<i>List of Figures</i>	viii
<i>List of Tables</i>	xi
<i>Foreword to the Second Edition</i>	xiii
<i>Foreword to the First Edition</i>	xiv
<i>Preface</i>	xvi
<i>Acknowledgements for the Second Edition</i>	xviii
<i>Acknowledgements for the First Edition</i>	xviii
1 Premise and Contents of the Second Edition	1
2 Establishing Goals and Objectives	11
<i>Measuring, Quantifying, and Monetizing</i>	11
<i>Common Goals</i>	13
<i>Objectives</i>	22
<i>Project Selection in the Real World</i>	24
<i>Summary</i>	26
<i>Case Studies</i>	27
3 Route and Network Analysis	57
<i>Spatial Topology of Fixed-Route Networks</i>	58
<i>Rights-of-Way, Modal Technologies, and System Evolution</i>	61
<i>Elements of Route Design and Operation</i>	63
<i>Interaction Between Route and Network Design</i>	82
<i>Demand-Responsive Services</i>	91
<i>Summary</i>	94
<i>Appendix 3.A: More Indicators Related to Efficiency and Speedup</i>	97
4 The Impact of Intelligent Transportation Systems	106
<i>Barriers to Integration and Hybrid Services</i>	106
<i>Real-Time Operational Control</i>	109
<i>Planning Information</i>	112

<i>Security Benefits</i>	116
<i>Other Benefits to Passengers and to the Public at Large</i>	118
<i>Summary</i>	119
5 Characterizing and Influencing Modal Relationships	124
<i>Characterization of Mode Split and Usage</i>	124
<i>Characterization of Resource Consumption and Pollution Generation</i>	130
<i>Influencing Modal Relationships</i>	134
<i>Summary</i>	141
6 Space Requirements and Impacts from Land Use	145
<i>Development Density and Transportation Activity</i>	145
<i>Land Consumption by Public Transportation Modes</i>	149
<i>Balancing Land Consumption between Transport and Nontransport Uses</i>	155
<i>Ecological Impacts of Land Consumption Due to Transport Choices</i>	161
<i>Pricing of Land Use for Demand Management and Project Financing</i>	164
<i>Summary</i>	167
7 Simple and Complex Mathematical Models	173
<i>Technical Purposes for Models</i>	173
<i>Purposes for Model Application: Projections versus Forecasts versus Plans</i>	176
<i>Simpler Models and Quick-Estimate Methods</i>	177
<i>More Complex Methods</i>	181
<i>Potential Sources of Error and of Misleading Results</i>	198
<i>Trends in Model Development</i>	212
<i>Summary</i>	213
8 Methods to Evaluate a Transit Project in Monetary Terms	220
<i>Issues in Comparative Evaluations</i>	220
<i>The Required Inputs</i>	223
<i>Tools for Performing Monetary Evaluations</i>	225
<i>Incidence of Costs and Opportunity Costs</i>	233
<i>The Issue of Sustainable Development</i>	235
<i>Summary</i>	237
9 Cost Model Development	240
<i>Constructing Cost Models</i>	240
<i>Sensitivity Analysis</i>	247
<i>Probability in Cost Estimating</i>	254
<i>Summary</i>	255

10 Average and Marginal Costs of Services	258
<i>Basic Concepts and Example Applications</i>	258
<i>Costs of Operating Routes</i>	273
<i>Costs of Connecting Services</i>	281
<i>Summary</i>	288
<i>Appendix 10.A: Derivation of Marginal Cost Estimates</i>	289
11 Organizational Structures and Contract Models	298
<i>Public versus Privately Owned Firms</i>	298
<i>Typology of Organizational, Financial, and Regulatory Structures</i>	299
<i>Organizational Structure of Authorities Responsible for Public Transportation</i>	302
<i>Contracting Models for Operations and Maintenance</i>	304
<i>Contracting Models for Capital Projects</i>	306
<i>Issues When Considering Appropriate Organizational Structures and Contract Models</i>	308
<i>Summary</i>	315
12 Simultaneous Evaluation of All Factors	322
<i>Assembling and Organizing the Information</i>	323
<i>Methods of Ranking Alternatives</i>	327
<i>Summary</i>	351
<i>Appendix 12.A: Some Additional Methods of Ranking Alternatives</i>	355
 <i>Glossary</i>	 362
<i>Nomenclature</i>	371
<i>Index</i>	377
