

## Contents

### PART I. GENERAL ELEMENTS OF PSYCHOPHYSIOLOGY

1. Psychophysiology 3  
*Short History and Long Past* 5
2. Neurons and Muscles: The Sources of Psychophysiological Recordings 12  
*Organization of the Nervous System* 14  
*Function of Nerve and Muscle Cells* 21  
*Bioelectric Potentials* 33
3. Equipment Used in Psychophysiological Recording 36  
*Electrodes and Transducers* 36  
*Polygraphs* 40  
*Computers* 44
4. Psychophysiological Recordings 47  
*Spontaneous Responses* 48  
*Tonic Activity* 49  
*Phasic Activity* 50
5. Some Basic Principles of Psychophysiology 52  
*Arousal and Habituation* 52  
*Orienting, Defensive, and Startle Responses* 56  
*Homeostasis and Autonomic Balance* 59  
*Law of Initial Values* 62  
*Stimulus-Response Specificity and Individual Response Stereotypy* 65

- 6. Safety and Ethics in a Psychophysiology Laboratory 70
  - Safety* 70
  - Additional Safety Principles* 71
  - Ethical Considerations* 72

## PART II. PSYCHOPHYSIOLOGY OF SPECIFIC ORGANS AND SYSTEMS

- 7. Brain: Electroencephalography and Imaging 79
  - Spontaneous EEGs* 79
  - Event-Related Potentials* 91
  - Brain Imaging Techniques* 100
- 8. Muscles: Electromyography 106
  - Physiological Basis* 108
  - Recording Procedure* 109
  - Typical Recordings* 114
  - Common Problems* 115
  - Analysis and Quantification* 121
- 9. Eyes: Pupillography and Electrooculography 125
  - Pupillography* 125
  - Eye Movements* 130
  - Electrooculography* 135
- 10. Respiratory System 142
  - Physiological Basis* 145
  - Recording Procedures* 147
  - Typical Recording* 152
  - Analysis and Quantification* 153
- 11. Gastrointestinal Motility: Electrogastrography 157
  - Physiological Basis* 158
  - Recording Procedure* 164
  - Typical Recordings* 166
  - Common Problems* 170
  - Analysis and Quantification* 171
- 12. Cardiovascular System: Heart Rate; Cardiac Output; and Blood Pressure, Volume, and Flow 178
  - Physiological Basis* 178
  - Heart Rate or Heart Period* 186
  - Cardiac Output* 192

<i>Blood Pressure</i>	194
<i>Blood Volume and Flow</i>	199

13. Skin: Electrodermal Activity	206
<i>Terminology</i>	207
<i>Physiological Basis</i>	209
<i>Skin Conductance</i>	211
<i>Skin Potential</i>	217
14. Signal Processing	221
<i>Assessing Basal Activity</i>	226
<i>Assessing Change</i>	227
<i>Assessing Global Aspects of Physiological Signals</i>	230

### PART III. APPLICATIONS

15. Applications of Psychophysiological Recording	245
<i>Five Categories of Psychophysiological Studies</i>	246
<i>Conclusions</i>	255

Glossary	263
