|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <i>Abbreviations</i> .....                                                                                                                                            | <i>ix</i>   |
| <i>Preface</i> .....                                                                                                                                                  | <i>xiii</i> |
| <i>About the Editors</i> .....                                                                                                                                        | <i>xv</i>   |
| <br>                                                                                                                                                                  |             |
| <b>1. Biopolymers in the Textile Industry</b> .....                                                                                                                   | <b>1</b>    |
| Asim Kumar Roy Choudhury                                                                                                                                              |             |
| <b>2. Importance of Wood Preservation: An Indian Overview</b> ....                                                                                                    | <b>19</b>   |
| Aparna Kalawate                                                                                                                                                       |             |
| <b>3. Cashew Nut Shell Liquid-Based Advanced Functional Materials</b> .....                                                                                           | <b>33</b>   |
| Shabnam Khan, Laxmi, Hina Zafar, Eram Sharmin,<br>Fahmina Zafar, and Nahid Nishat                                                                                     |             |
| <b>4. Synthesis and Characterization of Cashew Nut Shell Liquid Matrix Compositions for Composites Applications</b> .....                                             | <b>67</b>   |
| A. V. Sawant, A. R. Takalkar, and K. Padmanabhan                                                                                                                      |             |
| <b>5. Synthetic Approach for Polyurethane from Renewable Materials (Cashew Nut Husk Tannin)</b> .....                                                                 | <b>75</b>   |
| A. J. Sunija and S. Siva Ilango                                                                                                                                       |             |
| <b>6. Recycling of Textile Mill (Cellulosic) Waste into Carboxymethyl Cellulose for Textile Printing</b> .....                                                        | <b>91</b>   |
| Javed Sheikh and V. D. Gotmare                                                                                                                                        |             |
| <b>7. Sustainable Noise Control Materials Based on Bamboo/Unsaturated Polyester Composites: Analysis of Factors Affecting the Sound Absorption Coefficients</b> ..... | <b>101</b>  |
| Elammaran Jayamani, Sinin Hamdan, and<br>Muhammad Khusairy Bin Bakri                                                                                                  |             |

8. **Morphological and Dynamic Mechanical Properties of Chemically Treated Bauhinia Racemosa/Glass Fibre Polymer Composites** ..... 115  
J. Ronald Aseer, K. Sankaranarayasamy, P. Jeyabalan, and Priya K. Dasan
9. **Optimization of Plasma Modification for Low-Temperature Dyeing of Silk Fabric** ..... 127  
M. D. Teli, Pintu Pandit, and Kartick K. Samanta
10. **Partial Replacement of Carbon Black by Rice Hulls and Soy Short Fibres as Fillers in Natural Rubber Composites: Effect on Mechanical Properties** ..... 147  
Ajay Vasudeo Rane, Krishnan Kanny, Abitha V. K., and Sabu Thomas
11. **Bio-Resins and Bioplastics Synthesized from Agricultural Products for Novel Applications: The Indian Projection** ..... 199  
Padmanabhan K.
12. **Mechanical Properties of Sandwich Composites Made Using Natural Fibres and Glass Fibre Mat** ..... 207  
R. Gopinath, K. Ganesan, R. Poopathi
13. **Fabrication and Characterization of Composite Membrane of Cross-Linked Polyvinyl Alcohol and Hydroxyapatite for Tissue Engineering** ..... 219  
Debapriya Banerjee, Anindya Haldar, and Piyali Basak
14. **In Situ Nanosilver-Immobilized Chitosan/Oxidized Carboxymethylcellulose Blend Dressings for Wound Management** ..... 231  
Shakeel Ahmed and Saiqa Ikram
15. **Synthesis and Characterization of Biodegradable Polyether Urethane for the Purpose of Controlled Release of Antibiotics** ..... 253  
Anindya Haldar, Sohini Sen, Debapriya Banerjee, Nandan Kumar Jana, and Piyali Basak

|            |                                                                                                             |            |
