Introduction xii

## **Part 1** Know your brain 3

**1** Your brain is better than you think 5

**2** Get inside your head 15

**3** IQ and your natural brilliance 27

## **Part 2** Harness your brain power 39

**4** Transform your ability to recall and learn information 41

**5** Master mnemonics to double your memory and more 59

**6** Energy 'plus' and 'into' memory yields infinite creativity:  
 $E + M = C^{\infty}$  77

## **Part 3** The essential 'mind tools' for great brains 91

**7** Why key words are so important 93

**8** Introducing Mind Maps and Radiant Thinking 109

**9** How to create a Mind Map 123

**10** Speed read to save days, weeks, even months of your time 139

**11** The incredible power of 'super' speed reading 151

**12** Revolutionise your study skills with the Buzan Organic Study  
Technique (BOST) 161

Conclusion: Thinking for the future 191

Appendix: Online resources 198
