

CONTENTS

P. VÍTKOVÁ, V. KACHLÍK

Petrology and geochemistry of high-Mg mafic metavolcanic rocks from the Neoproterozoic sequence of Sedlčany-Krásná Hora metamorphic "Islet", Central Bohemian Pluton, Czech Republic

7-25

J. ULRYCH, V. CAJZ, K. BALOGH, V. ERBAN

Geochemistry of the stratified volcanosedimentary complex in the central part of the České Středohoří Mts., North Bohemia

27-49

F. FEDIUK

Sekaninaite/cordierite compositional oscillation in some Bohemian hornfelses

51-66

M. SUK

The current P-T condition in the Earth's continental crust

67-77

A. VOZÁROVÁ

Plagiogranite pebbles in Westphalian conglomerates of the Northern Gemicum Unit: their characteristics and geotectonic significance (Western Carpathians)

79-88

D. HOVORKA, A. VOZÁROVÁ

Western Carpathians pre-Tertiary volcanic activity and its products: an overview

89-130

D. WILIMSKÝ

Geochemistry of the amphibolites of the Moravicum of the Svratka dome

131-175
