

Contents	pages
Preface	1
1. Offshore versus Onshore Oil Drilling	3
1.1 The Differences between Offshore and Onshore Oil Drilling	3
1.2 Key Differences	6
1.3 How Oil Forms	12
1.4 Basics of Offshore Oil Drilling	17
1.5 Basics of Onshore Oil Drilling	17
1.6. Equipment Differences	18
1.6.1 Fixed platforms	19
1.6.2 Semi - Sub Platforms	21
1.6.3 FPSO Platforms	22
1.6.4 Tension-Leg Platforms	23
1.6.5 SPAR Platforms	24
1.7 Time Frame	29
1.8 Storage and Transport Methods	29
1.9 Cost Differences	30
1.10 Productivity	31
1.11 Susceptibility to price changes	32
2. Mooring Systems	32
2.1 Introduction	32
2.2 Requirements	36
2.3 Fundamentals	36
2.3.1 Catenary Lines	36
2.3.2 Synthetic Lines	41
2.4 How do Mooring Systems Work?	44
2.4.1 Anchors	45
2.4.2 Mooring systems	46

3. Risers Introduction	57
3.1 General overview	57
3.2 Riser function	57
3.3 Riser configurations	58
3.3.1 Free - standing risers	59
3.3.2 Top-tensioned risers	59
3.3.2.1 Riser tensioner systems	60
3.3.2.2 Buoyancy modules	60
3.3.3 Catenary risers	61
3.3.3.1 Simple catenary risers	61
3.3.3.2 Lazy-wave risers	61
3.3.3.3 Steep-wave risers	62
3.3.4 Hybrid risers	63
3.4 Common riser types	64
3.4.1 Drilling risers	65
3.4.1.1 Floating MODU "low-pressure" drilling risers	69
3.4.1.2 Floating production platform drilling risers	71
3.4.1.3 Floating MODU "high-pressure" drilling risers	72
3.4.2 Completion / workover risers	72
3.4.3 Production / flowline risers	72
3.4.3.1 Free-standing production risers	73
3.4.3.2 Top-tensioned production risers	74
3.4.3.3 Catenary production risers	76
3.4.3.4 Hybrid production risers	76

4. Directional Drilling	78
4.1 Introduction	78
4.2 History of directional drilling	79
4.3 Advantages of directional drilling	82
4.4 Disadvantages of directional drilling	83
4.5 Definition of directional drilling	84
4.6 Applications of directional drilling	85
4.7 Horizontal wells	88

4.8 Characteristics, configurations and planning of a directional or horizontal well	90
4.8.1 Configurations of a directional well	91
4.8.2 Configurations of a horizontal well	95
4.9 Planning of a directional well: general features	98
4.10 Determination of the horizontal and vertical projections and choice of the well configuration	100
4.11 The casing design	103
4.12 The choice of the mud	104
4.13 Methods for assessing and surveying the deviation	104
4.14 Methods of surveying the inclination and direction of a directional well	115
4.15 Conclusions	121
5. Horizontal Wells	122
5.1 Introduction	122
5.2 Drilling methods for petroleum extraction	124
5.2.1 Vertical drilling	124
5.2.2 Directional drilling	125
5.2.3 Horizontal drilling	127
5.3 Drilling technology development	130
5.3.1 Directional technique development	130
5.3.1.1 The first generation of directional technique	130
5.3.1.2 The second generation of directional technique	131
5.3.1.3 The third generation of directional technique	132
5.3.1.4 The fourth generation of directional technique	133
5.3.2 Directional tools	135
5.3.2.1 Deflection tools	135
5.3.2.1.1 The removable whipstock	135
5.3.2.1.2 The permanent whipstock	136
5.3.2.2 Down-hole motor	136
5.3.2.2.1 PDM tools	137
5.3.2.2.2 Turbo – drills	138

5.3.2.2.3 Orientation sub and bent sub	140
5.3.2.3 Rotary steerable drilling system (RSDS)	142
5.3.2.3.1 The “push-the-bit” system	144
5.3.2.3.2 The “point-the-bit” system	145
5.3.2.3.3 The hybrid “push- and point-the-bit” system	146
5.3.2.4 Vertical drilling system (VDS)	147
5.3.3 Directional survey technique	148
5.3.3.1 Measuring technique	149
5.3.3.1.1 Directional information	149
5.3.3.1.2 Drilling engineering information	150
5.3.3.1.3 Formation information	150
5.3.3.2 Transmission technique	151
5.3.3.2.1 Mud-pulse telemetry	151
5.3.3.2.2 Electromagnetic telemetry	154
5.3.3.2.3 Wired drill pipe	155
5.3.4 Drill bits	156
5.3.4.1 The roller cone bits	157
5.3.4.2 The fixed cutter bits	158
5.3.4.3 The hybrid bits	160
5.3.5 Drilling fluids	161
5.4 Achievements of deep well drilling and challenges	164
5.4.1 Top 15+ deepest wells and challenges	164
5.4.2 Top 20+ longest extended reach wells and challenges	167
5.5 Conclusion	173
6 Oil and Gas Offshore Production	175
6.1 Introduction	175
6.2 Host Facilities	175
6.2.1 Resisting Environmental Forces	175
6.3 Bottom Supported Platforms	176
6.3.1 Gravel Islands	176
6.3.2 Steel Jacket	176
6.3.3 Gravity-Based Structures	176

6.3.4 Compliant Towers	177
6.4 Floating Rigs	177
6.4.1 Tension Leg Platforms (TLPs)	177
6.4.2 Semi-Submersibles	178
6.4.3 Spars	178
6.4.4 FPSO's	179
6.4.5 Mobile Offshore Drilling Units	180
6.4.6 Subsea Production Systems	180
6.5 Drilling	180
6.5.1 Production Wells	180
6.5.2 Drilling	181
6.5.3 Directional Drilling	181
6.5.4 Derrick and Hoisting	182
6.5.5 Casing	183
6.5.6 Well Completion	185
6.5.7 Drilling Safely	185
6.5.8 Petroleum Varieties and Products	185
6.6 Production	186
6.7 Subsea production	190
6.7.1 Subsea Facilities	190
6.8 Extraction	197
6.9 Processing	197
6.10 Safe Operations / Living and Working Offshore	197

Summary	201
