

# Content

Application of lysimeters in agricultural water management..... 5

Modern approaches to groundwater analysis results ..... 22

Evaluation of the system for improvement of microclimate in a greenhouse ..... 27

Possible threats to groundwater through executing Skalička Dam  
located near Hranice Karst and Hranice Abyss ..... 35

Climate change at local level on the base of the air temperature and precipitation  
data of the weather station of Karcag..... 43

Influence of seepage of water from domestic  
waste water treatment plants on groundwater ..... 50

Identification of spatial variability of moisture and soil compaction ..... 54

New techniques in agricultural water management..... 69

Irrigation of potatoes and its impact of infiltration ..... 80

The use of soil conditioner and its effect on soil  
physico-mechanical and hydraulic properties ..... 88

Effect of seed position on the utilization water in the soil ..... 100

Impacts of soil activators applications on basic soil conditions and water regime in soil ..... 107

Impact of post-industrial landfills on the quality of the Wilga River in Krakow ..... 133

Selected elements of water management in facilities  
under cover with cultivation of plants on an inert substrate ..... 139

Designation of optimal location for the construction  
of an agricultural biogas plant using spatial information systems..... 156
