

Chapter 1 Limits 1

1.1	Introduction	1
1.2	Variables and functions	6
1.3	Limits and functions	17
1.4	Rate of change	24
1.5	Limits and continuity	34
1.6	Tangents and derivatives	44
1.7	Sequences	49
1.8	Series	53
1.9	Area	58
1.10	Integration	66
1.11	Continuity and approximate methods	72
1.12	Units and dimensions	84

Chapter 2 Differentiation 89

2.1	The derivative	89
2.2	Formulas for differentiation	96
2.3	Higher derivatives: stationary points	103
2.4	Applications: rates and differentials	115
2.5	Applications: maxima and minima	127
2.6	Implicit and inverse functions	139
2.7	The mean-value theorem	150
2.8	The exponential function	161
2.9	Logarithms	172
2.10	Numerical methods	181
2.11	Integration and other matters	194

Chapter 3 Integration 201

3.1	The integral	201
3.2	Fundamental theorem	216
3.3	Techniques of integration: I	227

3.4	Techniques of integration: II	236
3.5	Techniques of integration: III	246
3.6	Area and arc length	258
3.7	Volumes and surfaces of revolution	269
3.8	Physical applications	279
3.9	Improper integrals	288
3.10	Approximate methods	297
3.11	Special techniques	308

Chapter 4 Series 321

4.1	Fundamentals	321
4.2	Convergence tests	330
4.3	Taylor series	340
4.4	Applications: calculations	353
4.5	Asymptotic series	366
4.6	Symbolic methods	372
4.7	Numerical formulas	381
4.8	Differential equations	388

Chapter 5 Vectors 403

5.1	Basic concepts	403
5.2	Differentiation of vectors	413
5.3	Scalar products	420
5.4	Vector products	425
5.5	Higher-order products	435
5.6	Geometrical applications	443
5.7	Properties of curves	451
5.8	Planetary motion	466

Chapter 6 Partial Differentiation 479

6.1	Preliminaries	479
6.2	Partial derivatives	488
6.3	Increments and differentials	495
6.4	Directional derivatives and the gradient	506
6.5	The chain rule	514
6.6	Functions with parameters	524
6.7	Implicit functions	537
6.8	Taylor's formula and approximate methods	544
6.9	Maxima and minima problems	552
6.10	Numerical methods	573

Chapter 7 Multiple Integrals 585

7.1	Double integrals; iterated integrals	585
7.2	Polar coordinates and change of variables	598
7.3	Triple integrals	610
7.4	Surface integrals	625
7.5	Applications	639
7.6	Approximate methods	652

Chapter 8 Vector Calculus 665

8.1	Vector fields	665
8.2	Line integrals	675
8.3	Vector operators	687
8.4	Vector identities	700
8.5	The divergence theorem	711
8.6	The theorems of Green and Stokes	724
8.7	Fluid motion	736

Appendix 743

A.1	Some algebraic formulas	743
A.2	Determinants	744
A.3	Some trigonometric formulas	745
A.4	Analytic geometry	747
A.5	Integrals	748
A.6	Vector formulas	752

Answers to Odd-numbered Exercises 755
