

# Contents

Preface.....	15
Introduction.....	17
<b>1 Open-pit mining of minerals .....</b>	<b>19</b>
1.1 Significance of open-pit mining of minerals in the world .....	19
1.2 Specifics of open-pit mining.....	21
1.2.1 <i>Comparison of open-pit and underground mining</i> .....	22
<b>2 Basic parameters of open-pit mining .....</b>	<b>24</b>
2.1 Fundamental terms in open-pit mining .....	24
2.2 Types of economic mineral deposits .....	30
2.3 Geotechnical and geomechanical parameters of an open-pit mine .....	31
2.3.1 <i>Classification of a quarry face material</i> .....	31
2.3.2 <i>Basic geomechanical and geotechnical properties of minerals</i> .....	32
2.4 Mining-influencing parameters .....	35
2.4.1 <i>Mining-influencing forces</i> .....	35
2.5 Conditions of an open-pit mine building .....	36
2.5.1 <i>Dynamics of a quarry building</i> .....	36
2.5.2 <i>Work safety</i> .....	36
2.5.3 <i>Design and management of winning operations</i> .....	37
2.5.4 <i>Range of cyclic character of winning operations</i> .....	40
2.6 Geometric quarry parameters .....	40
2.6.1 <i>Bench and quarry height</i> .....	40
2.6.2 <i>Working and transport width of a bench</i> .....	45
2.6.3 <i>Slope angle</i> .....	45
2.6.4 <i>Working face</i> .....	46
2.7 Stripping coefficient (ratio).....	47
2.7.1 <i>Mining (current) stripping coefficient</i> .....	48
2.7.2 <i>Medium stripping coefficient</i> .....	48
2.7.3 <i>Investment stripping coefficient</i> .....	48
2.7.4 <i>Limiting stripping coefficient</i> .....	49
2.7.5 <i>Geological stripping coefficient</i> .....	49
2.8 Limiting depth of a quarry .....	49
2.8.1 <i>Method of determining the limiting depth under     the condition <math>k_d &lt; k_{hr}</math></i> .....	51
2.8.2 <i>Method of determining the limiting depth for     the condition <math>k_t &lt; k_{hr}</math></i> .....	52

2.8.3	<i>Method of determining the limiting depth for the condition <math>k_o+k &lt; k_{hr}</math></i> .....	52
2.9	<i>Influence of natural and other factors on a quarry's parameters</i> .....	55
2.9.1	<i>Influence of a deposit slope angle</i> .....	56
2.9.2	<i>Influence of a deposit's thickness</i> .....	56
2.9.3	<i>Influence of overburden thickness</i> .....	56
2.9.4	<i>Influence of the manner of development and mining method</i> .....	57
2.9.5	<i>Influence of a quarry working zone slope angle</i> .....	57
2.9.6	<i>Influence of winning operation advance direction</i> .....	58
2.10	<i>Mode of winning operations – geometric analysis</i> .....	58
2.10.1	<i>Geometric analysis with oblique and steeply positioned deposits</i> .....	60
2.10.2	<i>Geometric analysis with horizontal and slightly inclined deposits</i> .....	64
2.10.3	<i>Total stripping mining coefficient (average)</i> .....	66
2.11	<i>Direction of winning operations advance</i> .....	69
2.11.1	<i>General conditions</i> .....	69
2.11.2	<i>Technological criteria of optimality in deposits of a constant quality</i> .....	69
<b>3</b>	<b><i>Development of an open-pit mine</i></b> .....	<b>75</b>
3.1	<i>General conditions of development</i> .....	75
3.2	<i>Manner of open-pit mine development</i> .....	77
3.2.1	<i>Development by a cut</i> .....	77
3.2.1.1	<i>Types of cuts</i> .....	77
3.2.1.2	<i>Development by an external cut</i> .....	80
3.2.1.3	<i>Development by an internal cut</i> .....	83
3.2.2	<i>Direct development of horizontal and slightly inclined deposits</i> .....	84
3.2.3	<i>Development by underground space</i> .....	84
3.2.4	<i>Preparatory cuts</i> .....	85
3.3	<i>Designing transport routes</i> .....	85
3.4	<i>Methods of cut winning</i> .....	87
3.4.1	<i>Transportless method of cut winning</i> .....	88
3.4.2	<i>Cut winning including earth disposal</i> .....	90
3.4.3	<i>Cut winning with excavators with continuous operating cycle</i> .....	92
3.4.4	<i>Special methods of cut winning</i> .....	93
3.4.4.1	<i>Cut winning with scrapers</i> .....	93
3.4.4.2	<i>Cut winning by blasting</i> .....	94
<b>4</b>	<b><i>Systematics of open-pit mining</i></b> .....	<b>95</b>
4.1	<i>General principles and qualification of open-pit mining systems</i> .....	95

4.2	Influence of stowing and mining-geological conditions of a deposit .....	97
4.2.1	<i>Mining-geological conditions and their influence on the selection of mining method</i> .....	97
4.2.2	<i>Influence of the deposit shape</i> .....	99
4.2.2.1	<i>Longitudinal (directional) mining methods</i> .....	99
4.2.2.2	<i>Cross mining methods</i> .....	100
4.2.2.3	<i>Fan-like and circular mining methods</i> .....	100
4.3	Mining methods in relation to the transport of the mined material – stripping methods .....	102
4.3.1	<i>Transportless mining sets</i> .....	102
4.3.1.1	<i>Method of mining waste dump calculation</i> .....	104
4.3.2	<i>Mining systems with transverse transport of material</i> .....	106
4.3.2.1	<i>System with a conveyor bridge (transport bridge)</i> .....	106
4.3.2.2	<i>Mining system with a cross-pit spreader</i> .....	110
4.3.3	<i>Mining system with railway transport</i> .....	111
4.3.4	<i>Mining system with belt conveyance</i> .....	115
4.3.4.1	<i>Mining system on horizontal benches</i> .....	116
4.3.4.2	<i>Mining system on inclined benches</i> .....	119
4.3.5	<i>Mining methods with vehicular transport</i> .....	119
4.3.6	<i>Mining methods with combined transport</i> .....	121
4.4	Parameters of mining methods and mutual relationships .....	122
<b>5</b>	<b>Mining technology</b> .....	<b>123</b>
5.1	Parameters of machine mining technology .....	124
5.2	Mining technology by excavators – division and characteristic .....	125
5.3	Mining technology with an interrupted work cycle (cyclic technology).....	128
5.3.1	<i>Mining with a shovel excavator</i> .....	128
5.3.1.1	<i>Shovel excavators – slack-line excavators (classical)</i> .....	130
5.3.1.2	<i>Hydraulic excavators</i> .....	134
5.3.2	<i>Mining with dragline excavators (dragline)</i> .....	139
5.3.3	<i>Mining with a slack-line scraper</i> .....	142
5.4	Mining technology with continuous excavators .....	143
5.4.1	<i>Mining with a bucket chain excavator</i> .....	144
5.4.1.1	<i>Frontal mining with a bucket chain excavator</i> .....	150
5.4.1.2	<i>Work of a bucket chain excavator in a block</i> .....	152
5.4.1.3	<i>Dependence of parameters of cutting and force necessary for excavation</i> .....	154
5.4.2	<i>Mining with bucket wheel excavators</i> .....	155
5.4.2.1	<i>Mesh parameters of a bucket wheel excavator</i> .....	161

5.4.2.2	<i>Mesh parameters in dependence on technical parameters of a bucket wheel excavator</i> .....	162
5.4.2.3	<i>Cut parameters by a bucket wheel excavator</i> .....	165
5.4.2.4	<i>Mining with a hydraulic bucket wheel excavator</i> .....	171
5.5	Mining technology with dozers .....	172
5.5.1	<i>Stripping of deposits with dozers (or scrapers)</i> .....	179
5.6	Mining technology with scrapers .....	181
5.7	Mining technology with scrapedozers.....	190
5.8	Mining technology with surface miners .....	192
5.8.1	<i>Surface miners with middle drum configuration – SM</i> .....	194
5.8.2	<i>Surface miners with front drum configuration – MTS</i> .....	196
5.8.3	<i>Compact miners – MTS-C</i> .....	199
5.8.4	<i>Surface miners with front boom cutting drum</i> .....	200
5.8.5	<i>Large surface miners with front cutting wheel – KSM</i> .....	202
5.8.5.1	<i>Possible applications of large surface miners KSM</i> .....	205
5.9	Mining technology with drilling-blasting operations.....	211
5.9.1	<i>Drilling operations</i> .....	211
5.9.1.1	<i>Physical – mechanical properties that are important in terms of rock drillability</i> .....	211
5.9.1.2	<i>Systematics of rock drilling</i> .....	212
5.9.1.3	<i>Mechanical drilling methods</i> .....	212
5.9.1.4	<i>Non-mechanical drilling methods</i> .....	213
5.9.1.5	<i>Selection of drilling sets</i> .....	213
5.9.2	<i>Mining technology by blasting operations</i> .....	216
5.9.2.1	<i>General conditions</i> .....	217
5.9.2.2	<i>Selection of drill well diameter</i> .....	219
5.9.2.3	<i>Line of minimum resistance</i> .....	219
5.9.2.4	<i>Drill well network</i> .....	220
5.9.2.5	<i>Selection of explosive</i> .....	221
5.9.2.6	<i>Kinds of explosives</i> .....	223
5.9.2.7	<i>Initiation of charges</i> .....	224
5.9.2.8	<i>Drilling rig capacity</i> .....	225
5.9.2.9	<i>Explosive ratio and complex parameters of drill wells</i> .....	227
5.9.2.10	<i>Blasting quality</i> .....	233
5.9.2.11	<i>Blasting safety</i> .....	236
5.10	Front end loaders (tractor shovels).....	240
5.10.1	<i>Surface mining applications of FEL</i> .....	243
5.11	Hydromining technology.....	248
5.11.1	<i>Hydromining capacity</i> .....	249

5.11.2	<i>Hydromining schemes</i> .....	250
5.11.3	<i>Hydro-transportation of rock mass</i> .....	259
5.11.4	<i>Hydro-dumping</i> .....	264
<b>6</b>	<b>Transport technology</b> .....	<b>271</b>
6.1	Freight truck traffic .....	274
6.1.1	<i>Mutual dependence of loading and transport mechanisms</i> .....	280
6.1.2	<i>Vehicular transport capacity</i> .....	282
6.1.3	<i>Selection of loading machine/excavator – truck system</i> .....	285
6.1.3.1	<i>Truck operation in a closed cycle</i> .....	286
6.1.3.2	<i>Excavator operation in an open cycle</i> .....	287
6.2	Rail haulage – railway transport.....	287
6.2.1	<i>Locomotives</i> .....	289
6.2.2	<i>Gondola cars</i> .....	290
6.2.3	<i>Rail haulage capacity</i> .....	291
6.3	Belt conveyance .....	293
6.3.1	<i>Diagram of transport and conveyance system with belt conveyance</i> .....	294
6.3.2	<i>Structure of conveyor belt components</i> .....	296
6.3.3	<i>Basic elements of conveyor capacity calculation</i> .....	304
6.4	Belt wagons (mobile transfer conveyors).....	306
6.4.1	<i>Division of belt wagons</i> .....	307
6.4.2	<i>Determination of the length of belt wagon jib</i> .....	308
6.4.2.1	<i>Determination of the length of delivery jib of belt wagon</i> .....	308
6.4.2.2	<i>Determination of the cut depth</i> .....	310
6.5	Material loading and discharging devices for belt conveyance .....	311
6.6	Combined transport.....	313
6.7	Preliminary crushers.....	314
6.8	Shifting devices.....	321
6.8.1	<i>Direct shifting</i> .....	322
6.8.2	<i>Mediated shifting (truck – tank – gondola car)</i> .....	323
6.8.3	<i>Devices for shifting from truck to conveyor belts</i> .....	324
6.9	Rope haulage .....	325
6.10	Gravity transport.....	328
6.11	Water-carriage .....	330
6.11.1	<i>Gravity water-carriage</i> .....	331
6.11.2	<i>Conveyance by pumps</i> .....	332
<b>7</b>	<b>Dumping management</b> .....	<b>333</b>
7.1	Purpose of loading.....	334
7.2	Dumping classification and methods .....	335
7.3	Stowing procedure .....	336

7.3.1	<i>Stowing procedure in the case of vehicle transport (bulldozer mining waste dumps).....</i>	337
7.3.2	<i>Stowing procedure in the case of railway transport.....</i>	339
7.3.3	<i>Stowing procedure with the use of belt conveyance .....</i>	343
7.4	<i>Mining waste dumps discharged with excavators .....</i>	346
7.4.1	<i>Stowing with a shovel excavator .....</i>	346
7.4.2	<i>Stowing with a dragline excavator .....</i>	347
7.5	<i>Hydraulic dumps.....</i>	348
7.6	<i>Mechanisms for stowing .....</i>	348
7.6.1	<i>Plough.....</i>	349
7.6.2	<i>Spreaders.....</i>	349
7.6.2.1	<i>Bucket reclaimers/spreaders .....</i>	349
7.6.2.2	<i>Jib-type (console) spreaders .....</i>	350
<b>8</b>	<b>Reclamation of territory affected by mining.....</b>	<b>353</b>
8.1	<i>Classification of areas affected by mining .....</i>	355
8.2	<i>Time schedule of use of the area .....</i>	357
8.3	<i>Methods of reclamation .....</i>	357
8.3.1	<i>Technical conditions of reclamation.....</i>	358
8.3.1.1	<i>Technology of spreading topsoil.....</i>	358
8.3.1.2	<i>Stowing technology for neutral material.....</i>	359
8.3.1.3	<i>Stowing technology of dangerous and toxic material .....</i>	360
8.3.1.4	<i>Reasons for selective stowing .....</i>	361
8.3.1.5	<i>Costs of selective stowing .....</i>	362
8.3.1.6	<i>Determination and implementation of the final slope angles of a quarry and mining waste dumps .....</i>	363
8.4	<i>Basic data on soil properties .....</i>	365
8.4.1	<i>Physical properties of soil.....</i>	365
8.4.2	<i>Chemical properties of soil.....</i>	366
8.4.3	<i>Mechanical properties of soil.....</i>	367
8.4.3.1	<i>Methods of soil improvement.....</i>	368
8.5	<i>Biological reclamation.....</i>	369
8.5.1	<i>Fundamentals of biological reclamation .....</i>	369
8.5.1.1	<i>Biological reclamation of an area affected by mining.....</i>	369
8.5.1.2	<i>Biological reclamation of the ground level .....</i>	371
8.5.1.3	<i>Completion of biological reclamation of a quarry .....</i>	372
8.5.2	<i>Reclamation of the body and upper part of a stone pit mining waste dump .....</i>	374
8.5.3	<i>Biological reclamation of a sand pit surface .....</i>	375
8.6	<i>Main specifics of reclamation technology .....</i>	376
8.7	<i>Change and delimitation of the final contours of the reclaimed quarry .....</i>	377

<b>9 Capacity of an open-pit mine</b> .....	<b>380</b>
9.1 Capacity rationality .....	381
9.2 Effective time of mining system in open-pit mining .....	382
9.3 Set (complex) capacity .....	384
9.3.1 <i>Mining capacity of set for stripping</i> .....	384
9.3.2 <i>Mining capacity for economic mineral extraction</i> .....	384
9.3.3 <i>Total capacity of an open-pit mine</i> <i>(waste + economic component)</i> .....	385
9.3.3.1 <i>Capacity of an open-pit mine with horizontal</i> <i>and slightly inclined deposits</i> .....	386
9.3.3.2 <i>Capacity of an open-pit mine with oblique</i> <i>and steeply located deposits</i> .....	386
9.4 Capacity of an open-pit mine in dependence on investment and the price of minerals .....	389
9.4.1 <i>Investment costs</i> .....	389
9.4.2 <i>Price of economic mineral</i> .....	390
9.4.2.1 <i>Amortization</i> .....	390
9.4.2.2 <i>Productivity of labour</i> .....	391
9.5 Bench capacity – technological solutions .....	392
<b>10 Methods of quarry planning</b> .....	<b>398</b>
10.1 Access to the creation of a computer model for mining planning .....	399
10.1.1 <i>Time criterion of open-pit quarry planning</i> .....	402
10.1.2 <i>Model verification and update</i> .....	403
10.2 Optimization of a quarry's final shape .....	403
10.2.1 <i>Approach to modelling of a quarry's final shape</i> .....	405
10.2.1.1 <i>LERCHS – GROSSMANN method of quarry</i> <i>optimization</i> .....	405
10.2.1.2 <i>Positive technique of moving cone</i> <i>(reverse cone method)</i> .....	407
<b>11 Quarry aerology and water treatment</b> .....	<b>411</b>
11.1 Quarry air pollutants and the sources of their emissions.....	411
11.2 Quarry air recirculation zone .....	414
11.3 Balances of quarry air pollutants from internal and external sources ...	418
11.4 Quarry air dangerous level.....	423
11.5 Quarry controlled ventilation .....	425
11.6 Quarry wastewater: sources of contamination.....	431
11.7 Quarry wastewater treatment .....	433
<b>12 Open-pit mining safety</b> .....	<b>446</b>
12.1 General provisions .....	446
12.2 Drilling-and-blasting operations (DBO) .....	446

12.3	Exploitation of mining equipment .....	447
12.4	Dumping .....	448
12.5	Motor vehicles and roads operation .....	450
12.6	Operation of electric equipment .....	452
12.7	Dust, harmful gases and radiation control in mining operations .....	453
	12.7.1 <i>Dust and harmful gases control</i> .....	453
	12.7.2 <i>Radiation safety</i> .....	454
12.8	Noise control and vibration safety.....	454
	12.8.1 <i>Noise control</i> .....	454
	12.8.2 <i>Vibration Safety</i> .....	454
12.9	The order of mining operations in hazardous areas .....	455
	12.9.1 <i>Classification of hazardous areas in mining operations</i> .....	455
	12.9.2 <i>Measures for the safe mining operations in hazardous areas caused by geological factors</i> .....	456
	12.9.3 <i>Open pit mining by high benches</i> .....	457
12.10	Preventing and fighting endogenous and exogenous fires .....	460
	12.10.1 <i>Fire preventing measures</i> .....	460
	12.10.2 <i>Measures for the detection of spontaneous combustion</i> .....	463
	12.10.2.1 <i>Fire-fighting safety</i> .....	463
	12.10.2.2 <i>Fire-fighting measures</i> .....	463
12.11	Mining method parameters securing surface mining works.....	466
	12.11.1 <i>The bench height</i> .....	466
	12.11.2 <i>Slope angles of the bench</i> .....	469
	12.11.3 <i>Width of the excavator pass</i> .....	470
	12.11.4 <i>Zone width for free movement of the excavator</i> .....	473
	12.11.5 <i>Working platform width</i> .....	473
	12.11.6 <i>The width of initial cut at the bottom</i> .....	476
	12.11.7 <i>The width of safety berm</i> .....	476

<b>APPENDIX</b> .....	<b>478</b>
-----------------------	------------

<b>A Introduction</b> .....	<b>478</b>
-----------------------------	------------

<b>A1 Calculation and Graphic Work</b> .....	<b>479</b>
--	------------

A1.1 Theoretical clauses .....	479
--------------------------------	-----

A1.2 Calculation of the main parameters and the quarry section profile.....	479
---	-----

A1.3 An example of calculation of the main quarry parameters .....	481
--	-----

A1.4 Self-check .....	481
-----------------------	-----

<b>A2 Calculation and Graphic Work</b> .....	<b>483</b>
--	------------

A2.1 Theoretical clauses .....	483
--------------------------------	-----

A2.2 Calculation of parameters and plotting the mining block scheme .....	484
---	-----

A2.3 Example of calculating the mining blocks parameters.....	485
---	-----

A2.4 Self-check .....	485
-----------------------	-----

<b>A3 Calculation and Graphic Work</b> .....	<b>487</b>
A3.1 Theoretical clauses .....	487
A3.2 Calculation of the main parameters and plotting the dump scheme.....	487
A3.3 Example of calculating the parameters of external multi-tier dump .....	488
A3.4 Self-check .....	489
<b>A4 Calculation and Graphic Work</b> .....	<b>490</b>
A4.1 Theoretical clauses .....	490
A4.2 Calculation of parameters and plotting the technological scheme .....	490
A4.3 Example of calculation results of scheme parameters.....	492
A4.4 Self-check .....	492
<b>A5 Calculation and Graphic Work</b> .....	<b>494</b>
A5.1 Theoretical clauses .....	494
A5.2 Calculating the parameters and plotting technological scheme .....	494
A5.3 Example of calculation results of scheme parameters.....	496
A5.4 Self-check .....	497
<b>A6 Calculation and graphic work</b> .....	<b>499</b>
A6.1 Theoretical clauses .....	499
A6.2 Calculating the parameters and plotting technological scheme .....	499
A6.3 Example of calculation results of scheme parameters.....	501
A6.4 Self-check .....	501
<b>A7 Calculation and Graphic Work</b> .....	<b>503</b>
A7.1 Theoretical clauses .....	503
A7.2 Calculating the parameters and plotting technological scheme .....	503
A7.3 Example of calculation results of scheme parameters.....	504
A7.4 Self-check .....	505
<b>A8 Calculation and Graphic Work</b> .....	<b>507</b>
A8.1 Theoretical clauses .....	507
A8.2 Calculating the parameters and plotting technological scheme .....	507
A8.3 Example of calculation results of scheme parameters.....	508
A8.4 Self-check .....	509
<b>A9 Calculation and Graphic Work</b> .....	<b>510</b>
A9.1 Theoretical clauses .....	510
A9.2 Calculating the parameters and plotting technological scheme .....	510
A9.3 Example of calculation results of scheme parameters.....	512
A9.4 Self-check .....	512
<b>A10 Calculation and graphic work</b> .....	<b>514</b>
A10.1 Theoretical clauses .....	514
A10.2 Calculating the parameters and plotting technological scheme .....	514
A10.3 Example of calculation results of scheme parameters.....	515
A10.4 Self-check .....	516
