About the Authors xx

## PART 1 Foundations of Health Psychology

### 1

#### Introducing Health Psychology 1

Real-World Profile of Felicia Otchet 2

The Changing Field of Health 2

Patterns of Disease and Death 2

**WOULD YOU BELIEVE . . . ? College Is Good for Your Health 7**

Escalating Cost of Medical Care 8

What Is Health? 9

IN SUMMARY 11

Psychology's Involvement in Health 11

The Contribution of Psychosomatic Medicine 12

The Emergence of Behavioral Medicine 13

The Emergence of Health Psychology 13

IN SUMMARY 14

The Profession of Health Psychology 15

The Training of Health Psychologists 15

The Work of Health Psychologists 16

IN SUMMARY 16

Answers 17

Suggested Readings 18

### 2

#### Conducting Health Research 19

**CHECK YOUR BELIEFS: About Health Research 20**

Real-World Profile of Sylvester Colligan 20

The Placebo in Treatment and Research 21

Treatment and the Placebo 21

Research and the Placebo 22

**WOULD YOU BELIEVE . . . ? Providing Ineffective Treatment May Be Considered Ethical 23**

IN SUMMARY 24

Research Methods in Psychology 24

Correlational Studies 25

Cross-Sectional and Longitudinal Studies 26

Experimental Designs 26

Ex Post Facto Designs 27

IN SUMMARY 28

Research Methods in Epidemiology 28

Observational Methods 29

Randomized, Controlled Trials 30

Natural Experiments 32

Meta-analysis 32

An Example of Epidemiological Research:

The Alameda County Study 32

**BECOMING AN INFORMED READER OF HEALTH-RELATED RESEARCH 34**

IN SUMMARY 34

Determining Causation 35

The Risk Factor Approach 35

Cigarettes and Disease: Is There a Causal Relationship? 36

IN SUMMARY 37

Research Tools 38

The Role of Theory in Research 38

The Role of Psychometrics in Research 39

IN SUMMARY 40

Answers 40

Suggested Readings 42

## 3

**Seeking Health Care 43****CHECK YOUR HEALTH RISKS 44****Real-World Profile of Jeff White 44****Adopting Health-Related Behaviors 45**

Theories of Health Protective Behaviors 45

Critique of Health-Related Theories 50

IN SUMMARY 51

**Seeking Medical Attention 52**

Illness Behavior 53

The Sick Role 58

IN SUMMARY 58

**Receiving Health Care 59**

Limited Access to Health Care 59

Choosing a Practitioner 60

The Rise of Managed Health Care 61

Being in the Hospital 62

**WOULD YOU BELIEVE . . . ? Hospitals May Be a Leading Cause of Death 63**

IN SUMMARY 65

Answers 66

Suggested Readings 67

## 4

**Adhering to Medical Advice 68****CHECK YOUR HEALTH RISKS 69****Real-World Profile of Alora Gale 69****Theories That Apply to Adherence 70**

Behavioral Theory 70

Self-Efficacy Theory 70

Theories of Reasoned Action and Planned Behavior 72

The Transtheoretical Model 72

IN SUMMARY 74

**Issues in Adherence 74**

What Is Adherence? 74

How Is Adherence Measured? 75

How Frequent Is Nonadherence? 76

IN SUMMARY 76

**What Factors Predict Adherence? 77**

Severity of the Disease 77

Treatment Characteristics 77

Personal Factors 78

Environmental Factors 80

Cultural Norms 81

Practitioner–Patient Interaction 82

Interaction of Factors 84

IN SUMMARY 84

**Improving Adherence 86**

What Are the Barriers to Adherence? 86

How Can Adherence Be Improved? 87

**WOULD YOU BELIEVE . . . ? Texting May Improve Your Health 89****BECOMING HEALTHIER 90**

IN SUMMARY 91

Answers 91

Suggested Readings 92

**PART 2 Stress, Pain, and Coping**

## 5

**Defining, Measuring,  
and Managing Stress 93****CHECK YOUR HEALTH RISKS: Undergraduate Stress Questionnaire 94****Real-World Profile of Lindsay Lohan 95****The Nervous System and the Physiology of Stress 95**

The Peripheral Nervous System 96

The Neuroendocrine System 98

Physiology of the Stress Response 99

IN SUMMARY 101

**Theories of Stress 101**

Selye's View 102

Lazarus's View 103

IN SUMMARY 105

**Measurement of Stress 106**

Methods of Measurement 106

Reliability and Validity of Stress Measures 108

IN SUMMARY 110

**Sources of Stress 111**

Cataclysmic Events 111

Life Events 112

Daily Hassles 113

IN SUMMARY 117

**Coping With Stress 117**

Personal Resources That Influence Coping 117

Personal Coping Strategies 121

**WOULD YOU BELIEVE . . . ? You May Be Able to Take a Bite Out of Stress 122**

IN SUMMARY 123

**Behavioral Interventions for Managing Stress 123**

Relaxation Training 123

**BECOMING HEALTHIER 124**

Cognitive Behavioral Therapy 125

Emotional Disclosure 126

IN SUMMARY 128

**Answers 129****Suggested Readings 131****6****Understanding Stress and Disease 132****Real-World Profile of Lindsay Lohan—Continued 133****Physiology of the Immune System 133**

Organs of the Immune System 133

Function of the Immune System 134

Immune System Disorders 137

IN SUMMARY 139

**Psychoneuroimmunology 139**

History of Psychoneuroimmunology 140

Research in Psychoneuroimmunology 140

Physical Mechanisms of Influence 142

IN SUMMARY 143

**Does Stress Cause Disease? 143**

The Diathesis–Stress Model 143

Stress and Disease 144

**WOULD YOU BELIEVE . . . ? Being a Sports Fan May Be a Danger to Your Health 150**

Stress and Psychological Disorders 152

**BECOMING HEALTHIER 154**

IN SUMMARY 155

**Answers 155****Suggested Readings 156****7****Understanding and Managing Pain 157****SCALE YOUR PAIN 158****Real-World Profile of Ashlyn Blocker 158****Pain and the Nervous System 159**

The Somatosensory System 159

The Spinal Cord 160

The Brain 161

**WOULD YOU BELIEVE . . . ? Emotional and Physical Pain Are Mainly the Same in the Brain 162**

Neurotransmitters and Pain 162

The Modulation of Pain 163

IN SUMMARY 164

**The Meaning of Pain 164**

Definition of Pain 164

The Experience of Pain 165

Theories of Pain 168

IN SUMMARY 171

**The Measurement of Pain 172**

Self-Reports 172

Behavioral Assessments 174

Physiological Measures 174

IN SUMMARY 175

**Pain Syndromes 175**

Headache Pain 176

Low Back Pain 177

Arthritis Pain 177

Cancer Pain 178

Phantom Limb Pain 178

IN SUMMARY 179

**Managing Pain 179**

Medical Approaches to Managing Pain 180

Behavioral Techniques for Managing Pain 182

IN SUMMARY 186

**Answers 186**

**Suggested Readings 187**

**8**

**Considering Alternative  
Approaches 188**

**CHECK YOUR HEALTH CARE PREFERENCES 189**

Real-World Profile of Norman Cousins 189

**Alternative Medical Systems 190**

Traditional Chinese Medicine 191

Ayurvedic Medicine 192

Naturopathy 193

Homeopathy 193

IN SUMMARY 194

**Alternative Practices and Products 194**

Chiropractic Treatment 194

Massage 195

Energy Healing 196

Diets 196

**WOULD YOU BELIEVE . . . ? Religious Involvement  
May Improve Your Health 197**

Dietary Supplements 197

IN SUMMARY 198

**Mind–Body Medicine 198**

Meditation and Yoga 198

Qi Gong and Tai Chi 199

**BECOMING HEALTHIER 200**

Biofeedback 201

Hypnotic Treatment 202

IN SUMMARY 203

**Who Uses Complementary and  
Alternative Medicine? 203**

Culture, Ethnicity, and Gender 204

Motivations for Seeking Alternative  
Treatment 205

IN SUMMARY 205

**How Effective Are Alternative  
Treatments? 206**

Alternative Treatments for Anxiety, Stress,  
and Depression 206

Alternative Treatments for Pain 208

Alternative Treatments for Other  
Conditions 212

Limitations of Alternative Therapies 214

Integrative Medicine 216

IN SUMMARY 217

**Answers 218**

**Suggested Readings 219**

**9**

**Behavioral Factors  
in Cardiovascular Disease 221**

**CHECK YOUR HEALTH RISKS 222**

Real-World Profile of President Bill Clinton 222

**The Cardiovascular System 223**

The Coronary Arteries 223

Coronary Artery Disease 225

Stroke 227

Blood Pressure 229

IN SUMMARY 231

**The Changing Rates of Cardiovascular  
Disease 231**

Reasons for the Decline in Death Rates 231

Heart Disease Throughout the World 232

IN SUMMARY 233

## **Risk Factors in Cardiovascular Disease 233**

Inherent Risk Factors 234

Physiological Conditions 237

Behavioral Factors 239

## **WOULD YOU BELIEVE . . . ? Chocolate May Help Prevent Heart Disease 241**

Psychosocial Factors 241

IN SUMMARY 245

## **Reducing Cardiovascular Risks 246**

Before Diagnosis: Preventing First Heart Attacks 246

## **BECOMING HEALTHIER 249**

After Diagnosis: Rehabilitating Cardiac Patients 249

IN SUMMARY 251

Answers 251

Suggested Readings 252

# **10**

## **Behavioral Factors in Cancer 253**

### **CHECK YOUR HEALTH RISKS 254**

#### **Real-World Profile of Gwyneth Paltrow 254**

What Is Cancer? 255

The Changing Rates of Cancer Deaths 256

Cancers With Decreasing Death Rates 257

Cancers With Increasing Incidence and Mortality Rates 258

IN SUMMARY 259

### **Cancer Risk Factors Beyond Personal Control 259**

Inherent Risk Factors for Cancer 259

Environmental Risk Factors for Cancer 261

IN SUMMARY 261

### **Behavioral Risk Factors for Cancer 262**

Smoking 262

Diet 263

## **WOULD YOU BELIEVE . . . ? Pizza May Prevent Cancer 265**

Alcohol 266

Sedentary Lifestyle 267

Ultraviolet Light Exposure 268

Sexual Behavior 269

Psychosocial Risk Factors in Cancer 269

IN SUMMARY 270

## **Living With Cancer 270**

Problems With Medical Treatments for Cancer 270

Adjusting to a Diagnosis of Cancer 271

Social Support for Cancer Patients 272

Psychotherapy With Cancer Patients 272

IN SUMMARY 273

Answers 273

Suggested Readings 274

# **11**

## **Living With Chronic Illness 275**

### **Real-World Profile of President Ronald Reagan 276**

### **The Impact of Chronic Disease 276**

Impact on the Patient 277

Impact on the Family 278

IN SUMMARY 279

### **Living With Alzheimer's Disease 280**

### **WOULD YOU BELIEVE . . . ? Using Your Mind May Help Prevent Losing Your Mind 281**

Helping the Patient 283

Helping the Family 283

IN SUMMARY 284

### **Adjusting to Diabetes 285**

The Physiology of Diabetes 285

The Impact of Diabetes 287

Health Psychology's Involvement With Diabetes 288

IN SUMMARY 290

### **The Impact of Asthma 290**

The Disease of Asthma 290

Managing Asthma 292

IN SUMMARY	293
<b>Dealing With HIV and AIDS</b>	<b>293</b>
Incidence and Mortality Rates for HIV/AIDS	293
The HIV and AIDS Epidemics	295
Symptoms of HIV and AIDS	296
The Transmission of HIV	298
Psychologists' Role in the HIV Epidemic	299

<b>BECOMING HEALTHIER</b>	<b>302</b>
IN SUMMARY	302
<b>Facing Death</b>	<b>303</b>
Adjusting to Terminal Illness	303
Grieving	304
IN SUMMARY	305
<b>Answers</b>	<b>305</b>
<b>Suggested Readings</b>	<b>306</b>

## PART 4 Behavioral Health

### 12

#### **Smoking Tobacco 307**

<b>CHECK YOUR HEALTH RISKS</b>	<b>308</b>
<b>Real-World Profile of Christy Turlington</b>	<b>308</b>
<b>Smoking and the Respiratory System</b>	<b>309</b>
Functioning of the Respiratory System	309
What Components in Smoke Are Dangerous?	312
IN SUMMARY	312
<b>A Brief History of Tobacco Use</b>	<b>312</b>
<b>WOULD YOU BELIEVE . . . ? Tobacco Sales Are Doing Fine</b>	<b>314</b>
<b>Choosing to Smoke</b>	<b>315</b>
Who Smokes and Who Does Not?	315
Why Do People Smoke?	319
IN SUMMARY	324
<b>Health Consequences of Tobacco Use</b>	<b>324</b>
Cigarette Smoking	324
Cigar and Pipe Smoking	327
Passive Smoking	327
Smokeless Tobacco	328
IN SUMMARY	328
<b>Interventions for Reducing Smoking Rates</b>	<b>329</b>
Deterring Smoking	329
Quitting Smoking	329
Who Quits and Who Does Not?	332
Relapse Prevention	333
IN SUMMARY	333

<b>BECOMING HEALTHIER</b>	<b>334</b>
<b>Effects of Quitting</b>	<b>334</b>
Quitting and Weight Gain	334
Health Benefits of Quitting	335
IN SUMMARY	337
<b>Answers</b>	<b>337</b>
<b>Suggested Readings</b>	<b>338</b>

### 13

#### **Using Alcohol and Other Drugs 339**

<b>CHECK YOUR HEALTH RISKS</b>	<b>340</b>
<b>Real-World Profile of Drew Barrymore</b>	<b>340</b>
<b>Alcohol Consumption—Yesterday and Today</b>	<b>341</b>
A Brief History of Alcohol Consumption	341
The Prevalence of Alcohol Consumption Today	343
IN SUMMARY	345
<b>The Effects of Alcohol</b>	<b>345</b>
Hazards of Alcohol	347
Benefits of Alcohol	350
IN SUMMARY	352
<b>Why Do People Drink?</b>	<b>352</b>
The Disease Model	354
Cognitive-Physiological Theories	356
The Social Learning Model	357
IN SUMMARY	359

**Changing Problem Drinking 359**

- Change Without Therapy 359
- Treatments Oriented Toward Abstinence 360
- Controlled Drinking 361
- The Problem of Relapse 362
- IN SUMMARY 362

**Other Drugs 363****WOULD YOU BELIEVE . . . ? Brain Damage Is Not a Common Risk of Drug Use 364**

- Health Effects 364

**BECOMING HEALTHIER 366**

- Drug Misuse and Abuse 371
- Treatment for Drug Abuse 371
- Preventing and Controlling Drug Use 373
- IN SUMMARY 373

**Answers 374****Suggested Readings 375****14****Eating and Weight 376****CHECK YOUR HEALTH RISKS 377****Real-World Profile of Mary-Kate Olsen 377****The Digestive System 378****Factors in Weight Maintenance 379**

- Experimental Starvation 381
- Experimental Overeating 382
- IN SUMMARY 382

**Overeating and Obesity 382**

- What Is Obesity? 383
- Why Are Some People Obese? 387

**WOULD YOU BELIEVE . . . ? You May Need a Nap Rather Than a Diet 388**

- How Unhealthy Is Obesity? 391
- IN SUMMARY 392

**Dieting 392**

- Approaches to Losing Weight 394
- Is Dieting a Good Choice? 397
- IN SUMMARY 398

**Eating Disorders 399**

- Anorexia Nervosa 400
- Bulimia 404
- Binge Eating Disorder 406

**BECOMING HEALTHIER 407**

- IN SUMMARY 408

**Answers 409****Suggested Readings 410****15****Exercising 411****CHECK YOUR HEALTH RISKS 412****Real-World Profile of Jim Fixx 412****Types of Physical Activity 413****Reasons for Exercising 414**

- Physical Fitness 414
- Weight Control 415

- IN SUMMARY 416

**Physical Activity and Cardiovascular Health 416**

- Early Studies 417
- Later Studies 418
- Do Women and Men Benefit Equally? 419
- Physical Activity and Cholesterol Levels 420
- IN SUMMARY 421

**Other Health Benefits of Physical Activity 421**

- Protection Against Cancer 421
- Prevention of Bone Density Loss 421
- Control of Diabetes 422
- Psychological Benefits of Physical Activity 422

**WOULD YOU BELIEVE . . . ? It's Never Too Late—or Too Early 423**

- IN SUMMARY 426

**Hazards of Physical Activity 428**

- Exercise Addiction 429
- Injuries From Physical Activity 430
- Death During Exercise 430
- Reducing Exercise Injuries 431
- IN SUMMARY 431

How Much Is Enough but Not Too Much?	432
Adhering to a Physical Activity Program	432
<b>BECOMING HEALTHIER</b>	<b>433</b>
Predicting Dropouts	433

Increasing Maintenance	434
IN SUMMARY	434
Answers	435
Suggested Readings	436

## **PART 5 Looking Toward the Future**

### **16**

#### **Future Challenges 437**

Real-World Profile of Dwayne and Robyn	438
Challenges for Healthier People	439
Increasing the Span of Healthy Life	439
Reducing Health Disparities	441
<b>WOULD YOU BELIEVE . . . ? Terence Was Right</b>	<b>444</b>
IN SUMMARY	444
Outlook for Health Psychology	445
Progress in Health Psychology	445
Future Challenges for Health Care	445
Will Health Psychology Continue to Grow?	452
IN SUMMARY	452

#### **Making Health Psychology Personal 452**

Understanding Your Risks	453
Cultivating a Healthy Lifestyle	456
IN SUMMARY	457

# SUBJECT INDEX

- A**
- Abdominal fat, 392, 393
  - A-beta fibers, 159, 169
  - Absolute risks, 35, 36
  - Abstinence violation effect, 333, 434
  - Acetaminophen, 181–182
  - Acetylcholine, 98
  - Acquired immune deficiency syndrome. *See* AIDS
  - Acrolein, 312
  - ACTH. *See* Adrenocorticotrophic hormone
  - Acupressure, 192, 214
  - Acupuncture
    - defined, 192
    - limitations of, 214–215
    - managing pain with, 191–192, 208–210, 211, 217
    - reducing stress with, 208, 209
  - Acute pain, 165, 171, 179
  - Addictions
    - alcohol and drug, 341, 346
    - bulimia and food, 405
    - defined, 346
    - exercise, 429–430
    - smoking, 308
    - 12-step programs for, 360, 372, 374
  - A-delta fibers, 159, 160, 164, 169
  - Adherence
    - age as factor in, 78, 85, 92
    - behavioral model of, 70, 72, 74
    - behavioral strategies to improve, 88–91
    - compliance and, 74
    - contingency contracts for, 90–91, 92
    - cultural norms and, 81–82
    - defining, 74–75, 76, 91
    - education to improve, 87
    - emotional factors in, 79
    - environmental factors and, 80–81, 85–86
    - factors predicting, 77–86, 92
    - frequency of lapses, 76, 91
    - gender as factor in, 78–79
    - graduated regimen implementation, 90
    - health improvements with, 90
    - improving, 86–91, 92
    - inventory of personal habits, 69
    - maintaining exercise programs, 432–435, 436
    - managing HIV infection and, 299, 301–302
    - measuring, 75–76, 91–92
    - personal beliefs and, 79–80
    - personality patterns and, 79
    - practitioner-patient interaction, 82–84, 86
    - predicting relapses in, 71–72, 73, 74
    - prompting individuals in, 88, 89
    - real-world profile on, 69
    - reasoned action and planned behaviors theories, 72, 74
    - reasons for lapses in, 86–87, 88
    - self-efficacy theory of, 70–72, 74
    - severity of disease and, 77
    - side effects and, 77
    - social support for, 80–81
    - suggested readings in, 92
    - tailoring regimen to individual, 88–89, 92
    - theories applying to, 70–74, 91
    - transtheoretical model, 72–74
    - treatment complexity and, 77–78, 84
  - See also* Predictors of adherence
  - Adolescents
    - adherence for, 78, 85, 92
    - alcohol use by, 346, 355
    - asthma in, 290, 292, 293
    - causes of death for, 4, 5
    - coping strategies among, 122
    - diabetes in, 72, 286, 289, 422
    - dieting and weight loss by, 31, 394, 396, 399
    - drug use by, 370–371, 373
    - eating disorders and, 403–405, 407, 408
    - exercise benefits for, 420, 421, 422, 425, 427, 428
    - overweight/obesity among, 386, 393
    - pain sensitivity by gender, 168
    - smokeless tobacco use by, 328
    - smoking among, 318–319, 320–323, 326, 329, 337, 443
    - stress experienced by, 115, 155
    - tobacco promotions to, 314, 321
  - See also* Children
  - Adrenal cortex, 99, 101
  - Adrenal glands, 98, 99
  - Adrenal medulla, 99
  - Adrenocortical response, 99
  - Adrenocorticotrophic hormone (ACTH)
    - pituitary release of, 99, 100, 101, 129
    - stress mechanisms and, 142–143
  - Adrenomedullary response, 99
  - Adrenomedullary system, 99–100
  - Aerobic exercise, 413–414, 415
  - Afferent neurons, 159
  - Aflatoxin, 263–264, 267
  - African Americans
    - alcohol use by, 343
    - cardiovascular reactivity among, 244–245
    - effect of discrimination on, 149, 236
    - health care disparities for, 441–442, 445
    - inherent CVD risk factors of, 236
    - pain perception by, 167–168
    - percentage overweight and obese, 386
  - See also* Ethnicity
  - Age
    - adherence and, 78
    - alcohol use and, 344
    - benefits of exercise and, 423
    - mortality rates by, 4, 5
    - seeking health care and patient's, 55
    - weight-related health risks and, 392
  - Aging
    - Alzheimer's and, 280, 282, 285
    - back pain and, 177
    - CVD risks and, 234–236, 238
    - distinguishing illness from signs of, 55
    - health care for aging population, 445–446
    - inherent cancer risks and, 259–260, 261
    - mortality and, 4
  - Agoraphobia, 154
  - Agouti-related peptide, 380, 409
  - AIDS (acquired immune deficiency syndrome), 138–139, 293, 306
    - epidemics of HIV and, 295–296
    - incidence and mortality rates of, 293–295
    - Kaposi's sarcoma and, 269
    - symptoms of, 296–298
    - treatment adherence for, 69
  - See also* HIV
  - Alameda County Study, 32–34, 118–119
  - Alarm reactions, 102, 103, 105

- Alcohol  
 benefits of, 350–352  
 caffeine's effect with, 365  
 cancer and, 266, 270, 274, 347–348  
 cardiovascular system and, 348, 351  
 cognitive-physiological theories of use, 356–357, 359  
 consumption trends in, 341–343, 374  
 direct hazards of, 347–349  
 effects of, 345–352, 374  
 expectancy and effects of, 355–356  
 health recommendations for, 366  
 health risk checklist for, 340  
 history of consumption, 341–345  
 indirect hazards from, 349–350  
 moderating intake of, 456, 457  
 moral and medical models for drunkenness, 353  
 potential for brain damage with, 364  
 real-world profile about, 340  
 reasons for drinking, 352–359, 374  
 social learning model of use, 357–359  
 suggested readings on, 375  
 using cocaine with, 369
