Preface	ix
Chapter 5 Graphics Processing	1
5.1 Pixels	1
5.2 Color Science	4
5.2.1 The CIE RGB Color Space	6
5.2.2 The CIE XYZ Color Space	8
5.2.3 The sRGB Color Space	12
5.3 Gamma Correction	18
5.4 World Structure	21
5.4.1 Coordinate Spaces	22
5.4.2 Transform Hierarchy	26
5.4.3 Vertex Transformations	28
5.5 The Graphics Pipeline	32
5.5.1 Geometry Processing	32
5.5.2 Pixel Processing	38
5.5.3 Frame Buffer Operations	45
Exercises for Chapter 5	51
Chapter 6 Projections	53
6.1 The View Frustum	53
6.2 Perspective-Correct Interpolation	58
6.3 Projection Matrices	64

6.3.1 Perspective Projection Matrices	66
6.3.2 Infinite Projection Matrices	69
6.3.3 Projected Depth Precision	71
6.3.4 Orthographic Projections	75
6.3.5 Frustum Plane Extraction	78
6.4 Oblique Clipping Planes	80
Exercises for Chapter 6	86
Chapter 7 Shaders	89
7.1 Rendering Fundamentals	90
7.1.1 Luminance	90
7.1.2 The Rendering Equation	94
7.2 Diffuse Reflection	96
7.3 Specular Reflection	100
7.4 Texture Mapping	104
7.4.1 Texture Coordinates	104
7.4.2 Conventional Texture Mapping	105
7.4.3 Cube Texture Mapping	106
7.5 Tangent Space	110
7.6 Bump Mapping	116
7.6.1 Normal Map Construction	117
7.6.2 Rendering with Normal Maps	120
7.6.3 Blending Normal Maps	122
7.7 Parallax Mapping	123
7.8 Horizon Mapping	127
7.8.1 Horizon Map Construction	129
7.8.2 Rendering with Horizon Maps	133
7.8.3 Ambient Occlusion Mapping	138
Exercises for Chapter 7	139
Chapter 8 Lighting and Shadows	141
8.1 Light Sources	141
8.1.1 Point Lights	142
8.1.2 Spot Lights	148
8.1.3 Infinite Lights	152

8.2	Extent Optimization	153
8.2.1	Scissor Rectangle	155
8.2.2	Depth Bounds	160
8.3	Shadow Maps	170
8.3.1	2D Shadow Maps	170
8.3.2	Cube Shadow Maps	174
8.3.3	Cascaded Shadow Maps	178
8.3.4	Shadow Depth Offset	190
8.4	Stencil Shadows	194
8.4.1	Rendering Algorithm	194
8.4.2	Variant Selection	200
8.4.3	Shadow Volumes	203
8.4.4	Optimizations	209
8.5	Fog	213
8.5.1	Absorption and Scattering	213
8.5.2	Halfspace Fog	217
	Exercises for Chapter 8	223
Chapter 9	Visibility and Occlusion	225
9.1	Polygon Clipping	225
9.2	Polyhedron Clipping	230
9.3	Bounding Volumes	240
9.3.1	Bounding Spheres	241
9.3.2	Bounding Boxes	245
9.4	Frustum Culling	253
9.4.1	Visibility Regions	254
9.4.2	Sphere Visibility	257
9.4.3	Box Visibility	259
9.5	Light Culling	261
9.6	Shadow Culling	264
9.7	Portal Systems	269
9.7.1	Zones and Portals	270
9.7.2	Light Regions	275
9.8	Occluders	278

9.9 Fog Occlusion	286
Exercises for Chapter 9	295
Chapter 10 Advanced Rendering	297
10.1 Decals	297
10.2 Billboards	300
10.2.1 Spherical Billboards	301
10.2.2 Cylindrical Billboards	305
10.2.3 Polyboards	307
10.2.4 Trimming	310
10.3 The Structure Buffer	312
10.4 Volumetric Effects	316
10.4.1 Halos	318
10.4.2 Shafts	321
10.5 Ambient Occlusion	328
10.5.1 The Occlusion Buffer	329
10.5.2 Depth-Aware Blurring	337
10.6 Atmospheric Shadowing	340
10.6.1 The Atmosphere Buffer	340
10.6.2 Sample Randomization	346
10.6.3 Anisotropic Scattering	347
10.6.4 Implementation	349
10.7 Motion Blur	355
10.7.1 The Velocity Buffer	356
10.7.2 Image Postprocessing	363
10.8 Isosurface Extraction	370
10.8.1 Marching Cubes	372
10.8.2 Preferred Polarity	375
10.8.3 Implementation	378
Exercises for Chapter 10	392
Index	393
