MODERN SCHOOL ATLAS

The best-selling school atlas for over 100 years, *Philip's Modern School Atlas* is an essential reference work for secondary education. This new edition combines superb digital maps of Britain and the World with up-to-date thematic maps.

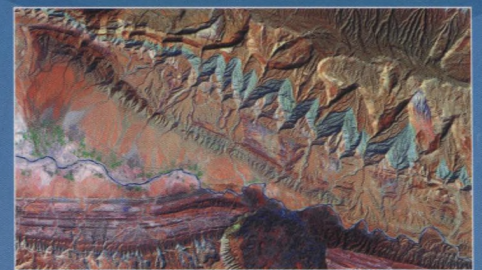

**Suitable for Key Stage 4, GCSE,
A-Level and international schools**

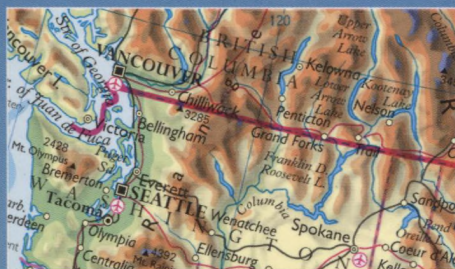

POLITICAL MAPS show national boundaries at a glance, highlighting the size of each country in relation to its neighbours and marking capital cities.

CLIMATE MAPS for each continent show average temperatures for January and July, indicating the prevailing winds and cold and warm ocean currents.

SATELLITE IMAGERY provides a valuable resource for studying the Earth's surface and monitoring changes in landforms, climate and the environment.

PHYSICAL MAPS with hill-shading and layer-colouring show the landscape, marking mountains, rivers and lakes, as well as towns, roads and railways.

THEMATIC MAPS compare nation with nation on key social and economic topics such as population, health, standards of living, tourism and the environment.

ECONOMIC MAPS provide a useful reference source for key regions, from the industrial development of China to oil and water resources in the Middle East.
