CHAPTER	PAGE
1 INTRODUCTION	1
1.1 Advantages of the Sampling Method . . . . .	1
1.2 Some Uses of Sample Surveys . . . . .	2
1.3 The Principal Steps in a Sample Survey . . . . .	4
1.4 The Role of Sampling Theory . . . . .	8
1.5 Probability Sampling . . . . .	9
1.6 Alternatives to Probability Sampling . . . . .	10
1.7 Use of the Normal Distribution . . . . .	11
1.8 Bias and Its Effects . . . . .	12
1.9 The Mean Square Error . . . . .	15
<i>Exercises</i>	16
CHAPTER	
2 SIMPLE RANDOM SAMPLING	18
2.1 Simple Random Sampling . . . . .	18
2.2 Selection of a Simple Random Sample . . . . .	19
2.3 Definitions and Notation . . . . .	20
2.4 Properties of the Estimates . . . . .	21
2.5 Variances of the Estimates . . . . .	23
2.6 The Finite Population Correction . . . . .	24
2.7 Estimation of the Standard Error from a Sample . . . . .	25
2.8 Confidence Limits . . . . .	27
2.9 An Alternative Method of Proof . . . . .	28
2.10 Random Sampling with Replacement . . . . .	29
2.11 Estimation of a Ratio . . . . .	30
2.12 Estimates of Means Over Subpopulations . . . . .	34
2.13 Estimates of Totals Over Subpopulations . . . . .	35
2.14 Comparisons Between Domain Means . . . . .	39
2.15 Validity of the Normal Approximation . . . . .	39
2.16 Linear Estimators of the Population Mean . . . . .	44
<i>Exercises</i>	45

CHAPTER

<b>3</b>	<b>SAMPLING PROPORTIONS AND PERCENTAGES</b>	<b>50</b>
3.1	Qualitative Characteristics . . . . .	50
3.2	Variances of the Sample Estimates . . . . .	50
3.3	The Effect of $P$ on the Standard Errors . . . . .	53
3.4	The Binomial Distribution . . . . .	55
3.5	The Hypergeometric Distribution . . . . .	55
3.6	Confidence Limits . . . . .	57
3.7	Classification into More than Two Classes . . . . .	60
3.8	Confidence Limits with More than Two Classes . . . . .	60
3.9	The Conditional Distribution of $p$ . . . . .	61
3.10	Proportions and Totals Over Subpopulations . . . . .	63
3.11	Comparisons Between Different Domains . . . . .	64
3.12	Estimation of Proportions in Cluster Sampling . . . . .	64
	<i>Exercises</i>	68

CHAPTER

<b>4</b>	<b>THE ESTIMATION OF SAMPLE SIZE</b>	<b>72</b>
4.1	A Hypothetical Example . . . . .	72
4.2	Analysis of the Problem . . . . .	73
4.3	The Specification of Precision . . . . .	74
4.4	The Formula for $n$ in Sampling for Proportions . . . . .	75
4.5	Rare Items—Inverse Sampling . . . . .	76
4.6	The Formula for $n$ with Continuous Data . . . . .	77
4.7	Advance Estimates of Population Variances . . . . .	78
4.8	Sample Size with More than One Item . . . . .	81
4.9	Sample Size when Estimates Are Wanted for Subdivisions of the Population . . . . .	82
4.10	Sample Size in Decision Problems . . . . .	83
4.11	The Design Effect ( $Deff$ ) . . . . .	85
	<i>Exercises</i>	86

CHAPTER

<b>5</b>	<b>STRATIFIED RANDOM SAMPLING</b>	<b>89</b>
5.1	Description . . . . .	89
5.2	Notation . . . . .	90
5.3	Properties of the Estimates . . . . .	91
5.4	The Estimated Variance and Confidence Limits . . . . .	95
5.5	Optimum Allocation . . . . .	96

5.6	Relative Precision of Stratified Random and Simple Random Sampling . . . . .	99
5.7	When Does Stratification Produce Large Gains in Precision? . . . .	101
5.8	Allocation Requiring More than 100 Per Cent Sampling . . . . .	104
5.9	Estimation of Sample Size with Continuous Data . . . . .	105
5.10	Stratified Sampling for Proportions . . . . .	107
5.11	Gains in Precision in Stratified Sampling for Proportions . . . . .	109
5.12	Estimation of Sample Size with Proportions . . . . .	110
	<i>Exercises</i>	111

CHAPTER

5A	FURTHER ASPECTS OF STRATIFIED SAMPLING	115
5A.1	Effects of Deviations from the Optimum Allocation . . . . .	115
5A.2	Effects of Errors in the Stratum Sizes . . . . .	117
5A.3	The Problem of Allocation with More than One Item . . . . .	119
5A.4	Other Methods of Allocation with More than One Item . . . . .	121
5A.5	Two-Way Stratification with Small Samples . . . . .	124
5A.6	Controlled Selection . . . . .	126
5A.7	The Construction of Strata . . . . .	127
5A.8	Number of Strata . . . . .	132
5A.9	Stratification After Selection of the Sample (Poststratification) . . .	134
5A.10	Quota Sampling . . . . .	135
5A.11	Estimation from a Sample of the Gain Due to Stratification . . . .	136
5A.12	Estimation of Variance with One Unit per Stratum . . . . .	138
5A.13	Strata as Domains of Study . . . . .	140
5A.14	Estimating Totals and Means Over Subpopulations . . . . .	142
5A.15	Sampling from Two Frames . . . . .	144
	<i>Exercises</i>	146

CHAPTER

6	RATIO ESTIMATORS	150
6.1	Methods of Estimation . . . . .	150
6.2	The Ratio Estimate . . . . .	150
6.3	Approximate Variance of the Ratio Estimate . . . . .	153
6.4	Estimation of the Variance from a Sample . . . . .	155
6.5	Confidence Limits . . . . .	156
6.6	Comparison of the Ratio Estimate with Mean per Unit . . . . .	157
6.7	Conditions Under Which the Ratio Estimate Is a Best Linear Unbiased Estimator . . . . .	158
6.8	Bias of the Ratio Estimate . . . . .	160

6.9	Accuracy of the Formulas for the Variance and Estimated Variance . . . . .	162
6.10	Ratio Estimates in Stratified Random Sampling . . . . .	164
6.11	The Combined Ratio Estimate . . . . .	165
6.12	Comparison of the Combined and Separate Estimates . . . . .	167
6.13	Short-Cut Computation of the Estimated Variance . . . . .	169
6.14	Optimum Allocation with a Ratio Estimate . . . . .	172
6.15	Unbiased Ratio-type Estimates . . . . .	174
6.16	Comparison of the Methods . . . . .	177
6.17	Improved Estimation of Variance . . . . .	178
6.18	Comparison of Two Ratios . . . . .	180
6.19	Ratio of Two Ratios . . . . .	183
6.20	Multivariate Ratio Estimates . . . . .	184
6.21	Product Estimators . . . . .	186
	<i>Exercises</i>	186

## CHAPTER

## 7 REGRESSION ESTIMATORS 189

7.1	The Linear Regression Estimate . . . . .	189
7.2	Regression Estimates with Preassigned $b$ . . . . .	190
7.3	Regression Estimates when $b$ Is Computed from the Sample . . . . .	193
7.4	Sample Estimate of Variance . . . . .	195
7.5	Large-Sample Comparison with the Ratio Estimate and the Mean per Unit . . . . .	195
7.6	Accuracy of the Large-Sample Formulas for $V(\bar{y}_{lr})$ and $v(\bar{y}_{lr})$ . . . . .	197
7.7	Bias of the Linear Regression Estimate . . . . .	198
7.8	The Linear Regression Estimator Under a Linear Regression Model . . . . .	199
7.9	Regression Estimates in Stratified Sampling . . . . .	200
7.10	Regression Coefficients Estimated from the Sample . . . . .	201
7.11	Comparison of the Two Types of Regression Estimate . . . . .	203
	<i>Exercises</i>	203

## CHAPTER

## 8 SYSTEMATIC SAMPLING 205

8.1	Description . . . . .	205
8.2	Relation to Cluster Sampling . . . . .	207
8.3	Variance of the Estimated Mean . . . . .	207
8.4	Comparison of Systematic with Stratified Random Sampling . . . . .	212
8.5	Populations in "Random" Order . . . . .	212

8.6	Populations with Linear Trend . . . . .	214
8.7	Methods for Populations with Linear Trends . . . . .	216
8.8	Populations with Periodic Variation . . . . .	217
8.9	Autocorrelated Populations . . . . .	219
8.10	Natural Populations . . . . .	221
8.11	Estimation of the Variance from a Single Sample . . . . .	223
8.12	Stratified Systematic Sampling . . . . .	226
8.13	Systematic Sampling in Two Dimensions . . . . .	227
8.14	Summary . . . . .	229
	<i>Exercises</i>	231

## CHAPTER

9	<b>SINGLE-STAGE CLUSTER SAMPLING: CLUSTERS OF EQUAL SIZES</b>	233
9.1	Reasons for Cluster Sampling . . . . .	233
9.2	A Simple Rule . . . . .	234
9.3	Comparisons of Precision Made from Survey Data . . . . .	238
9.4	Variance in Terms of Intracluster Correlation . . . . .	240
9.5	Variance Functions . . . . .	243
9.6	A Cost Function . . . . .	244
9.7	Cluster Sampling for Proportions . . . . .	246
	<i>Exercises</i>	247

## CHAPTER

9A	<b>SINGLE-STAGE CLUSTER SAMPLING: CLUSTERS OF UNEQUAL SIZES</b>	249
9A.1	Cluster Units of Unequal Sizes . . . . .	249
9A.2	Sampling with Probability Proportional to Size . . . . .	250
9A.3	Selection with Unequal Probabilities with Replacement . . . . .	252
9A.4	The Optimum Measure of Size . . . . .	255
9A.5	Relative Accuracies of Three Techniques . . . . .	255
9A.6	Sampling with Unequal Probabilities Without Replacement . . . . .	258
9A.7	The Horvitz-Thompson Estimator . . . . .	259
9A.8	Brewer's Method . . . . .	261
9A.9	Murthy's Method . . . . .	263
9A.10	Methods Related to Systematic Sampling . . . . .	265
9A.11	The Rao, Hartley, Cochran Method . . . . .	266
9A.12	Numerical Comparisons . . . . .	267
9A.13	Stratified and Ratio Estimates . . . . .	270
	<i>Exercises</i>	272

## CHAPTER

10	SUBSAMPLING WITH UNITS OF EQUAL SIZE	274
10.1	Two-Stage Sampling	274
10.2	Finding Means and Variances in Two-Stage Sampling	275
10.3	Variance of the Estimated Mean in Two-Stage Sampling	276
10.4	Sample Estimation of the Variance	278
10.5	The Estimation of Proportions	279
10.6	Optimum Sampling and Subsampling Fractions	280
10.7	Estimation of $m_{opt}$ from a Pilot Survey	283
10.8	Three-Stage Sampling	285
10.9	Stratified Sampling of the Units	288
10.10	Optimum Allocation with Stratified Sampling	289
	<i>Exercises</i>	290

## CHAPTER

11	SUBSAMPLING WITH UNITS OF UNEQUAL SIZES	292
11.1	Introduction	292
11.2	Sampling Methods when $n = 1$	293
11.3	Sampling with Probability Proportional to Estimated Size	297
11.4	Summary of Methods for $n = 1$	299
11.5	Sampling Methods When $n > 1$	300
11.6	Two Useful Results	300
11.7	Units Selected with Equal Probabilities: Unbiased Estimator	303
11.8	Units Selected with Equal Probabilities: Ratio to Size Estimate	303
11.9	Units Selected with Unequal Probabilities with Replacement: Unbiased Estimator	306
11.10	Units Selected Without Replacement	308
11.11	Comparison of the Methods	310
11.12	Ratios to Another Variable	311
11.13	Choice of Sampling and Subsampling Fractions. Equal Probabilities	313
11.14	Optimum Selection Probabilities and Sampling and Subsampling Rates	314
11.15	Stratified Sampling. Unbiased Estimators	316
11.16	Stratified Sampling. Ratio Estimates	317
11.17	Nonlinear Estimators in Complex Surveys	318
11.18	Taylor Series Expansion	319
11.19	Balanced Repeated Replications	320
11.20	The Jackknife Method	321
11.21	Comparison of the Three Approaches	322
	<i>Exercises</i>	324

## CHAPTER

12	DOUBLE SAMPLING	327
12.1	Description of the Technique . . . . .	327
12.2	Double Sampling for Stratification . . . . .	327
12.3	Optimum Allocation . . . . .	331
12.4	Estimated Variance in Double Sampling for Stratification . . . . .	333
12.5	Double Sampling for Analytical Comparisons . . . . .	335
12.6	Regression Estimators . . . . .	338
12.7	Optimum Allocation and Comparison with Single Sampling . . . . .	341
12.8	Estimated Variance in Double Sampling for Regression . . . . .	343
12.9	Ratio Estimators . . . . .	343
12.10	Repeated Sampling of the Same Population . . . . .	344
12.11	Sampling on Two Occasions . . . . .	346
12.12	Sampling on More than Two Occasions . . . . .	348
12.13	Simplifications and Further Developments . . . . .	351
	<i>Exercises</i>	355

## CHAPTER

13	SOURCES OF ERROR IN SURVEYS	359
13.1	Introduction . . . . .	359
13.2	Effects of Nonresponse . . . . .	359
13.3	Types of Nonresponse . . . . .	364
13.4	Call-backs . . . . .	365
13.5	A Mathematical Model of the Effects of Call-backs . . . . .	367
13.6	Optimum Sampling Fraction Among the Nonrespondents . . . . .	370
13.7	Adjustments for Bias Without Call-backs . . . . .	374
13.8	A Mathematical Model for Errors of Measurement . . . . .	377
13.9	Effects of Constant Bias . . . . .	379
13.10	Effects of Errors that Are Uncorrelated Within the Sample . . . . .	380
13.11	Effects of Intrasample Correlation Between Errors of Measurement . . . . .	383
13.12	Summary of the Effects of Errors of Measurement . . . . .	384
13.13	The Study of Errors of Measurement . . . . .	384
13.14	Repeated Measurement of Subsamples . . . . .	386
13.15	Interpenetrating Subsamples . . . . .	388
13.16	Combination of Interpenetration and Repeated Measurement . . . . .	391
13.17	Sensitive Questions: Randomized Responses . . . . .	392
13.18	The Unrelated Second Question . . . . .	393
13.19	Summary . . . . .	395
	<i>Exercises</i>	396
