
TABLE OF CONTENTS

A deterministic matrix model for handling the birth, death, and migration processes of spatially distributed populations M. B. Usher and M. H. Williamson	1
The effects of trap response on tag recapture estimatesG. A. F. Seber	13
Discrimination between regression models to determine the pattern of enzyme synthesis in synchronous cell culturesD. A. Williams	23
A generalized probability distribution for couple fertility S. N. Singh and B. N. Bhattacharya	33
Effects of selection and drift on the dynamics of finite populations. I. Ultimate probability of fixation of a favorable allele R. N. Carr and R. F. Nassar	41
Approximating the selection processD. A. Harville	51
Restriction of selection indexes E. P. Cunningham, R. A. Moen and T. Gjedrem	67
Estimation of relative risk from individually matched series..O. S. Miettinen	75
Estimating the distribution of spherical and elliptical bodies in conglomerates from plane sectionsG. M. Tallis	87
The use of non-parametric methods in the statistical analysis of a complex split plot experimentG. G. Koch	105
A locally most powerful test for the symmetric folded binomial distribution J. J. Gart	129
Queries	
Multiple comparison testsC. W. Dunnett	139
Multiple comparison methods for comparing regression coefficientsD. B. Duncan	141
Notes	
Simple comparisons of simultaneous regression lines...Barry W. Brown	143
The discrete Poisson-Lindley distributionM. Sankaran	145
On standard errors for estimates of fitnessJ. L. Gill	149
Treatment sequences balanced for the linear component of residual effectsI. I. Berenblut	154
A fraction of the 4^3 factorial design for estimating main effects P. W. M. John	157
Obituary: Jerome C. R. Li	161
Book Reviews	162
Abstracts	166
The Biometric Society	170
News and Announcements	175
