

# Foreword

**Mapping and Atlas Skills** is a series of three copymasters focusing on those specific mapping skills required in the classroom, with particular reference to the learning areas of geography and mathematics.

Once learnt, these classroom skills inevitably will flow over into a wide range of 'life skills' and will prove invaluable to the pupils outside the classroom.

The activities in this series concentrate on two basic skills:

- the accurate identification of known and unknown locations
- the provision of accurate instructions to others.

Other titles in this series include:

0592 *Mapping and Atlas Skills* – Middle

0593 *Mapping and Atlas Skills* – Upper
