: General Theories of Intellectual Development 37

The Notion of Total Intellectual Decline 37

Partial Intellectual Declines 37

Knowledge Development and Sport Performance 40

Summary 42*Key Terms* 43*Questions for Reflection* 43*Online Learning Center* 43*References* 43**3 Social and Motor Development 45**

Socialization 46

Self-Esteem Development and Physical Activity 47

Social Influences During Infancy 50

Social Influences During Childhood 51

Play 52

Family 55

Social Influences During Older Childhood and Adolescence 57

Team Play 58

Gender Role Identification and Movement Activity 60

Social Factors of Adulthood 61

Social Learning and Ageism 63

Other Social Situations Likely to Affect Motor Development 65

The Exercise-Aging Cycle 67

Avoiding the Exercise-Aging Cycle 68

Summary 71*Key Terms* 72

Questions for Reflection 72

Internet Resources 72

Online Learning Center 73

References 73

PART II Factors That Affect Development

4 Prenatal Development Concerns 75

Prenatal Development 76

The First 2 Weeks: Germinal Period 76

Weeks 3 to 8: Embryonic Period 77

Weeks 9 to Birth: Fetal Period 77

Drugs and Medications 79

Recreational Drugs 79

Prescriptive Drugs 82

Nonprescriptive Drugs 82

Obstetrical Medications 83

Maternal Diseases 84

Rubella and Congenital Rubella Syndrome 84

Human Immunodeficiency Virus 84

Toxoplasmosis 85

Rh Incompatibility and Erythroblastosis Fetalis 86

Diabetes Mellitus 86

Genetic Factors 87

Chromosomal Disorders 87

Gene-Based Disorders 88

Prenatal Diagnostic Procedures 91

Ultrasound 91

Amniocentesis 91

Chorionic Villus Sampling 93

Alpha-Fetoprotein Test 93

Triple Marker Screening 93

Maternal Nutrition 95

Birth Weight 96

Exercise During Pregnancy 98

Maternal Response to Exercise 99

Fetal Responses to Maternal Exercise 100

Summary 101

Key Terms 102

Questions for Reflection 103

Internet Resources 103

Online Learning Center 103

References 104

5

Effects of Early Stimulation and Deprivation 107

Effects of Early Stimulation 108

Programs to Enhance Early Motor Development 109

Gymboree 110

Swim Programs for Infants and Preschoolers 111

Suzuki Method of Playing the Violin 114

Head Start Programs 115

Infant Walkers 117

Johnny and Jimmy 118

Effects of Early Deprivation 120

Hopi Cradleboards and Infant Development 121

Deprivation Dwarfism 121

Anna: A Case of Extreme Isolation 122

The “Young Savage of Abeyron” 123

Concepts Concerning Stimulation and Deprivation 124

Critical Periods 124

Readiness 126

Catch-Up 127

Summary 129

Key Terms 130

Questions for Reflection 130

Internet Resources 130

Online Learning Center 131

References 131

PART III Physical Changes Across the Lifespan

6 Growth and Maturation 133

Measuring Growth in Length and Stature 134

Growth in Length and Stature 135

Measuring Body Weight 137

Growth in Body Weight 138

Combining Body Weight and Height: Body Mass Index 143

Stature and Weight: Interrelationship with Motor Development and Performance 145

Adolescent Awkwardness	146
Measuring Changes in Body Proportions	148
Changes in Body Proportions	153
Changes in the Ratio of Head Length to Total Body Length	153
Changes in Head Circumference	154
Changes in Sitting Height	154
Growth in Shoulder and Hip Width	154
Physique	155
Body Proportions: Interrelationship with Motor Performance	157
Measuring Skeletal Health	158
Skeletal Development	158
Exercise, Skeletal Development, and Health	159
Maturation and Developmental Age	162
Skeletal Maturity	162
Dental Maturity	162
Age of Menarche	164
Genitalia Maturity	165
Maturation: Interrelationship with Motor Performance	165
Summary	167
Key Terms	167
Questions for Reflection	167
Internet Resources	168
Online Learning Center	168
References	168
7 Physiological Changes: Health-Related Physical Fitness	171
Cardiovascular Fitness	172
Heart Rate	172
Stroke Volume	173
Cardiac Output	174
Maximal Oxygen Consumption	174
Physical Activity and Cardiovascular Fitness in Childhood	175
Cardiovascular Endurance Field-Test Data on Children and Adolescents	176
Physical Activity and Cardiovascular Fitness in Adulthood	177
Muscular Strength	179
Defining and Measuring Muscular Strength	180
Age-Related Changes in Muscular Strength: Laboratory Tests	180
Age-Related Changes in Muscular Strength/Endurance: Field Tests	181
Muscular Strength Training	182
Mechanisms of Increasing Muscular Strength	188

Flexibility	189
Flexibility: Performance Trends	191
Declining Flexibility and Aging: Causes and Therapy	191
Body Composition	192
Defining Overweight and Obese	192
General Growth Trends of Adipose Tissue	193
Prevalence of Overweight and Obesity	193
Association Between Childhood and Adulthood Obesity	196
Laboratory-Test Measures of Body Composition	197
Field-Test Measures of Body Composition	198
Relationship of Obesity to Motor Development and Performance	202
Treatment of Overweight and Obesity	202
Gender Differences in Health-Related Physical Fitness	204
Factors Associated with Physiological Fitness	204
Points of Controversy and Concern	204
Summary	205
Key Terms	206
Questions for Reflection	206
Internet Resources	207
Online Learning Center	207
References	207

8 Movement and the Changing Senses 212

Understanding the Mechanics of Vision	213
Physical Development of the Eye	213
Development of Selected Visual Traits and Skilled Motor Performance	214
Visual Acuity	214
Binocular Vision and Depth Perception	218
Field of Vision	222
Effects of Aging on Depth Perception and Field of Vision	223
Eye Dominance	223
Tracking and Object Interception	224
Motor Development of Children with Visual Impairments	225
Head and Trunk Control	226
Independent Sitting	226
Creeping	226
Independent Walking	226
Prehension	226
Play Behavior of Children with Visual Impairments	227

The Nonvisual Senses	228
The Proprioceptive System	228
The Auditory System	229
The Cutaneous System	230

<i>Summary</i>	231
----------------	-----

<i>Key Terms</i>	232
------------------	-----

<i>Questions for Reflection</i>	232
---------------------------------	-----

<i>Internet Resources</i>	233

PART IV Movement Across the Lifespan

9 Infant Reflexes and Stereotypes 235

Importance of the Infant Reflexes	236
Infant Versus Lifespan Reflexes	236
Role of the Reflexes in Survival	237
Role of the Reflexes in Developing Future Movement	238
The Reflexes as Diagnostic Tools	239

Pinpointing the Number of Infant Reflexes	241
---	-----

Primitive Reflexes	241
--------------------	-----

Palmar Grasp Reflex	241
---------------------	-----

Sucking Reflex	242
----------------	-----

Search Reflex	243
---------------	-----

Moro Reflex	243
-------------	-----

Startle Reflex	244
----------------	-----

Asymmetric Tonic Neck Reflex	244
------------------------------	-----

Symmetric Tonic Neck Reflex	245
-----------------------------	-----

Plantar Grasp Reflex	246
----------------------	-----

Babinski Reflex	246
-----------------	-----

Palmar Mandibular Reflex	246
--------------------------	-----

Palmar Mental Reflex	247
----------------------	-----

Postural Reflexes	248
-------------------	-----

Stepping Reflex	248
-----------------	-----

Crawling Reflex	249
-----------------	-----

Swimming Reflex	249
-----------------	-----

Head- and Body-Righting Reflexes	249
----------------------------------	-----

Parachuting Reflexes	251
----------------------	-----

Labyrinthine Reflex	251
---------------------	-----

Pull-Up Reflex	251
----------------	-----

	Stereotypies	252
	Summary	255
	Key Terms	255
	Questions for Reflection	255
	Online Learning Center	255
	References	256
10	Voluntary Movements of Infancy	257
	Categorizing the Voluntary Movements of Infancy	258
	Head Control	258
	Body Control	260
	Prone Locomotion	263
	Upright Locomotion	264
	Reaching, Grasping, and Releasing	267
	Anticipation and Object Control in Reaching and Grasping	270
	Bimanual Control	271
	Summary	273
	Key Terms	273
	Questions for Reflection	273
	Online Learning Center	274
	References	274
11	Fine Motor Development	275
	Assessing Fine Movement	276
	Categorizing Manipulation	276
	The Development of Prehension	278
	An Alternate View of the Development of Prehension	281
	Exploratory Procedures and Haptic Perception	283
	Holding a Writing Implement	285
	Cross-Cultural Comparison of Development of the Dynamic Tripod	288
	The Dynamic Tripod from 6 to 14 Years	289
	Drawing and Writing: Movement Products	289
	Drawing: The Product	289
	Handwriting: The Product	292
	Finger Tapping	293
	Fine Motor Slowing in Late Adulthood	294

<i>Summary</i>	295
<i>Key Terms</i>	296
<i>Questions for Reflection</i>	296
<i>Online Learning Center</i>	297
<i>References</i>	297

12 Fundamental Locomotion Skills of Childhood 299

Walking	300
Dynamic Base	301
Foot Angle	301
Walking Speed	301
Walking with External Loads	303
Walking with and Without Shoes	303
Running	304
Selected Improvements in the Running Pattern	304
Developmental Sequences for Running	305
Developmental Performance Trends for Running	306
Jumping	310
Preparatory Phase	310
Takeoff and Flight Phases	311
Landing Phase	311
Developmental Sequences for the Standing Long Jump	312
Developmental Sequences for the Vertical Jump	312
Developmental Performance Trends for Vertical Jumping	313
A Variation of Jumping: Hopping	315
Combining Fundamental Movements: The Gallop, Slide, and Skip	316
<i>Summary</i>	324
<i>Key Terms</i>	325
<i>Questions for Reflection</i>	325
<i>Internet Resources</i>	325
<i>Online Learning Center</i>	326
<i>References</i>	326

13 Fundamental Object-Control Skills of Childhood 328

Overarm Throwing	329
Developmental Stages of Throwing	329
Developmental Performance Trends for Overarm Throwing	330
Factors That Influence Overarm Throwing Performance	334
Accounting for Gender Differences in Overarm Throwing	338
Catching	340

	Developmental Aspects: Two-Handed Catching	340
	Developmental Sequences for Two-Handed Catching	341
	Developmental Aspects: One-Handed Catching	344
	Factors That Influence Catching Performance	345
	Striking	348
	Developmental Aspects of One- and Two-Handed Striking	349
	Stationary Ball Bouncing	351
	Kicking	352
	Punting	355
	Summary	357
	Key Terms	358
	Questions for Reflection	358
	Online Learning Center	358
	References	358
14	Youth Sports	362
	Where Children Participate in Sports	365
	Why Children Participate in Sports	366
	<u>Participation: Competence Motivation Theory</u>	<u>367</u>
	Why Children Drop Out of Sports	368
	Sport Participation: Controversies	369
	Medical Issues	369
	Psychological Issues	378
	Youth Sport Coaching	380
	Who's Coaching Our Children?	381
	An Increasing Need for Educating Coaches	381
	Current Coaching Certification Programs	382
	Arguments Against Mandatory Coaching Certification	382
	Evaluating Coaching Effectiveness	383
	Guidelines for Effective Coaching	383
	Parental Education: An Attempt to Curb Violence	383
	Rights of Young Athletes	384
	Youth Sports: Recommendations for the 21st Century	387
	Summary	387
	Key Terms	387

15 Movement in Adulthood 392

The Shift to a Lifespan Approach to Motor Development 393

Balance and Postural Sway 395

Falls 398

Causes of Falls 399

Strategies to Avoid Falls Among the Elderly 401

Walking Patterns of Adulthood 402

Driving and Older Age 404

Adult Performance on Selected Motor Activities 406

Activities of Daily Living 407

Age of Peak Proficiency 408

Adult Performance During High Arousal 409

Movement Speed in Adulthood 411

Running Speed 411

Reaction and Response Time 412

Is a Movement Decline Inevitable with Age? 414

Compensation for the Movement Decline 414

Effects of Exercise on the Movement Decline 415

Effects of Practice on the Movement Decline 417

Physical Activity Trends in Adulthood 418

Sports-Related Injuries to Baby Boomers and Older Adults 419

Teaching Movement Skill to the Older Adult 420

The World Health Organization Heidelberg Guidelines 422

Summary 424*Key Terms* 425*Questions for Reflection* 426*Internet Resources* 426*Online Learning Center* 426*References* 426**PART V Assessing Motor Development and Implementing a Program****16 Assessment 429**

Guidelines for Assessment 430

Why Assess? 430

What Variables to Assess 430

Selecting the Best Test 430

Preparing Students for Assessment 431

Instructor Preparation and Data Collection	432
Interpreting the Assessment Data	432
Formal Versus Informal Assessment	434
Sharing Assessment Results	434
Types of Assessment Instruments	434
Norm-Referenced	435
Criterion-Referenced	435
Product-Oriented Assessment	435
Product- Versus Process-Oriented Assessment: A Comparative Example	435
Product-Oriented Assessment	436
Process-Oriented Assessment	436
Selected Norm-Referenced Instruments	437
Bayley Scales of Infant and Toddler Development III	437
Bruininks-Oseretsky Test of Motor Proficiency	437
Basic Motor Ability Test-Revised	437
Denver II	438
Selected Process-Oriented Assessment Instruments	440
