

I Agricultural production 8

The field of tension between nutrition and food provision for a growing world population

Introduction to the topic

- Agriculture in the tropics – the basis for an adequate supply of food for a growing global population? 10

Subsistence farming in the tropics – a centuries-old tradition

- The milpa-solar system in Yucatán, Mexico – a tradition with a promising future? 12

Plantation farming in the tropics – producing for the global market

- Banana cultivation in Colombia – who profits? 14

Conflicts resulting from the expansion of large-scale monocultures

- Soybean cultivation in Argentina – economic success with side effects? 16

Farmland in the tropics – scarce and coveted

- Land grabbing as a contribution to food security? 18

The rise of genetic engineering

- Increasing yields through genetic engineering – a reasonable and effective approach? 20

The changing structure of US agriculture

- From family farm to large-scale agroindustrial operation 22
Irrigation farming as the trigger for far-reaching structural processes in agriculture – the Great Plains (USA) 24

Increasing agricultural productivity by specialisation and intensification?

- Industrial poultry production on the rise 26
The agricultural industry alters regions – the Oldenburger Münsterland 28
Greenhouse cultivation in the Netherlands 30

Intensification in the oceans as well?

- Can aquacultures contribute to food security? 32
The example of salmon breeding in Norway 32

Agribusiness or small-scale farming operations?

- Who ensures food security for humanity? 34

Topic overview

- The essentials in brief 36
SKILL CHECK 36

EXAMINATION TRAINING

- Is agribusiness economically and ecologically sustainable? 38
The example of tomato cultivation in California 38

II Economic regions in transition 40

Contributing factors and consequences

Introduction to the topic

- The changing economy 42

Spatial and structural change in old industrial regions

- The Ruhr region – a coal and steel district in transition 44
CentrO in Oberhausen – an example of successful structural change? 46

Location factors and decisions regarding location

- Agonising choices 48

The secondary sector – innovative and global

- The German textile industry – ensuring viability through innovation 50
Volkswagen, a global player – building a future with new production sites? 52

Clusters – hotspots of innovation

- Silicon Valley – a high-tech location with a bright future? 54

Tertiarisation of the economy

- The Frankfurt am Main region – a centre of the service sector 56

Introduction to the topic

- Countries and regions in global competition 58

Special economic zones for the promotion of economic growth

- The free trade zone in Shanghai (China) 60

Specialisation in specific industries

- Hyderabad (India): an IT location 62

Strategies employed to influence trade

- Free trade and protectionism 64

Topic overview

- The essentials in brief 66
SKILL CHECK 67

EXAMINATION TRAINING

- The changing automobile industry – the example of the USA 68

III Population development and migration

70

Causes of spatial problems

Introduction to the topic

| | |
|-----------------------------|----|
| Migration on a global scale | 72 |
|-----------------------------|----|

Crossing borders – international migration

| | |
|--|----|
| The causes of migration | 74 |
| Immigration – always in search of work | 76 |
| Emigration – migration as an opportunity for development | 78 |
| The borders of Europe | 80 |

Global population growth

| | |
|---|----|
| More and more people every day | 82 |
| A model of population development | 84 |
| Ageing and shrinking populations – demographic change in industrialised countries | 86 |
| Growth – demographic changes in developing countries | 88 |

Topic overview

| | |
|-------------------------|----|
| The essentials in brief | 90 |
| SKILL CHECK | 91 |

IV Global disparities

92

The challenge of unequal regional development

Introduction to the topic

| | |
|---|----|
| Global development – global disparities | 94 |
|---|----|

Comparing levels of development

| | |
|---|-----|
| Economic indicators | 96 |
| Social and multidimensional indicators | 98 |
| Underdeveloped countries, fast-developing countries, countries of the South – differences | 100 |

Different countries –

different preconditions for development

| | |
|---|-----|
| A Sahel nation with a colonial heritage – Mali | 102 |
| Mineral resources as a potential stimulus for development – Chile | 104 |

Extreme disparities within national borders

| | |
|------------------------|-----|
| Fragmentation in India | 106 |
|------------------------|-----|

Causes of underdevelopment

| | |
|--|-----|
| Different theories – different answers | 108 |
|--|-----|

Balancing global disparities

| | |
|--|-----|
| Strategies and ideas for development cooperation | 110 |
|--|-----|

“Development from below”

| | |
|--|-----|
| Microcredits for the rural poor – Bangladesh | 112 |
|--|-----|

Development through industrialisation

| | |
|--|-----|
| Expanding the secondary sector – South Korea | 114 |
|--|-----|

Tourism as a development driver in a developing country

| | |
|---|-----|
| An island becomes a tourist destination – Phuket (Thailand) | 116 |
| The conflict between mass tourism and sustainable tourism | 118 |

Balancing regional disparities

| | |
|---|-----|
| Driving growth by promoting regional economic development – China | 120 |
| Model approaches to promoting regional growth | 122 |

Topic overview

| | |
|-------------------------|-----|
| The essentials in brief | 124 |
| SKILL CHECK | 125 |

EXAMINATION TRAINING

| | |
|---|-----|
| Causes of underdevelopment – the example of Niger | 126 |
|---|-----|

V Towns and cities as complex settlement areas 128

Between tradition and progress

Introduction to the topic

| | |
|---|-----|
| Towns and cities – historical legacy and present-day living space | 130 |
|---|-----|

Historical-genetic town development in Europe

| | |
|---|-----|
| Cologne – of supra-regional importance for 2000 years | 132 |
| Cologne – rising from the ruins | 134 |

Functional structure of towns and cities in Central Europe

| | |
|------------------------------------|-----|
| Cologne – one city, many functions | 136 |
|------------------------------------|-----|

Social-spatial structure of towns and cities in Central Europe

| | |
|-----------------|-----|
| Boomtown Munich | 138 |
|-----------------|-----|

Models of urban development in Germany

| | |
|--|-----|
| Urban models of the Chicago School – are they applicable to Germany? | 140 |
|--|-----|

The central business district as a focal point for services

| | |
|------------------------|-----|
| In Bremen's inner city | 142 |
|------------------------|-----|

Urban tourism as an economic factor

| | |
|---------------------------------|-----|
| Hamburg as a travel destination | 144 |
|---------------------------------|-----|

Urban development in North America

| | |
|--|-----|
| The history of settlement in North America | 146 |
| Functional differentiation and suburbanisation – Chicago | 148 |
| Ethnic and social segregation – Los Angeles | 150 |

Topic overview

| | |
|-------------------------|-----|
| The essentials in brief | 152 |
| SKILL CHECK | 153 |

EXAMINATION TRAINING

| | |
|--|-----|
| Historical-genetic development and functional transformation of cities – the example of Regensburg | 154 |
|--|-----|

VI Metropolisation and marginalisation 156

Unavoidable processes in the context of worldwide urbanisation?

Introduction to the topic

| | |
|---------------------|-----|
| The world of cities | 158 |
|---------------------|-----|

Causes of the growth of megacities

| | |
|----------------------------|-----|
| The pull of cities – China | 160 |
|----------------------------|-----|

Primate cities – predominance in all fields

| | |
|---|-----|
| Unipolar orientation in South Korea – the Seoul Metropolitan Area | 162 |
|---|-----|

Marginalisation in megacities

| | |
|--|-----|
| Fragmentation – slum districts and gated communities in Buenos Aires | 164 |
|--|-----|

Megacities – with high vulnerability

| | |
|--|-----|
| Threats from natural and anthropogenic dangers – Tokyo | 166 |
|--|-----|

Solution strategies in megacities and metropolises

| | |
|--|-----|
| The fields of action of traffic, emissions and marginalisation | 168 |
|--|-----|

Topic overview

| | |
|-------------------------|-----|
| The essentials in brief | 170 |
| SKILL CHECK | 171 |

EXAMINATION TRAINING

| | |
|---|-----|
| Problems of megacities – the example of Lagos (Nigeria) | 172 |
|---|-----|

VII The city, a good place for all to live in? 174

Problems and strategies for future-oriented urban development

Introduction to the topic
The city as living space: different demands – different functions 176

Former port areas – problems and perspectives
The revitalisation of London’s East End 178

Population loss and solution concepts
Wittenberge – a shrinking town
Problem solving through clearance 180

A large city in decline?
Detroit – a shrinking city 182

New cities for the millions
Founding new cities in China 184

Spatial development and regional planning in Germany
The point-axial spatial concept 186
State development plan, North Rhine-Westphalia 188

METHOD: One spatial area – different evaluations
Multi-perspective spatial evaluation with the use of new media 190
Multi-perspective spatial evaluation of Cologne’s Riehl and Niehl districts 192

Global cities – modern centres of the world economy
New York – global city number one? 194

Modern cities – sustainable planning concepts?
Fujisawa – an “intelligent” town within a town 196
Lavasa – a multifunctional city 198

Topic overview
The essentials in brief 200
SKILL CHECK 201

VIII Goods and services – always available? 202

The importance of logistics and freight transport

Introduction to the topic
Goods and services in a global world economy 204

Global sourcing – a challenge for logistics and freight transport
Transport chains in global freight traffic 206

Markets must be accessible
Ports adapt themselves – Singapore
The transformation of the international air transport network 208
210

Shopping worldwide, day and night – the World Wide Web
Leipzig, a goods mail order centre 212

Call centres – networking of global services
Calling Manila – services around the clock 214

The ecological rucksack in goods transport
Where are we going? 216

The world in process of globalisation
Networked thinking – globalisation 218

Topic overview
The essentials in brief 220
SKILL CHECK 221

EXAMINATION TRAINING
Ports as hubs for goods transport – the example of Duisburg 222

Appendices 224

The university entrance diploma exam and long essay
The written university entrance diploma exam (Abitur) (skills and operators) 224
The oral university entrance diploma exam (Abitur) 226
Long essay (Facharbeit) 228
Index 230
Image Sources 232

Models and theoretical approaches

| | |
|---|-----|
| Ecological footprint | 34 |
| Industrial location theory (A. Weber) | 48 |
| Product life cycle | 51 |
| Theory of long waves (Kondratiev) | 51 |
| Push and pull model of migration | 74 |
| Demographic transition model | 84 |
| Model of global fragmentation | 106 |
| Model of spatial-chronological development (Vorlaufer) | 116 |
| Growth pole / cumulative growth (Myrdal) | 122 |
| Polarisation reversal (Richardson) | 123 |
| Models of urban functional division – Chicago School | 140 |
| Models of the emergence and structure of a German town | 141 |
| Model of a North American city | 149 |
| Fragmented city model | 164 |
| Model of a Latin American city | 165 |
| The Cradle to Cradle concept | 217 |
