

ABSTRACTS - TABLE OF CONTENTS

ORAL PRESENTATIONS

2

- S1-1_I Gene Electrotransfer as an Effective Approach to Deliver Plasmids Encoding Immune Modulators for Treatment of Melanoma**

R. Heller, Ch. Edelblute, C. M. Lundberg, S. Arpag-McIntosh, G. Shi

3

- S1-2_I Calcium Electroporation: Preclinical and Clinical Results, with a Look towards Future Perspectives**

J. Gehl

4

- S2-1_I Monitoring the Membrane Permeabilization and Molecular Composition of Live Cells Exposed to Pulsed Electric Fields based on Terahertz Measurements**

L. M. Mir, A. Azan, M. Grognot, T. Garcia-Sanchez, G. Gallot

5

- S2-2_O ZBP1/DAI, a DNA-Specific Pattern Recognition Receptor, Binds Plasmid DNA Directly After Electroporation**

N. Semenova, M. Bosnjak, K. Znidar, M. Cemazar, L. Heller

6

- S2-3_O How Imaging Membrane and Cell Processes Involved in Electroporation Can Improve Its Development in Cell Biology and in Clinics**

G. Gasc, L. Gibot, M. Golzio, J. Kolosnjaj-Tabi, M.-P. Rols

7

- S2-4_O Activation of Voltage-Gated Calcium Channels by Uni- and Bipolar 300-ns Pulses**

O. Pakhomova, K. Hristov, U. Mangalanathan, M. Casciola, A. G. Pakhomov

8

- S2-5_O Optical Recording of Action Potentials in E18 Hippocampal Neurons Exposed to Ultrashort Pulsed Electric Fields**

I. Semenov, S. Xiao, A. G. Pakhomov

9

- S3-1_I Nanoscale Transport through Permeabilizing Structures in Electrically Stressed Cell Membranes**

P. Th. Vernier, E. B. Sözer, F. Castellani, M. L. Fernandez, M. R. Risk

10

- S3-2_I Bipolar Cancellation under "Classical" Electroporation**

E. Hilgarth, A. Simeon, J. Teissie

11

- S3-3_O Intense Electric Field Affects C-Terminus of Tubulin: Molecular Dynamics Simulation Study**

M. Cifra, P. Marracino, A. Grosso, D. Havelka, J. Prusa, A. T. Ayoub, J. Tuszyński, M. Liberti, F. Apollonio

12

- S3-4_O Microsecond Kinetics of Ion Transport and Membrane Interface Binding Before, During, and After Lipid Electropore Formation**

F. Castellani, E. B. Sözer, P. Th. Vernier

13

- S3-5_O Endothelial Cell-To-Cell Junctions Alteration and Repair Are Responsible for Transient Permeability of Blood Vessels after Reversible Electroporation**

E. Bellard, B. Markelc, T. Jesenko, S. Pelofy, G. Sersa, J. Teissie, R. Frangez, M.-P. Rols, M. Cemazar, M. Golzio

14

- S3-6_O CellDesigner as a Tool for the Analysis of the Kinetics of Pore Formation and Disappearance during Cell Electroporation**

G. Saulis, Z. Saukevičius, R. Saule

15

- S4-1_I Second Phase Amplitude Determines the Efficiency of Electroporation by Bipolar Nanosecond Pulses**

A. G. Pakhomov, S. Grigoryev, I. Semenov, M. Casciola, Ch. Jiang, S. Xiao

16

S4-2_I	Some Predictive Factors for the Response of Tumors to Electrochemotherapy: Preclinical Studies <i>G. Sersa, M. Niksic Zakelj, S. Kranjc, A. Groselj, M. Bosnjak, A. Prevc, M. Krzan, T. Kosjek, J. Scanca, P. Stojan, T. Jesenko, L. Prosen, T. Potocnik, V. Todorovic, M. Savarin, B. Groselj, M. Cemazar</i>	17
S5-1_I	Detecting the Changes in Gene Expression in Murine Melanoma Tumors Treated With Nano-Pulse Stimulation (NPS) Using NanoString Technology <i>R. Nuccitelli, A. McDaniel</i>	18
S5-2_O	Electrochemotherapy of Porcine Liver: Assessment of Systemic and Local Side Effects <i>J. Zmuc, G. Gasljevic, N. Boc, I. Edhemovic, E. Breclj, A. Seliskar, T. Plavec, B. Kos, G. Sersa, M. Snoj, M. Brloznik, N. Milevoj, T. Jarm, D. Miklavcic, J. Izlakar, M. Bosnjak, J. Plut, M. Stukelj, M. Cemazar</i>	19
S5-3_O	Lipid Composition of the Plasma Membrane and Calcium Electroporation Efficacy <i>K.L. Hoejholt, T. Muzic, M. Bilgin, J. Nylandsted, T. Heimborg, S. K. Frandsen, J. Gehl</i>	20
S5-4_O	Mechanisms of NanoPulse Stimulation-Induced Immunity in Hepatocellular Carcinoma and Mammary Cancer <i>S. J. Beebe, B. P. Lassiter, S. Guo</i>	21
S5-5_O	Mechanisms and Immunogenicity of nsPEF-Induced Cell Death in B16F10 Melanoma Tumors <i>C. Muratori, A. Rossi, S. Weygandt, A. A. Bulysheva, L. E. Murray, A. G. Pakhomov, O. Pakhomova</i>	22
S5-6_O	Combination of Pulsed Electric Fields and Cold Atmospheric Plasma for Cancer Treatment <i>Ch. M. Wolff, A. Steuer, Th. von Woedtke, S. Bekeschus, J. F. Kolb</i>	23
S6-1_O	In Situ Tumor Vaccination by TNFα Combined With Immune Boost by IL-12 Using Concomitant Intratumoral Gene Electrotransfer <i>U. Kamensek, M. Cemazar, U. Lamprecht Tratar, K. Ursic, M. Bosnjak, G. Sersa</i>	24
S6-2_O	Structural Change of Multimer Proteins Exposed to 300 kV/cm Electrical Pulses <i>G. Urabe, T. Katagiri, N. Ohnishi, S. Katsuki</i>	25
S6-3_O	"Cancellation of Cancellation" (CANCAN) - Remote Electroporation by Nanosecond Bipolar Electric Pulses <i>E. C. Gianulis, M. Casciola, C. Zho, E. Yang, S. Xiao, A. G. Pakhomov</i>	26
S6-4_O	Electroporative Membrane Depolarization as a Mechanism for nsPEF-Induced Voltage-Gated Calcium Channel Opening <i>K. Hristov, U. Mangalanathan, M. Casciola, O. Pakhomova, A. G. Pakhomov</i>	27
S6-5_O	Observations of Transport and Cancellation of Transport into Electrically Stressed Cells Defy "The Standard Model" <i>E. B. Sözer, P. Th. Vernier</i>	28
S6-6_O	Long-Term Development of Cardiac Lesions Created with Nanosecond Pulsed Electric Fields in a Preclinical Pig Survival Model <i>Ch. W. Zemlin, J. U. Neuber, F. Varghese, J. Etheridge, E. Shih, J. M. Philpott</i>	29
S6-7_O	Mitochondrial Ca²⁺ Uptake after the Exposure to a Single Microsecond Pulse <i>N. Ohnishi, Y. Fujiwara, T. Kamezaki, S. Okamoto, S. Katsuki</i>	30
S7-1_O	Improvement in Electrotransfection of CHO Cells by Varying the Plasmid Concentration <i>S. Chopra, P. Ruzgys, D. Navickaite, S. Satkauskas</i>	31
S7-2_O	Monopolar Electrotransfer Enhances Gene Delivery in Vivo	

	<i>A. Bulysheva, L. Heller, M. Francis, Ch. Edelblute, C. Lundberg, F. Varghese, S. Arpag-McIntosh, R. Heller</i>	32
S7-3_O	The Effect of Calcium Ions Delivered by Electroporation on ATP Consumption and Cell Viability of Breast Adenocarcinoma Cell Lines <i>K. Biezunska-Kusiak, O. Michel, A. Szewczyk, J. Kulbacka, J. Saczko</i>	33
S7-4_O	Nanoelectropulse Delivery for Cell Membrane Perturbation and Oxidation <i>J. Kulbacka, A. Szewczyk, A. Choromanska, N. Rembialkowska, O. Michel, M. Kulbacki, A. Sikora, J. Saczko</i>	34
S8-1_I	Progress on Bioelectrics Activities in Microalgae Processing and in Bacterial Decontamination at KIT <i>W. Frey, S. Akaberi, Ch. Gusbeth, I. Papachristou, M. Sack, D. Scherer, A. Silve, R. Straessner</i>	35
S8-2_I	Non-thermal Plasmas for Pre- and Post-harvest Processing of Seeds and Crops <i>J. F. Kolb, H. Brust, N. Wannicke, Th. Nishime, K. Zocher, J. Ehlbeck, U. Schnabel, Th. von Woedtke, K.-D. Weltmann</i>	36
S9-1_I	Study of Adherent Cell Permeabilization in Various Plasma Gun Plasma Delivery Protocols <i>V. Vijayarangan, A. Delalande, S. Dozias, J.-M. Pouvesle, C. Pichon, E. Robert</i>	37
S9-2_O	Flexible (Sub-)Nanosecond High-Voltage Pulse Generation <i>A. J. M. Pemen, T. Huiskamp, W. F. L. M. Hoebe</i>	38
S9-3_O	Label-Free Endogenous Chemiluminescence for Probing Oxidative Effects of Electric Pulses <i>M. Cifra, D. Havelka, D. E. Chafai, L. M. Mir</i>	39
S9-4_O	Electropermeabilization and Electrostimulation by Picosecond Pulses <i>S. Xiao, X. Zou, R. Petrella, E. Yang, K. Huynh, R. Yamada</i>	40
S9-5_O	Impulsive Acceleration for Needle-Free Drug/Vaccine Delivery <i>H. Hosano, V. Menezes, N. Hosano</i>	41
S10-1_O	Impact of Membrane Recovery of Gram-positive and Gram-negative Bacteria on the Inactivation Efficiency of Pulsed Electric Field Treatment <i>Ch. Gusbeth, S. Watanabe, W. Frey, G. Müller</i>	42
S10-2_O	Pulsed Electric Field (PEF) Assisted Protein Recovery from Microalgae Biomass for Food and Feed Applications <i>D. Scherer, Ch. Gusbeth, W. Frey, G. Müller, P. Nick</i>	43
S10-3_O	Cell Wall Rupture of Microalgae for the Extraction of Metabolites by Applying Spark Discharges Effects and Mechanism <i>K. Zocher, R. Rataj, J.-W. Lackmann, J. F. Kolb</i>	44
S10-4_O	Microbial Inactivation Using Moderated Intensity PEF at Industrial Scale <i>D. Rego, A. C. Ribeiro, C. A. Pinto, J. A. Saraiva, L. Redondo, M. Pereira</i>	45
S10-5_O	Effect of Frequency in Extraction of the Yeast-Derived Lactase Using Burst Pulse High Electric Field <i>Y. Minamitani, S. Saito, T. Sugiura</i>	46
S10-6_O	Enhancement of Vitality and Activity of a Plant Growth-Promoting Bacteria (PGPB) by Atmospheric Pressure Non-Thermal Plasma <i>S.-H. Ji, J.-S. Kim, C.-H. Lee, H.-S. Seo, S.-C. Chun, J. Oh, E.-H. Choi, G. Park</i>	47

POSTER PRESENTATIONS

48

Topic 1 – Biological Responses (Molecular, Subcellular, Cellular and Intercellular)

- P01 **Investigation of Superiority for Impact of High Power Burst Pulse to Cancer Cells as Against Single Pulse**
H. Sato, Y. Minamitani, N. Ohnishi, Y. Fujiwara, S. Katsuki 49
- P02 **The Dependence of Cell Electroporation Efficiency on the Electroporation Medium Conductivity**
M. Jakutaviciute, P. Ruzgys, S. Satkauskas 50
- P03 **Calcium Delivery via Electroporation Significantly Enhances Cell Death in Vitro**
D. Navickaite, M. Maciulevicius, S. Chopra, S. Satkauskas 51
- P04 **Intracellular Distribution of Reactive Oxygen Species After Nanosecond Electrical Stimulation**
I. Semenov, E. B. Sözer, P. Th. Vernier 52
- P05 **Electroporation of Nucleic Acid in Human Adherent Cells**
G. Alberola-Garcia, M.-P. Rols 53
- P06 **Pyroptosis is Elicited after pDNA Electroporation in Murine Keratinocytes**
M. Bosnjak, K. Znidar, L. C. Heller, M. Cemazar 54

Topic 2 – Biophysics and Biochemistry of Interaction Mechanisms

- P07 **Influence of Iron Ions and Hydrogen Peroxide on the Fluorescence of Amplex Red Dye Quenching and CHO cells Viability**
R. Rodaite-Riseviciene, K. Rastauskaite, L. Zelencova-Hamarat, V. Dainauskaite, A. Nekrosius, G. Saulis 55

Topic 4 – Diagnostics, Analytics, Experimental Techniques

- P08 **A Pilot Study Of Non-Invasive Intracranial Pressure Monitoring**
Y. Hamarat, M. Deimantavicius, R. Zakelis, L. Bartusis, A. Preiksaitis, A. Ragauskas 56

Topic 5 – Exposure Devices and Methods

- P09 **High-Voltage Nanosecond Bipolar Pulse Generator with Delayed Positive or Negative Polarity**
P. Leveque, V. Couderc, D. Amaud-Cormos 57
- P10 **Nanosecond Pulse Electric Field Chip Compatible With Super-Resolution Microscope**
D. Havelka, O. Krivosudsky, D. E. Chafai, M. Cifra 58
- P11 **Study on Shock Wave Generation Using Pulsed Power for Medical and Biological Applications**
M. Sato, H. Hosano, T. Yamashita, K. Takaura, N. Hosano, T. Sakugawa 59
- P12 **Spark Discharge Impedance Matching for Shock Wave Lithotripsy**
P. Hoffer, V. Stelmashuk, J. Straus, K. Kolacek 60

Topic 6 – Cancer Treatment and Tumor Ablation

- P13 **Interleukin-12 Gene Electroporation Complements the Anti-Cancer Response of Intratumoral Electrochemotherapy in Murine Melanoma**
K. Ursic, S. Kos, U. Kamensek, M. Cemazar, G. Sersa 61

P14	Treatment of Canine Oral Malignant Melanoma by Gene Electrotransfer of Canine IL-12 in Combination with Electrochemotherapy and Cytoreductive Surgery <i>U. Lamprecht Tratar, N. Milevoj, N. Tozon, A. Nemec, A. Brozic, K. Znidar, G. Sersa, M. Cemazar</i>	62
Topic 7 – Disinfection, Decontamination, Hygiene		
P15	Low-Energy Pulsed Electron Beams Inactivate Pathogens by Generating Breaks on DNA <i>Ch. Da Silva, C. Lamarche, G. Demol, M.-P. Rols, F. Pillet</i>	63
Topic 10 – Food Safety and Food Preservation		
P16	The Synergetic Inactivation of Direct Effects and Indirect Effects on Micro-organism Inactivation by Non-Thermal Plasma <i>E. J. Hong, J. Lim, Y.-S. Byeon, S. Ryu, S. B. Kim</i>	64
P17	Saline Wastewater Treatment Test at Pilot-Scale Using Underwater Capillary Discharge Device <i>Y.-S. Byeon, E. J. Hong, J. Lim, H.-G. Lee, J. Park, M.-A. Lee, S. Ryu, S. B. Kim</i>	65
P18	Efficient Liquid Pasteurization Using PEF Combined with Mild Thermal Energy <i>S. Watanabe, T. Kajiwara, K. Katano, S. Katsuki</i>	66
P19	Demonstration Experiment for the System Developed for Non-Thermal Sterilization without Impacting to Enzyme in Vegetable Drink by Pulsed Electric Field <i>K. Saito, Y. Minamitani, H. Fukata</i>	67
P20	Possibility of Sterilizing Stacked Pieces in Packaged Foods Sterilization Using Pulsed Plasma <i>D. Tsutsuji, K. Saito, Y. Minamitani</i>	68
