<b>Preface</b> .....	viii
<b>Acknowledgments</b> .....	ix
<b>About the Editors</b> .....	x
<b>About the Contributors</b> .....	xi

## Part I: The Nature of Groups

<b>Introduction</b> .....	1
*1. Groups as Systems. ....	3
<i>Linda D. Henman</i> Henman identifies the fundamental characteristics of a small group as viewed from a systems perspective.	
*2. Rethinking The Nature of Groups: A Bona Fide Group Perspective .....	8
<i>Linda L. Putnam</i> Putnam discusses the characteristics of small groups when they are viewed as subsets of larger groups.	
*3. Distinguishing Characteristics of Virtual Groups. ....	17
<i>Robyn E. Parker</i> Parker discusses the unique characteristics of “virtual” groups—collections of individuals who interact and function as a small group without being in the same place at the same time.	

## Part II: Theories of Small Group Communication

<b>Introduction</b> .....	25
*4. Effective Decision Making and Problem Solving in Groups: A Functional Perspective .....	27
<i>Dennis S. Gouran and Randy Y. Hirokawa</i> Gouran and Hirokawa explain how group communication influences group decision-making and problem-solving performance.	

---

\*Indicates chapter new to this edition.

*5. Symbolic Convergence Theory .....	39
---------------------------------------	----

*Ernest G. Bormann*

Bormann explains how and why group members come to share a common understanding for symbols and their accompanying meanings.

6. Group Communication and the Structuring Process .....	48
--	----

*Marshall Scott Poole*

Poole presents the major concepts and propositions of Structuration Theory and illustrates how they account for the emergence of structure in small groups.

## Part III: Organization of Groups

<i>Introduction</i> .....	57
---------------------------	----

*7. Time and Transition in Work Teams: Toward a New Model of Group Development .....	59
--	----

*Connie J. G. Gersick*

Gersick discusses a model of group development that characterizes the group development process as periods of stable routines that are disrupted by transition periods where abrupt and often dramatic changes occur.

*8. A Multiple Sequence Model of Group Decision Development. ....	76
---	----

*Marshall Scott Poole*

Poole explains why traditional unitary sequence models are inadequate for understanding group development, then proposes an alternative multiple sequence model that presents group development as a process consisting of continuously evolving tracks of group activities that intertwine over time.

## Part IV: Group Processes

<i>Introduction</i> .....	83
---------------------------	----

9. Spatial Relationships in Small Groups .....	85
--	----

*Judee K. Burgoon*

Burgoon explains how the spatial arrangement of group members influences comfort, status, leadership, interaction patterns, relational communication, and spatial deviancy in small groups.

---

\*Indicates chapter new to this edition.

10. Feedback Processes in Task Groups..... 97

*Beth Bonniwell Haslett and John R. Ogilvie*

Haslett and Ogilvie review what is known about the relationship between feedback and group performance, then examine some of the major factors that influence feedback in small groups.

\*11. Influencing Others in Group Interactions: Individual, Subgroup, Group, and Intergroup Processes ..... 109

*Renee A. Meyers and Dale E. Brashers*

Meyers and Brashers provide an overview of prominent theories, models, and research studies concerning influence processes in small groups.

## Part V: Groups and Teams

*Introduction* ..... 123

12. Communication and Group Decision-Making Efficacy..... 125

*Randy Y. Hirokawa*

Hirokawa discusses the role that group communication plays in group decision-making effectiveness.

\*13. New Communication Technologies and Teams ..... 134

*Craig R. Scott*

Scott summarizes research on team-based New Communication Technologies (NCTs) in three contexts: education, organizations, and research laboratories.

\*14. Characteristics of Effective Health Care Teams ..... 148

*Randy Y. Hirokawa, Daniel DeGooyer, Jr., and Kathleen S. Valde*

Hirokawa, DeGooyer, and Valde discuss five factors that influence the performance of health care teams: external support, member attributes, relationships, organization, and process.

\*15. Teaming with Emotion: The Impact of Emotionality on Work-Team Collaboration..... 158

*Carolyn C. Clark and Richard W. Sline*

Clark and Sline report on a study that examines the role of emotions in group and team performance.

## Part VI: Leadership in Groups

*Introduction* ..... 169

---

\*Indicates chapter new to this edition.

- \*16. Leadership as the Art of Counteractive Influence in Decision-Making and Problem-Solving Groups ..... 172  
*Dennis S. Gouran*  
 Gouran portrays group leadership as the art of getting a group back onto its "goal path" when the interaction of its members lead it astray from its intended direction.
17. Leadership and Gender: Challenging Assumptions and Recognizing Resources ..... 184  
*Susan B. Shimanoff and Mercilee M. Jenkins*  
 Shimanoff and Jenkins present a comprehensive review of research devoted to differences and similarities of women and men in group leadership roles.
18. Leadership as Organizing ..... 199  
*J. Kevin Barge*  
 Barge examines the research on group leadership and argues that group leadership is best viewed as a form of organizing.

## Part VII: Diversity in Groups

- Introduction* ..... 215
- \*19. Sex, Gender, and Communication in Small Groups ..... 218  
*Nina M. Reich and Julia T. Wood*  
 Reich and Wood examine the influence of biological sex and gender on patterns of communication in small groups.
20. Communication in the Multicultural Group ..... 230  
*Richard E. Porter and Larry A. Samovar*  
 Porter and Samovar discuss various dimensions of culture that condition how we send and receive messages in small groups.
- \*21. Cross-Cultural and Intercultural Work Group Communication ..... 239  
*John G. Oetzel, Mary Meares, and Akiko Fukumoto*  
 Oetzel, Meares, and Fukumoto compare how Americans and Japanese communicate in task-oriented groups.

## Part VIII: Analyzing Group Communication

- Introduction* ..... 253

---

\*Indicates chapter new to this edition.

*22. Observing Group Interaction . . . . .	256
<i>Joann Keyton</i>	
Keyton provides an overview of the observational method called interaction process analysis.	
*23. Narrative Analysis of Group Communication. . . . .	267
<i>Randy Y. Hirokawa, Kathleen M. Clauson, and Juliann Dahlberg</i>	
Hirokawa, Clauson, and Dahlberg discuss the utility of using narrative analysis to study small group communication.	
*24. Evaluating Group Discussion. . . . .	275
<i>Steven A. Beebe and J. Kevin Barge</i>	
Beebe and Barge describe the <i>Competent Group Communication Evaluation Form</i> —an assessment instrument used to help group members determine whether their group is communicating effectively.	
<b>Subject Index</b> . . . . .	289
