

Focus on disease	1
Lucie Janečková, Olga Babošová, Vladimír Kořínek	2
Small molecule modulators of Wnt/ β -catenin-driven gene expression: focus on colorectal cancer	
Kallayane Chawengsaksophak, Björn Schuster, Trevor A. Epp	20
Application of small molecular inhibitors for the establishment and maintenance of stem cell pluripotency	
Libor Macurek	32
PPM1D as a driver and pharmacological target in clonal hematopoiesis	
Trevor A. Epp, Björn Schuster, Kallayane Chawengsaksophak	40
FAM208A: a new target in the search for antiretroviral drugs	
Trevor A. Epp, Björn Schuster, Kallayane Chawengsaksophak	50
The role of forward genetic screens in the identification of FAM208A as an epigenetic silencing factor	
Libor Macurek	60
p53 pathway as a target in cancer therapy	
Trevor A. Epp, Björn Schuster, Kallayane Chawengsaksophak	64
LINE-1 repression in human cancer	
Approaches	77
Jiří Pergner and Zbyněk Kozmik	78
Luciferase-based assays for monitoring G-protein coupled receptors signaling	
Jiří Pergner and Zbyněk Kozmik	86
Novel optogenetic tools for controlling Gs signalling	
Björn Schuster, Trevor A. Epp, Kallayane Chawengsaksophak	92
CRISPR/Cas9, a bacterial immune system became the most widely used tool for genome engineering	

	Björn Schuster, Trevor A. Epp, Kallayane Chawengsaksohak	104
	Novel additions to the CRISPR/Cas toolbox beyond SpCas9	
Part III	Methods	115
	Michal Kahle, Jindřich Jindřich, Petr Bartůněk	116
	Screening of fluorescence properties of chemical compounds using PerkinElmer EnSpire multi-mode plate reader	
	Michal Kahle, Martin Popr, Jindřich Jindřich, Petr Bartůněk	121
	Rackscanner: Open-source SW solution enables efficient sample management by utilization of 2D-barcoded storage tubes	
	Tomáš Langhammer	126
	High-Throughput Quantitative PCR miniaturization by using Labcyte Echo 550 Acoustic Liquid Handler	
	Martin Popr, David Sedlák, Petr Bartůněk	130
	Compound management – efficient handling of 100k small molecule collection at CZ-OPENSREEN	
Part IV	Informatics	137
	Ivan Čmelo and Daniel Svozil	138
	The concept of Chemical Space	
	Jindřich Jindřich	148
	Most Used Chemistry Databases	
	Jiří Novotný and Daniel Svozil	159
	Small Overview of Molecular Descriptors	
	Milan Voršilák	166
	Computational Prediction of Synthetic Feasibility	
	Martin Šicho and Daniel Svozil	174
	Molecular docking in virtual drug design: overview and new challenges	
	Čtibor Škuta	187
	QSAR - Searching for a relationship between a compound's structure and its biological activity	
	Daniel Svozil	197
	Computational screening of biologically active compounds	
	Tomáš Müller	204
	Laboratory information management systems for high-throughput screening
