Introduction	xi	CUI Switcher	49
1 Introduction to Computer Graphics, 3D Animation, and 3ds max.	1	Conclusion	50
Objectives	1	3 Working with Files and Objects	51
Digital Content	1	Objectives	51
3D Computer Animation—		Introduction	51
How Does it Work?	8	File Link Manager	57
What Does 3ds max Do?	8	Creating and Modifying Objects	59
Industry Workflow	13	AutoGrid	62
Speaking 3ds max	14	Modifier Stack Display	72
2 User Interface	17	Object Selection	79
Objectives	17	Selection Sets, Groups and Layers	81
Introduction	17	Conclusion	91
User Interface	17	4 Transforming Objects	93
Viewport Size and Layout	22	Objectives	93
Menu Bar	28	Introduction	93
Toolbars	35	Transforms	93
Command Panels	39	Cloning Objects	101
Dialogs	43	Object Snaps	105
Quad Menu	43	Coordinate Systems	109
Transform Type-In Dialogs	45	Additional Transformation Methods	114
Status Bar and Prompt Line	46	Conclusion	119
Toggles	46		
Animation Mode	47		

5	Overview Lab	121	9	Animation Lab	209
	Objectives	121		Objectives	209
	Introduction	121		Introduction	209
	Creating the Clown	130		Simple Animation	209
	Animating the Scene	135		Animating Modifiers	212
	Conclusion	141		Creating Hierarchies	218
6	Fundamental Animation Techniques and Track View	143		Animating Elements	219
	Objectives	143		Animation Helpers	222
	Introduction	143		Animation Control	225
	Keyframe Animation	144		Animating with IK	226
	Set Key Filters	149		Conclusion	230
	Editing Keyframes	149	10	Shapes	231
	Using Track View	153		Objectives	231
	Dope Sheet vs. Curve Editor	162		Introduction	231
	Tangent Types	162		Shape Terminology	231
	Euler Rotation Controller	168		Creating Spline Shapes	235
	Pivots Points	170		Editing Shapes	244
	Object Linking	172		The Edit Spline Modifier	246
	Creating a Forward Kinematic Animation	174		Shape Modifiers	262
	Delete Selected Animation	175		Conclusion	272
	Conclusion	176	11	More Objects and Modifiers	273
7	Camera Animation Techniques	177		Objectives	273
	Objectives	177		Introduction	273
	Introduction	177		Modifier Concepts	273
	Cameras	177		The Modifier Stack Display	274
	Adjusting Cameras	178		Some Example Modifiers	277
	The Path Constraint	186		Symmetry Modifier	283
	Assigning a Path Constraint	188		Compound Objects	285
	Pausing Motion Along a Path	190		Lofts	293
	Rendering Animations	195		Editing Lofts	294
	Conclusion	200		Connect	299
8	Inverse Kinematics	201		Patch Modeling	302
	Objectives	201		Modeling a Vase	311
	Introduction	201		Conclusion	313
	Understanding IK	201	12	Low Poly Modeling	315
	IK vs. FK	202		Objectives	315
	Making an IK Chain	205		Introduction	315
	Conclusion	207		Objects and Sub-Objects	317
				Basics of Low-Poly Modeling	326
				Conclusion	353

13 Environment and Low-Poly Creation Lab	355	18 Basic Lighting	513
Objectives	355	Objectives	513
Introduction	355	Introduction	513
Creating the Knight Scene	355	The Properties of Light	515
Edit Poly Enhancements	372	Free, Target, and Area Lights	517
Conclusion	377	Light Parameters	519
		Basic Lighting Concepts	539
		Conclusion	548
14 Introduction to Materials	379	19 Basics of Global Illumination	549
Objectives	379	Objectives	549
Introduction	379	Introduction	549
Material Editor Basics	379	Light Tracer	550
Customizing the Material Editor	385	Radiosity	551
Basic Material Parameters	393	mental ray	552
The Standard Material	394	Shadows	575
Conclusion	413	Conclusion	581
15 More Materials	415	20 Rendering with Global Illumination	583
Objectives	415	Objectives	583
Introduction	415	Introduction	583
Materials	415	Light Tracer	583
Bitmaps and Procedural maps	416	Radiosity	588
Map Channels	418	Exposure Controls	600
Creating Materials	425	Advanced Lighting Override Material	606
UVW Mapping	442	Architectural Material with Radiosity	609
Conclusion	449	Conclusion	610
16 Mapping for Real Time	451	21 Cameras & Rendering	611
Objectives	451	Objectives	611
Introduction	451	Introduction	611
Unwrap UVWs	451	Camera Basics	612
Render to Texture	470	Creating Cameras	616
Normal Map Creation Tools	478	Rendering	630
Conclusion	484	The Render Scene Dialog	632
		Using mental ray®	653
		Conclusion	660
17 Materials Lab	485		
Objectives	485		
Introduction	485		
Conclusion	511		

22 Scene Assembly	661	25 Effects	715
Objectives	661	Objectives	715
Introduction	661	Introduction	715
Adding Scene Elements	662	Basic Particles	716
Creating Materials	664	Exploding Objects	723
Creating Effective Lighting	671	Particle Flow	729
Radiosity Rendered Animation	677	Flows, Operators, and Tests	731
Rendering Options and Output	680	Space Warps, Forces, and Deflectors	738
Light Tracer Rendering	682	Making a Particle Effect	741
Rendering with mental ray	683	Conclusion	750
Saving Objects to a New Scene	685		
Conclusion	686	26 Full Day Lab	751
23 Scripting	687	Objectives	751
Objectives	687	Introduction	751
Introduction	687	How to Proceed	752
MAXScript Listener	688	Conclusion	760
Syntax & Organization	690		
Sample Script	691	3ds max glossary	761
Common Script Commands	692		
sScript Writing	698		
Conclusion	700		
24 Dynamics	701		
Objectives	701		
Introduction	701		
Using Reactor	701		
Reactor Tools	704		
Update MAX	712		
Conclusion	714
