Contents

Preface xiii

CHAPTER ONE

Introduction 1

- 1A Classification of Analytical Methods 1
- 1B Types of Instrumental Methods 2
- 1C Instruments for Analysis 3
- 1D Calibration of Instrumental Methods 11
- 1E Selecting an Analytical Method 17
- Questions and Problems 22

SECTION ONE

Measurement Basics 25

CHAPTER TWO

Electrical Components and Circuits 26

- 2A Direct-Current Circuits and Measurements 26
- 2B Alternating Current Circuits 32
- 2C Semiconductors and Semiconductor Devices 43
- 2D Power Supplies and Regulators 49
- 2E Readout Devices 51
- Questions and Problems 54

CHAPTER THREE

Operational Amplifiers in Chemical Instrumentation 59

- 3A Properties of Operational Amplifiers 59
- 3B Operational Amplifier Circuits 62
- 3C Amplification and Measurement of Transducer Signals 65
- 3D Application of Operational Amplifiers to Voltage and Current Control 70
- 3E Application of Operational Amplifiers to Mathematical Operations 71

- 3F Applications of Operational Amplifiers to Comparison 74
- Questions and Problems 74

CHAPTER FOUR

Digital Electronics and Computers 80

- 4A Analog and Digital Signals 81
- 4B Counting and Arithmetic with Binary Numbers 81
- 4C Basic Digital Circuits 83
- 4D Computers and Computerized Instruments 90
- 4E Components of a Computer 92
- 4F Computer Software 95
- 4G Applications of Computers 103
- 4H Computer Networks 104
- Questions and Problems 108

CHAPTER FIVE

Signals and Noise 110

- 5A The Signal-to-Noise Ratio 110
- 5B Sources of Noise in Instrumental Analyses 111
- 5C Signal-to-Noise Enhancement 113
- Questions and Problems 124
- Instrumental Analysis in Action—
The Electronic Analytical Laboratory 127

SECTION TWO

Atomic Spectroscopy 131

CHAPTER SIX

An Introduction to Spectrometric Methods 132

- 6A General Properties of Electromagnetic Radiation 132
- 6B Wave Properties of Electromagnetic Radiation 133

- 6C Quantum-Mechanical Properties of Radiation 144
- 6D Quantitative Aspects of Spectrochemical Measurements 157
- Questions and Problems 159

CHAPTER SEVEN**Components of Optical Instruments 164**

- 7A General Designs of Optical Instruments 164
- 7B Sources of Radiation 166
- 7C Wavelength Selectors 175
- 7D Sample Containers 190
- 7E Radiation Transducers 191
- 7F Signal Processors and Readouts 202
- 7G Fiber Optics 202
- 7H Types of Optical Instruments 203
- 7I Principles of Fourier Transform Optical Measurements 204
- Questions and Problems 212

CHAPTER EIGHT**An Introduction to Optical Atomic Spectrometry 215**

- 8A Optical Atomic Spectra 215
- 8B Atomization Methods 223
- 8C Sample-Introduction Methods 223
- Questions and Problems 228

CHAPTER NINE**Atomic Absorption and Atomic Fluorescence Spectrometry 230**

- 9A Sample Atomization Techniques 230
- 9B Atomic Absorption Instrumentation 237
- 9C Interferences in Atomic Absorption Spectroscopy 241
- 9D Atomic Absorption Analytical Techniques 247
- 9E Atomic Fluorescence Spectroscopy 249
- Questions and Problems 250

CHAPTER TEN**Atomic Emission Spectrometry 254**

- 10A Emission Spectroscopy Based on Plasma Sources 255
- 10B Emission Spectroscopy Based on Arc and Spark Sources 269
- 10C Miscellaneous Sources for Optical Emission Spectroscopy 273
- Questions and Problems 276

CHAPTER ELEVEN**Atomic Mass Spectrometry 281**

- 11A Some General Features of Atomic Mass Spectrometry 281
- 11B Mass Spectrometers 283
- 11C Inductively Coupled Plasma Mass Spectrometry 291
- 11D Spark Source Mass Spectrometry 299
- 11E Glow Discharge Mass Spectrometry 300
- 11F Other Mass Spectrometric Methods 301
- Questions and Problems 301

CHAPTER TWELVE**Atomic X-ray Spectrometry 303**

- 12A Fundamental Principles 303
- 12B Instrument Components 310
- 12C X-ray Fluorescence Methods 317
- 12D X-ray Absorption Methods 325
- 12E The Electron Microprobe 328
- Questions and Problems 328

Instrumental Analysis in Action—**Monitoring Mercury 332****SECTION THREE****Molecular Spectroscopy 335****CHAPTER THIRTEEN****An Introduction to Ultraviolet-Visible Molecular Absorption Spectrometry 336**

- 13A Measurement of Transmittance and Absorbance 336
- 13B Beer's Law 337
- 13C The Effects of Instrumental Noise on Spectrophotometric Analyses 343
- 13D Instrumentation 348
- Questions and Problems 362

CHAPTER FOURTEEN**Applications of Ultraviolet-Visible Molecular Absorption Spectrometry 367**

- 14A The Magnitude of Molar Absorptivities 367
- 14B Absorbing Species 367
- 14C Qualitative Applications of Ultraviolet-Visible Absorption Spectroscopy 372

- 14D Quantitative Analysis by Absorption Measurements 374
- 14E Photometric and Spectrophotometric Titrations 379
- 14F Spectrophotometric Kinetic Methods 381
- 14G Spectrophotometric Studies of Complex Ions 384
- Questions and Problems 390

CHAPTER FIFTEEN

Molecular Luminescence Spectrometry 399

- 15A Theory of Fluorescence and Phosphorescence 400
- 15B Instruments for Measuring Fluorescence and Phosphorescence 411
- 15C Applications of Photoluminescence Methods 418
- 15D Chemiluminescence 422
- Questions and Problems 426

CHAPTER SIXTEEN

An Introduction to Infrared Spectrometry 430

- 16A Theory of IR Absorption Spectrometry 431
- 16B IR Instrumentation 438
- 16C IR Sources and Transducers 449
- Questions and Problems 452

CHAPTER SEVENTEEN

Applications of Infrared Spectrometry 455

- 17A Mid-IR Absorption Spectrometry 455
- 17B Mid-IR Reflection Spectrometry 469
- 17C Photoacoustic IR Spectroscopy 472
- 17D Near-IR Spectroscopy 473
- 17E Far-IR Spectroscopy 476
- 17F IR Emission Spectroscopy 476
- 17G IR Microscopy 477
- Questions and Problems 477

CHAPTER EIGHTEEN

Raman Spectroscopy 481

- 18A Theory of Raman Spectroscopy 481
- 18B Instrumentation 487
- 18C Applications of Raman Spectroscopy 492

- 18D Other Types of Raman Spectroscopy 493
- Questions and Problems 495

CHAPTER NINETEEN

Nuclear Magnetic Resonance Spectroscopy 498

- 19A Theory of NMR 499
- 19B Environmental Effects on NMR Spectra 510
- 19C NMR Spectrometers 521
- 19D Applications of Proton NMR 526
- 19E Carbon-13 NMR 529
- 19F Application of NMR to Other Nuclei 533
- 19G Multiple Pulse and Multidimensional NMR 534
- 19H Magnetic Resonance Imaging 537
- Questions and Problems 542

CHAPTER TWENTY

Molecular Mass Spectrometry 550

- 20A Molecular Mass Spectra 551
- 20B Ion Sources 551
- 20C Mass Spectrometers 563
- 20D Applications of Molecular Mass Spectrometry 577
- 20E Quantitative Applications of Mass Spectrometry 583
- Questions and Problems 585

CHAPTER TWENTY-ONE

Surface Characterization by Spectroscopy and Microscopy 589

- 21A Introduction to the Study of Surfaces 589
- 21B Spectroscopic Surface Methods 590
- 21C Electron Spectroscopy 591
- 21D Ion Spectroscopic Techniques 602
- 21E Surface Photon Spectroscopic Methods 604
- 21F Electron-Stimulated Microanalysis Methods 607
- 21G Scanning Probe Microscopes 613
- Questions and Problems 622

Instrumental Analysis in Action—

Assessing the Authenticity of the Vinland Map: Surface Analysis in the Service of History, Art, and Forensics 624

SECTION FOUR

Electroanalytical Chemistry 627

CHAPTER TWENTY-TWO

An Introduction to Electroanalytical Chemistry 628

- 22A Electrochemical Cells 628
- 22B Potentials in Electroanalytical Cells 633
- 22C Electrode Potentials 635
- 22D Calculation of Cell Potentials from Electrode Potentials 645
- 22E Currents in Electrochemical Cells 647
- 22F Types of Electroanalytical Methods 653
- Questions and Problems 653

CHAPTER TWENTY-THREE

Potentiometry 659

- 23A General Principles 659
- 23B Reference Electrodes 660
- 23C Metallic Indicator Electrodes 662
- 23D Membrane Indicator Electrodes 664
- 23E Ion-Selective Field-Effect Transistors 675
- 23F Molecular-Selective Electrode Systems 677
- 23G Instruments for Measuring Cell Potentials 684
- 23H Direct Potentiometric Measurements 686
- 23I Potentiometric Titrations 691
- Questions and Problems 692

CHAPTER TWENTY-FOUR

Coulometry 697

- 24A Current-Voltage Relationships during an Electrolysis 697
- 24B An Introduction to Coulometric Methods of Analysis 701
- 24C Controlled-Potential Coulometry 703
- 24D Coulometric Titrations 707
- Questions and Problems 712

CHAPTER TWENTY-FIVE

Voltammetry 716

- 25A Excitation Signals in Voltammetry 717
- 25B Voltammetric Instrumentation 718
- 25C Hydrodynamic Voltammetry 723
- 25D Cyclic Voltammetry 737

- 25E Pulse Voltammetry 742
- 25F High-Frequency and High-Speed Voltammetry 745
- 25G Applications of Voltammetry 746
- 25H Stripping Methods 748
- 25I Voltammetry with Microelectrodes 751
- Questions and Problems 753

**Instrumental Analysis in Action—
Measuring the Parts to Understand the
Whole: The Microphysiometer 757**

SECTION FIVE

Separation Methods 761

CHAPTER TWENTY-SIX

An Introduction to Chromatographic Separations 762

- 26A General Description of Chromatography 762
- 26B Migration Rates of Solutes 765
- 26C Band Broadening and Column Efficiency 768
- 26D Optimization of Column Performance 775
- 26E Summary of Chromatographic Relationships 781
- 26F Applications of Chromatography 781
- Questions and Problems 785

CHAPTER TWENTY-SEVEN

Gas Chromatography 788

- 27A Principles of GLC 788
- 27B Instruments for GLC 789
- 27C Gas Chromatographic Columns and Stationary Phases 800
- 27D Applications of GC 806
- 27E Advances in GC 808
- 27F Gas-Solid Chromatography 810
- Questions and Problems 811

CHAPTER TWENTY-EIGHT

Liquid Chromatography 816

- 28A Scope of HPLC 816
- 28B Column Efficiency in LC 817
- 28C LC Instrumentation 818
- 28D Partition Chromatography 828
- 28E Adsorption Chromatography 837
- 28F Ion Chromatography 839
- 28G Size-Exclusion Chromatography 844

- 28H Affinity Chromatography 848
 28I Thin-Layer Chromatography 848
 Questions and Problems 851

CHAPTER TWENTY-NINE

Supercritical Fluid Chromatography and Extraction 856

- 29A Properties of Supercritical Fluids 856
 29B Supercritical Fluid Chromatography 857
 29C Supercritical Fluid Extraction 862
 Questions and Problems 865

CHAPTER THIRTY

Capillary Electrophoresis, Capillary Electrochromatography, and Field-Flow Fractionation 867

- 30A An Overview of Electrophoresis 867
 30B Capillary Electrophoresis 868
 30C Applications of CE 875
 30D Packed Column Electrochromatography 883
 30E Field-Flow Fractionation 884
 Questions and Problems 888

Instrumental Analysis in Action— Discovering Acrylamide 890

SECTION SIX

Miscellaneous Methods 893

CHAPTER THIRTY-ONE

Thermal Methods 894

- 31A Thermogravimetric Analysis 894
 31B Differential Thermal Analysis 897
 31C Differential Scanning Calorimetry 900
 31D Microthermal Analysis 904
 Questions and Problems 906

CHAPTER THIRTY-TWO

Radiochemical Methods 909

- 32A Radioactive Nuclides 909
 32B Instrumentation 916

- 32C Neutron Activation Methods 918
 32D Isotope Dilution Methods 924
 Questions and Problems 925

CHAPTER THIRTY-THREE

Automated Methods of Analysis 929

- 33A Overview 929
 33B Flow Injection Analysis 931
 33C Microfluidics 940
 33D Discrete Automatic Systems 942
 Questions and Problems 948

CHAPTER THIRTY-FOUR

Particle Size Determination 950

- 34A Introduction to Particle Size Analysis 950
 34B Low-Angle Laser Light Scattering 951
 34C Dynamic Light Scattering 955
 34D Photosedimentation 958
 Questions and Problems 962

Instrumental Analysis in Action— The John Vollman Case 964

APPENDIX 1 Evaluation of Analytical Data 967

- a1A Precision and Accuracy 967
 a1B Statistical Treatment of Random Errors 971
 a1C Hypothesis Testing 983
 a1D Method of Least Squares 985
 Questions and Problems 988

APPENDIX 2 Activity Coefficients 994

- a2A Properties of Activity Coefficients 994
 a2B Experimental Evaluation of Activity Coefficients 995
 a2C The Debye-Hückel Equation 995

APPENDIX 3 Some Standard and Formal Electrode Potentials 997

APPENDIX 4 Compounds Recommended for the Preparation of Standard Solutions of Some Common Elements 1001

Answers to Selected Problems 1003

Index 1011
