

BRIEF CONTENTS

Preface	xxi
Acknowledgments	xxv
About the Author	xxvii
Chapter 1 • An Introduction to Learning	1
Chapter 2 • The Modification of Instinctive Behavior	15
Chapter 3 • Principles and Applications of Pavlovian Conditioning	39
Chapter 4 • Theories of Pavlovian Conditioning	81
Chapter 5 • Principles and Applications of Appetitive Conditioning	111
Chapter 6 • Principles and Applications of Aversive Conditioning	151
Chapter 7 • Theories of Appetitive and Aversive Conditioning	187
Chapter 8 • Biological Influences on Learning	211
Chapter 9 • Traditional Learning Theories	249
Chapter 10 • Stimulus Control of Behavior	267
Chapter 11 • Cognitive Control of Behavior	303
Chapter 12 • The Storage of Our Experiences	341
Chapter 13 • Memory Retrieval and Forgetting	381
Glossary	411
References	423
Author Index	469
Subject Index	491

DETAILED CONTENTS

Preface	xxi
Acknowledgments	xxv
About the Author	xxvii
Chapter 1 • An Introduction to Learning	1
The Gift of Knowledge	1
A Definition of Learning	2
Functionalism	3
Behaviorism	4
The Importance of Associations	4
British Empiricism	4
Thorndike	5
Before You Go On	7
Review	7
Pavlov	8
Watson	9
Before You Go On	10
Review	11
The Ethics of Conducting Research	12
Conducting Research With Human Subjects	12
The Use of Nonhuman Animals in Research	12
Before You Go On	13
Review	13
Critical Thinking Questions	14
Key Terms	14
Chapter 2 • The Modification of Instinctive Behavior	15
If Only This Time	15
The Instinctive Basis of Behavior	16
Lorenz–Tinbergen Model	17
Interaction of Internal Pressure and Environmental Release	17
The Importance of Experience	18
Before You Go On	19
Review	19
Habituation and Sensitization	20
The Habituation and Sensitization Processes	20
Determinants of the Strength of Habituation and Sensitization	22
The Nature of Habituation and Sensitization	24

<i>Dual-Process Theory</i>	24
<i>Evolutionary Theory</i>	25
Dishabituation	26
The Dishabituation Process	26
The Nature of Dishabituation	27
Learning in the <i>Aplysia Californica</i>	28
Studying Learning in <i>Aplysia Californica</i>	28
The Neuroscience of Learning in <i>Aplysia Californica</i>	29
Before You Go On	31
Review	31
Opponent-Process Theory	31
The Initial Reaction	32
The Intensification of the Opponent B State	33
The Addictive Process	35
Before You Go On	36
Review	36
Critical Thinking Questions	37
Key Terms	37
Chapter 3 • Principles and Applications of Pavlovian Conditioning	39
A Lingering Fear	39
Principles of Pavlovian Conditioning	40
The Conditioning Process	40
<i>Basic Components</i>	40
The Conditioning of Hunger	41
<i>The Motivational Properties of Conditioned Hunger</i>	42
<i>The Neuroscience of Conditioned Hunger</i>	42
The Conditioning of Fear	43
<i>The Motivational Properties of Conditioned Fear</i>	44
<i>The Neuroscience of Conditioned Fear</i>	45
<i>Other Examples of Conditioned Responses</i>	45
Conditioning Techniques	46
<i>Eyeblink Conditioning</i>	46
<i>Fear Conditioning</i>	47
<i>Flavor Aversion Learning</i>	48
Temporal Relationships Between the Conditioned Stimulus and the Unconditioned Stimulus	48
Delayed Conditioning	49
Trace Conditioning	49
Simultaneous Conditioning	50
Backward Conditioning	50
Temporal Conditioning	50
Before You Go On	51
Review	51
Conditions Affecting the Acquisition of a Conditioned Response	51
Contiguity	51
<i>The Optimal Conditioned Stimulus–Unconditioned Stimulus Interval</i>	52
<i>Long-Delay Learning</i>	52

The Influence of Intensity	53
<i>Conditional Stimulus Intensity</i>	53
<i>Unconditional Stimulus Intensity</i>	54
The Salience of the Conditioned Stimulus	54
The Predictiveness of the Conditioned Stimulus	55
<i>Unconditioned Stimulus-Alone Presentations</i>	56
<i>Conditioned Stimulus-Alone Presentations</i>	57
The Redundancy of the Conditioned Stimulus	57
<i>The Importance of Surprise</i>	58
<i>The Neuroscience of Predictiveness and Surprise</i>	58
Before You Go On	59
Review	59
Extinction of the Conditioned Response	59
Extinction Procedure	60
How Rapidly Does a Conditioned Response Extinguish?	61
Spontaneous Recovery	62
Other Inhibitory Processes	62
Conditioned Inhibition	62
External Inhibition	63
Inhibition of Delay	63
Disinhibition	63
Before You Go On	64
Review	64
A Conditioned Response Without Conditioned Stimulus– Unconditioned Stimulus Pairings	65
Higher-Order Conditioning	65
<i>The Higher-Order Conditioning Process</i>	65
<i>Research on Higher-Order Conditioning</i>	66
Sensory Preconditioning	68
<i>The Sensory Preconditioning Process</i>	68
<i>Research on Sensory Preconditioning</i>	68
<i>The Neuroscience of Higher-Order Conditioning and Sensory Preconditioning</i>	69
Vicarious Conditioning	69
<i>Research on Vicarious Conditioning</i>	69
<i>The Importance of Arousal</i>	70
Before You Go On	70
Review	70
Applications of Pavlovian Conditioning	71
Systematic Desensitization	71
<i>The Contribution of Mary Cover Jones</i>	71
<i>Original Animal Studies</i>	71
<i>Clinical Treatment</i>	72
<i>Clinical Effectiveness</i>	74
Extinction of Drug Craving	76
Before You Go On	78
Review	78
Critical Thinking Questions	79
Key Terms	79

Chapter 4 • Theories of Pavlovian Conditioning	81
He Never Saw It Coming	81
The Nature of the Conditioned Response	82
Stimulus-Substitution Theory	82
The Conditioning of an Opponent Response	84
Research on Conditioning of an Opponent Response	84
The Conditioning of Drug Tolerance	84
The Conditioned Withdrawal Response	86
Sometimes-Opponent-Process Theory	87
The Conditioning of the A2 Response	87
Backward Conditioning of an Excitatory Conditioned Response	89
Problems With Sometimes-Opponent-Process Theory	90
Affective Extension of Sometimes-Opponent-Process Theory	91
Before You Go On	92
Review	92
The Nature of the Pavlovian Conditioning Process	93
Rescorla–Wagner Associative Model	93
The Unconditioned Stimulus Preexposure Effect	95
The Potentiation of a Conditioned Response	97
The Conditioned Stimulus Preexposure Effect	99
The Cue Deflation Effect	100
The Importance of Within-Compound Associations	100
Before You Go On	101
Review	101
A Comparator Theory of Pavlovian Conditioning	102
Mackintosh’s Attentional View	103
Learned Irrelevance and Pavlovian Conditioning	103
Reinstatement of Attention and the Conditioned Stimulus Preexposure Effect	104
The Role of Uncertainty in Pavlovian Conditioning	105
The Neuroscience of Predictiveness and Uncertainty	106
The Retrospective Processing View	106
Before You Go On	108
Review	108
Critical Thinking Questions	109
Key Terms	109
Chapter 5 • Principles and Applications of Appetitive Conditioning	111
A Loss of Control	111
The Legacy of B. F. Skinner	112
Instrumental and Operant Conditioning	113
Types of Reinforcement	115
Shaping	117
Training a Rat to Bar Press	118
Shaping Food Consumption in Children With Autism	119
Before You Go On	119
Review	119

Schedules of Reinforcement	120
Fixed-Ratio Schedules	120
Variable-Ratio Schedules	122
Fixed-Interval Schedules	123
Variable-Interval Schedules	124
Differential Reinforcement of High Responding Schedules	124
Differential Reinforcement of Low Responding Schedules	125
Differential Reinforcement of Other Behavior Schedule	126
Compound Schedules	126
Before You Go On	126
Review	126
How Readily Is an Instrumental or Operant Response Learned?	127
The Importance of Contiguity	127
<i>The Effect of Delay</i>	127
<i>Delay of Reward and Conditioning in Humans</i>	128
The Impact of Reward Magnitude	128
<i>The Acquisition of an Instrumental or Operant Response</i>	128
<i>The Performance of an Instrumental or Operant Response</i>	129
<i>The Importance of Past Experience</i>	131
<i>The Neuroscience of Behavioral Contrast</i>	132
<i>The Influence of Reward Magnitude in Humans</i>	132
Before You Go On	132
Review	132
Extinction of an Instrumental or Operant Response	133
The Discontinuance of Reinforcement	133
Spontaneous Recovery	133
The Aversive Quality of Nonreward	134
Activation of an Instrumental or Operant Behavior	135
Partial Reinforcement and Resistance to Extinction	135
The Partial Reinforcement Effect	136
The Nature of the Partial Reinforcement Effect	137
Before You Go On	139
Review	140
Contingency Management	140
The Assessment Stage	140
The Contingency Contracting Stage	142
The Implementation of the Contingency Management Program	143
Before You Go On	149
Review	149
Critical Thinking Questions	150
Key Terms	150
Chapter 6 • Principles and Applications of Aversive Conditioning	151
A Good Spanking	151
Principles of Aversive Conditioning	152
Escape Conditioning	153
The Escape From Aversive Events	153
<i>The Intensity of the Aversive Event</i>	153

<i>The Magnitude of Negative Reinforcement</i>	155
<i>The Impact of Delayed Negative Reinforcement</i>	155
The Elimination of an Escape Response	156
<i>The Removal of Negative Reinforcement</i>	156
<i>The Absence of Aversive Events</i>	157
Vicious Circle Behavior	157
Before You Go On	159
Review	159
The Avoidance of Aversive Events	159
Types of Avoidance Behavior	159
<i>Active Avoidance Learning</i>	160
<i>Passive Avoidance Learning</i>	161
How Readily Is Avoidance Behavior Learned?	161
<i>The Severity of the Aversive Event</i>	161
<i>The Delay Interval Between the Conditioned Stimulus and the Unconditioned Stimulus</i>	162
Before You Go On	163
Review	163
Punishment	164
Types of Punishment	164
The Effectiveness of Punishment	165
The Severity of Punishment	166
The Consistency of Punishment	168
Delay of Punishment	170
The Negative Consequences of Punishment	171
Pain-Induced Aggression	171
The Modeling of Aggression	173
The Aversive Quality of a Punisher	173
Additional Negative Effects of Punishment	174
Before You Go On	175
Review	175
Applications of Aversive Conditioning	176
Response Prevention, or Flooding	176
<i>Effectiveness of Flooding</i>	176
<i>The Neuroscience of Flooding</i>	177
Punishment	178
<i>Positive Punishment</i>	178
<i>Response Cost</i>	182
<i>Time-Out From Reinforcement</i>	183
The Ethical Use of Punishment	184
Before You Go On	185
Review	185
Critical Thinking Questions	186
Key Terms	186
Chapter 7 • Theories of Appetitive and Aversive Conditioning	187
A Lack of Self-Control	187
The Nature of Reinforcement	188
Probability-Differential Theory	188

Application: The Use of Activity Reinforcement	189
Response Deprivation Theory	191
Principles of Behavioral Economics	192
Behavioral Allocation	192
Choice Behavior	194
<i>Matching Law</i>	195
<i>Maximizing Law</i>	199
<i>The Neuroscience of Choice Behavior</i>	200
Before You Go On	200
Review	200
The Pain of Failure	201
The Nature of Avoidance Learning	201
Two-Factor Theory of Avoidance Learning	202
Criticisms of Two-Factor Theory	202
D'Amato's View of Avoidance Learning	203
Before You Go On	206
Review	206
The Nature of Punishment	207
Thorndike's Negative Law of Effect	207
Guthrie's Competing Response View	207
Two-Factor Theory of Punishment	208
Estes's Motivational View of Punishment	208
Before You Go On	209
Review	209
Critical Thinking Questions	210
Key Terms	210
Chapter 8 • Biological Influences on Learning	211
A Nauseating Experience	211
Generality of the Laws of Learning	212
A Behavior Systems Approach	213
Animal Misbehavior	215
Before You Go On	218
Review	219
Schedule-Induced Behavior	219
Schedule-Induced Polydipsia	220
Other Schedule-Induced Behaviors	220
The Nature of Schedule-Induced Behavior	221
Schedule-Induced Polydipsia and Human Alcoholism	222
Flavor Aversion Learning	224
The Selectivity of Flavor Aversion Learning	224
The Nature of Flavor Aversion Learning	226
<i>Learned-Safety Theory</i>	226
<i>Concurrent Interference View</i>	227
Flavor Aversion Learning in Humans	228
The Neuroscience of Flavor Aversion Learning	228
Flavor Preference Learning	228

The Nature of Flavor Preference Learning	229
The Neuroscience of Flavor Preference Learning	230
Before You Go On	231
Review	231
Imprinting	231
Infant Love	232
Nature of Imprinting	233
<i>An Associative View of Imprinting</i>	233
<i>An Instinctive View of Imprinting</i>	235
The Neuroscience of Social Attachments	236
The Avoidance of Aversive Events	236
Species-Specific Defense Reactions	236
Predispositions and Avoidance Learning	238
Species-Specific Defense Reactions in Humans	238
Before You Go On	238
Review	239
The Biology of Reinforcement	239
Electrical Stimulation of the Brain	239
The Influence of the Medial Forebrain Bundle	240
<i>The Reinforcing Effect of Medial Forebrain Bundle Stimulation</i>	240
<i>The Motivational Influence of Medial Forebrain Bundle Stimulation</i>	241
<i>The Influence of Reinforcement on the Functioning of the Medial Forebrain Bundle</i>	241
<i>The Influence of Deprivation on the Medial Forebrain Bundle</i>	242
The Neuroscience of Reinforcement	242
<i>Function of the Two Reinforcement Systems</i>	242
<i>Dopaminergic Control of Reinforcement</i>	244
<i>Opiate Activation of the Tegmentostriatal Pathway</i>	246
The Neuroscience of Addiction	246
Before You Go On	247
Review	247
Critical Thinking Questions	248
Key Terms	248
Chapter 9 • Traditional Learning Theories	249
The Oldies But Goodies	249
Traditional Learning Theories	250
Hull's Associative Theory	250
Motivation and Associative Learning	251
<i>Unconditioned Sources of Drive</i>	251
<i>Acquired Drives</i>	253
The Reinforcing Function of Drive Reduction	253
The Elimination of Unsuccessful Behavior	253
Incentive Motivation	254
An Evaluation of Associative Theory	255
Spence's Acquired Motive Approach	256
Motivation and the Anticipation of Reward	256
Motivation and the Avoidance of Frustrating Events	257
Nature of Anticipatory Behavior	257

Before You Go On	258
Review	258
Guthrie's Contiguity View	258
The Impact of Reward	259
The Importance of Practice	259
Breaking a Habit	260
An Evaluation of Contiguity Theory	261
Before You Go On	262
Review	262
Tolman's Purposive Behaviorism	263
The Flexibility of Behavior	263
Motivation and Expectancy Theory	263
Is Reward Necessary for Learning?	264
An Evaluation of Purposive Behaviorism	264
Before You Go On	265
Review	265
Critical Thinking Questions	265
Key Terms	266
Chapter 10 • Stimulus Control of Behavior	267
A Disappointing Review	267
The Stimulus Generalization Process	268
Generalization Gradients	269
<i>Excitatory Generalization Gradients</i>	270
<i>Inhibitory Generalization Gradients</i>	272
The Nature of the Stimulus Generalization Process	275
Before You Go On	276
Review	276
Discrimination Learning	277
Discriminative Control of Behavior	278
The Neuroscience of Discrimination Learning	279
Two-Choice Discrimination Tasks	279
Conditional Discrimination Task	280
Behavioral Contrast	282
Before You Go On	283
Review	283
Occasion Setting	284
The Properties of a Pavlovian Occasion-Setting Stimulus	284
Pavlovian Occasion-Setting Stimuli and Operant Behavior	286
Discriminative Stimuli and Conditioned Responses	286
Context as Occasion-Setting Stimulus	288
The Neuroscience of Occasion-Setting Stimuli	288
Before You Go On	289
Review	289
Hull-Spence Theory of Discrimination Learning	289
Development of Conditioned Excitation and Inhibition	290
The Peak Shift Phenomenon	290
The Aversive Character of S ^A	292

Errorless Discrimination Training	292
Training Procedure	292
Nonaversive S ^A	294
Application: Errorless Discrimination Training in Humans	294
The Transposition Effect	295
Sutherland and Mackintosh's Attentional View	297
The Recognition of the Relevant Dimension	297
Association of the Analyzer With a Response	298
Predictive Value of Discriminative Stimuli	298
Continuity Versus Noncontinuity	299
Before You Go On	300
Review	300
Critical Thinking Questions	301
Key Terms	301
Chapter 11 • Cognitive Control of Behavior	303
The Insurmountable Barrier	303
Tolman's Purposive Behaviorism	304
Learning Principles	305
Place-Learning Studies	305
<i>T-Maze Experiments</i>	305
<i>Alternate-Path Studies</i>	306
The Neuroscience of Cognitive Maps	307
Is Reward Necessary for Learning?	308
<i>Latent-Learning Studies</i>	308
Before You Go On	310
Review	310
A Mental Representation of Events	310
Associative-Link Expectancies	311
<i>Irrelevant Incentive Effect</i>	312
Behavior-Reinforcement Beliefs	314
<i>Reinforcement Devaluation Effect</i>	314
<i>The Neuroscience of Behavior-Reinforcement Beliefs</i>	316
The Importance of Habits	316
The Neuroscience of Stimulus-Response Habits	317
Before You Go On	317
Review	318
Learned Helplessness	318
An Expectancy Theory of Learned Helplessness	318
<i>Original Animal Research</i>	319
<i>Similarities of Helplessness and Depression</i>	319
<i>Criticism of the Expectancy Theory of Learned Helplessness</i>	321
An Attributional Theory of Learned Helplessness	322
<i>Personal Versus Universal Helplessness</i>	322
<i>Global Versus Specific Causal Attributions</i>	323
<i>Stable Versus Unstable Causal Attributions</i>	323
<i>Severity of Depression</i>	324
Hopelessness Theory of Depression	324

Negative Life Events and Hopelessness	324
A Negative Explanatory Style and Vulnerability to Depression	324
A Positive Explanatory Style and Hopefulness	325
The Neuroscience of Learned Helplessness	326
Before You Go On	327
Review	327
A Cognitive View of Phobic Behavior	328
Phobias and Expectations	328
Self-Efficacy and Phobic Behavior	328
The Importance of Our Experiences	330
Application: A Modeling Treatment for Phobias	330
An Alternative View	331
Before You Go On	331
Review	331
Concept Learning	332
The Structure of a Concept	332
<i>Attributes and Rules</i>	332
<i>The Prototype of a Concept</i>	333
Studying Concept Learning	334
Theories of Concept Learning	336
<i>Associative Theory</i>	336
<i>Cognitive Process in Concept Learning</i>	337
Before You Go On	338
Review	338
Critical Thinking Questions	339
Key Terms	339
Chapter 12 • The Storage of Our Experiences	341
A Fleeting Experience	341
Measures of Memory	342
A Three-Stage View of Memory Storage	343
Sensory Register	344
Iconic Memory	344
<i>In Search of an Icon</i>	344
<i>The Duration of an Icon</i>	346
Echoic Memory	346
<i>In Search of an Echo</i>	346
<i>The Duration of an Echo</i>	346
The Nature of Sensory Memory	348
Before You Go On	348
Review	349
Short-Term Store	349
The Span of Short-Term Memory	349
Disrupting Short-Term Memory	350
Limited Storage Capacity	351
The Organization of Our Experiences	351
<i>Chunking</i>	351
<i>Coding</i>	353

<i>Association of Events</i>	355
The Rehearsal Function of the Short-Term Store	361
Before You Go On	362
Review	362
A Rehearsal Systems Approach	363
Phonological Loop	363
Visuospatial Sketchpad	363
The Central Executive	364
Episodic Buffer	364
The Neuroscience of Working Memory	365
Is There a Short-Term Memory?	366
Before You Go On	367
Review	367
Long-Term Store	368
Episodic Versus Semantic Memories	368
<i>Separate Operations</i>	368
<i>The Neuroscience of Episodic and Semantic Memories</i>	368
Procedural Versus Declarative Memories	370
The Neuroscience of Memory Storage	371
Learning in the <i>Aplysia Californica</i>	371
Structural Changes and Experience	372
Anatomical Basis of Memory Storage	373
<i>Medial Temporal Lobe and the Case of H. M.</i>	374
<i>The Importance of the Hippocampus</i>	376
Before You Go On	378
Review	378
Critical Thinking Questions	379
Key Terms	379
Chapter 13 • Memory Retrieval and Forgetting	381
A Look Into the Past	381
Memory Retrieval	382
Attributes of Memory	382
Context Attribute	383
Affective Attribute	386
Before You Go On	388
Review	389
How Quickly We Forget	389
Interference	390
Underwood's List Differentiation View	392
Postman's Generalized Competition View	392
Before You Go On	392
Review	393
Reconstruction of the Past	393
Memory Reconstruction Studies	393
The Accuracy of Eyewitness Testimony	395
<i>The Effect of Misinformation on the Accuracy of Eyewitness Testimony</i>	396
<i>Susceptibility to Misinformation</i>	397

False Memory Syndrome	398
Motivated Forgetting	399
The Neuroscience of Memory Retrieval	401
Application: Mnemonics	405
Method of Loci	405
Remembering Names	405
Do Mnemonics Work?	406
Before You Go On	407
Review	408
Critical Thinking Questions	408
Key Terms	409
Glossary	411
References	423
Author Index	469
Subject Index	491

ORGANIZATION

Based on feedback from users of the previous edition of this textbook, the discussion of motivational theories of learning has been moved from the beginning of the textbook to just before
