

# Contents

List of Contributors . . . . .	VIII
Foreword by <i>F. C. Blodi</i> . . . . .	IX
Preface . . . . .	X
Dedication . . . . .	XI
 <i>J. Draeger</i>	
<b>Introduction</b> . . . . .	1
References . . . . .	3
 <i>H. Sautter †</i>	
<b>1 The Development of Microsurgery</b> . . . . .	5
Definition . . . . .	5
Specific Aspects of Ophthalmic Microsurgery . . . . .	7
References and Suggested Reading . . . . .	11
 <i>J. Draeger, F. Klein</i>	
<b>2 Technical Developments, Suspensions, Remote Control</b> . . . . .	12
Technical Developments . . . . .	12
Ceiling Suspension . . . . .	22
Activation and Remote Control of Electrically and Pneumatically Driven Instruments from a Microsurgical Unit . . . . .	26
Integration of the Anesthesia Machine . . . . .	29
Integrated Inner Pole Magnet . . . . .	32
 <i>J. Draeger, J. Reiner</i>	
<b>3 Operating Microscopes for Microsurgery</b> . . . . .	34
References . . . . .	60
 <i>J. Draeger, L. Klein</i>	
<b>4 Microsurgical Instruments</b> . . . . .	61
Definitions . . . . .	61
Cutting Instruments . . . . .	62
Instruments to Grasp the Tissue . . . . .	74
Instruments to Open the Lids . . . . .	79
Thermal Instruments . . . . .	81
Cleaning of the Instruments . . . . .	85

Corrosion and Types of Corrosion of the Surgical Instruments . . . . .	86
Planning the Use of Instruments . . . . .	87
References . . . . .	91

*R. Machemer*

<b>5 Experimental and Technical Developments in Vitreous Surgery</b> . . . . .	93
Pathology of Proliferative Vitreoretinopathy . . . . .	93
Therapy of Proliferative Vitreoretinopathy . . . . .	94
Conclusion . . . . .	98
References . . . . .	98

*R. Winter*

<b>6 Viscosurgery</b> . . . . .	101
Effect of Sodium Hyaluronate on the Intraocular Pressure . . . . .	103
Elimination of the Sodium Hyaluronate from the Vitreous and the Anterior Chamber . . . . .	103
Tolerance of Human Corneal Endothelium to Hyaluronic Acid . . . . .	104
Protection of Cells . . . . .	104
Preserving Tissue Clefts . . . . .	105
Clinical Experiences . . . . .	106
Conclusions . . . . .	111
References . . . . .	112

*M. Spitznas*

<b>7 Motorized Teleguided Stereotactic Micromanipulator for Vitreous Microsurgery</b> . . . . .	114
The Device . . . . .	115
Surgical Application . . . . .	117
Comment . . . . .	124
Acknowledgement . . . . .	134
References . . . . .	134

*W. Hütz, K. Ullerich*

<b>8 Microsurgical Suture Material</b> . . . . .	135
Requirements for Microsurgical Suture Material . . . . .	135
Survey of Presently Used Material . . . . .	136
Stress on Suture Material . . . . .	141
Various Phases of Deformation . . . . .	143
Determination of Elasticity in Short-Term and Long-Term Experiments . . . . .	144
Testing Tensile Strength . . . . .	146
Microsurgical Needles . . . . .	147
Influence of These Experimental Data on Clinical Practice . . . . .	148
References and Suggested Reading . . . . .	149

*C. D. Binkhorst, R. Burk, J. Draeger*

<b>9</b>	<b>Technical Aspects of Intraocular Lenses</b> . . . . .	151
	Construction of a Lens Implant . . . . .	151
	Material . . . . .	161
	Sterilization of the Intraocular Lens . . . . .	163
	Choice of an Intraocular Lens . . . . .	166
	References . . . . .	167

*H. Kaufman, R. Winter, J. Draeger*

<b>10</b>	<b>Eye Banking in Corneal Microsurgery</b> . . . . .	170
	Pre- and Postoperative Microscopic Evaluation of the Corneal Endothelium . .	176
	Techniques of Preserving the Donor Cornea . . . . .	178
	References . . . . .	180
	Subject Index . . . . .	181
