

## CONTENTS

PREFACE . . . . .	5
LIST OF SYMBOLS . . . . .	12
<i>Chapter 1 INTRODUCTION</i> . . . . .	17
1.1 General Scheme of Analytical Determinations . . . . .	18
1.1.1 Sampling and Sample Preparation . . . . .	18
1.1.2 Transformation of the Constituent to be Determined into Measurable Form . . . . .	19
1.1.3 Measurements in Analytical Applications . . . . .	20
1.1.4 Calculation and Interpretation of Analytical Results . . . . .	21
References . . . . .	22
<i>Chapter 2 THERMODYNAMICS AND KINETICS OF CHEMICAL REACTIONS</i> . . . . .	23
2.1 Thermodynamics of Chemical Reactions . . . . .	24
2.1.1 Thermodynamics of Chemical Equilibrium . . . . .	24
2.1.2 Activity . . . . .	26
2.1.3 Thermodynamic Equilibrium Constant . . . . .	26
2.1.4 Activity and Concentration Scales . . . . .	27
2.1.5 Standard State . . . . .	28
2.1.6 Relationship between Molal and Molar Scales of Concentration and Activity Coefficients . . . . .	28
2.1.7 Mean Activity and Mean Activity Coefficients . . . . .	30
2.1.8 The Dependence of Activity Coefficients of Electrolytes upon Salt Concentration . . . . .	30
2.1.9 Activity Coefficients of Non-Electrolytes . . . . .	35
2.1.10 Thermodynamic and Concentration Equilibrium Constants . . . . .	36
2.1.11 Ion Association and Activity of Ions . . . . .	39
2.2 Kinetics of Chemical Reactions . . . . .	41
2.2.1 Reaction Mechanism . . . . .	41
2.2.2 Reaction Rate . . . . .	42
2.2.3 Order and Molecularity of a Reaction . . . . .	43
2.2.4 Simple or Isolated Elementary Reactions . . . . .	45
2.2.5 Reversible Reactions . . . . .	45
2.2.6 Consecutive Reactions . . . . .	47
2.2.7 Induced Reactions . . . . .	49
2.2.8 Catalytic Reactions . . . . .	50
2.2.9 Factors Affecting the Reaction Rate . . . . .	53
2.2.10 Kinetics of Oxidation-Reduction Processes in Solutions . . . . .	58
2.3 Thermodynamic and Kinetic Criteria for Analytical Applications of Chemical Reactions . . . . .	61
2.4 Problems . . . . .	62
References . . . . .	63

<i>Chapter 3 GRAPHICAL REPRESENTATION OF IONIC EQUILIBRIA IN SOLUTIONS . . .</i>	65
3.1 Distribution Diagrams . . . . .	66
3.1.1 Distribution Diagram of the Equilibrium System with Species A, AB and AB <sub>2</sub> . . . . .	69
3.1.2 Distribution Diagrams of Systems Containing Polynuclear Complexes . . . . .	73
3.1.3 Distribution Diagram for the Presence of Solid Phase . . . . .	74
3.1.4 Significance of Distribution Diagrams . . . . .	76
3.2 Logarithmic Concentration Diagrams . . . . .	76
3.2.1 Logarithmic Concentration Diagram for the System A, AB, AB <sub>2</sub> . . . . .	77
3.2.2 Logarithmic Solubility Diagram . . . . .	82
3.2.3 Significance of Logarithmic Diagrams . . . . .	83
3.3 Diagrams for Systems of Two Variables . . . . .	84
3.3.1 Predominance-Area Diagrams . . . . .	84
References . . . . .	86
<i>Chapter 4 PROTOLYTIC EQUILIBRIA . . . . .</i>	88
4.1 Concepts of Acids and Bases . . . . .	88
4.1.1 Constants of Protolytic Equilibria . . . . .	91
4.2 Solvent Effects on Protolytic Equilibria . . . . .	93
4.2.1 Classification of Solvents . . . . .	93
4.2.2 The Ionic Product of the Solvent . . . . .	94
4.2.3 Medium Effects of Ionizing Solvents . . . . .	95
4.3 Dissociation Constants of Acids and Bases in Non-Aqueous Medium . . . . .	103
4.3.1 Scheme of Solvation and Dissociation Equilibria . . . . .	103
4.3.2 Medium Effect on the Dissociation Constant of an Acid in Ionizing Solvents . . . . .	107
4.3.3 Protolytic Equilibria in Solvents of Low Dielectric Constant . . . . .	116
4.3.4 Differentiating Effect of Solvents . . . . .	117
4.4 Scales of Acidity and pH . . . . .	123
4.4.1 Definitions of pH Scales for Aqueous Medium . . . . .	123
4.4.2 Activity Scales for Non-Aqueous Solvents . . . . .	129
4.4.3 HAMMETT Acidity Function . . . . .	131
4.4.4 Conventional Operational pH Scale for Amphiprotic and Mixed Solvents	133
4.5 Problems . . . . .	136
References . . . . .	136
<i>Chapter 5 PROTOLYTIC SYSTEMS IN AQUEOUS MEDIUM . . . . .</i>	138
5.1 Calculation of pH and of the Composition of a Protolytic System . . . . .	138
5.2 Calculating pH in Simple Acid-Base Systems . . . . .	140
5.2.1 Solution of a Strong Acid or Base . . . . .	140
5.2.2 Solutions of Monoprotic Weak Acids and Bases or Mixtures of Conjugate Acids and Bases . . . . .	140
5.3 Calculation of Acid-Base Equilibria of Polyprotic Acids or Bases . . . . .	144
5.3.1 Calculation of the pH of a Solution of a Weak Polyprotic Acid . . . . .	146
5.3.2 Solutions of Ampholytes Formed from a Polyprotic Weak Acid . . . . .	147
5.4 Logarithmic Concentration Diagrams . . . . .	149
5.4.1 Diagram of a Simple Protolytic System . . . . .	149
5.4.2 Logarithmic Concentration Diagram of a Polyprotic Acid . . . . .	151

<i>Chapter 3 GRAPHICAL REPRESENTATION OF IONIC EQUILIBRIA IN SOLUTIONS . . .</i>	65
<b>3.1 Distribution Diagrams . . . . .</b>	66
3.1.1 Distribution Diagram of the Equilibrium System with Species A, AB and AB <sub>2</sub> . . . . .	69
3.1.2 Distribution Diagrams of Systems Containing Polynuclear Complexes . . . . .	73
3.1.3 Distribution Diagram for the Presence of Solid Phase . . . . .	74
3.1.4 Significance of Distribution Diagrams . . . . .	76
<b>3.2 Logarithmic Concentration Diagrams . . . . .</b>	76
3.2.1 Logarithmic Concentration Diagram for the System A, AB, AB <sub>2</sub> . . . . .	77
3.2.2 Logarithmic Solubility Diagram . . . . .	82
3.2.3 Significance of Logarithmic Diagrams . . . . .	83
<b>3.3 Diagrams for Systems of Two Variables . . . . .</b>	84
3.3.1 Predominance-Area Diagrams . . . . .	84
<b>References . . . . .</b>	86
<i>Chapter 4 PROTOLYTIC EQUILIBRIA . . . . .</i>	88
<b>4.1 Concepts of Acids and Bases . . . . .</b>	88
4.1.1 Constants of Protolytic Equilibria . . . . .	91
<b>4.2 Solvent Effects on Protolytic Equilibria . . . . .</b>	93
4.2.1 Classification of Solvents . . . . .	93
4.2.2 The Ionic Product of the Solvent . . . . .	94
4.2.3 Medium Effects of Ionizing Solvents . . . . .	95
<b>4.3 Dissociation Constants of Acids and Bases in Non-Aqueous Medium . . . . .</b>	103
4.3.1 Scheme of Solvation and Dissociation Equilibria . . . . .	103
4.3.2 Medium Effect on the Dissociation Constant of an Acid in Ionizing Solvents . . . . .	107
4.3.3 Protolytic Equilibria in Solvents of Low Dielectric Constant . . . . .	116
4.3.4 Differentiating Effect of Solvents . . . . .	117
<b>4.4 Scales of Acidity and pH . . . . .</b>	123
4.4.1 Definitions of pH Scales for Aqueous Medium . . . . .	123
4.4.2 Activity Scales for Non-Aqueous Solvents . . . . .	129
4.4.3 HAMMETT Acidity Function . . . . .	131
4.4.4 Conventional Operational pH Scale for Amphiprotic and Mixed Solvents	133
<b>4.5 Problems . . . . .</b>	136
<b>References . . . . .</b>	136
<i>Chapter 5 PROTOLYTIC SYSTEMS IN AQUEOUS MEDIUM . . . . .</i>	138
<b>5.1 Calculation of pH and of the Composition of a Protolytic System . . . . .</b>	138
<b>5.2 Calculating pH in Simple Acid-Base Systems . . . . .</b>	140
5.2.1 Solution of a Strong Acid or Base . . . . .	140
5.2.2 Solutions of Monoprotic Weak Acids and Bases or Mixtures of Conjugate Acids and Bases . . . . .	140
<b>5.3 Calculation of Acid-Base Equilibria of Polyprotic Acids or Bases . . . . .</b>	144
5.3.1 Calculation of the pH of a Solution of a Weak Polyprotic Acid . . . . .	146
5.3.2 Solutions of Ampholytes Formed from a Polyprotic Weak Acid . . . . .	147
<b>5.4 Logarithmic Concentration Diagrams . . . . .</b>	149
5.4.1 Diagram of a Simple Protolytic System . . . . .	149
5.4.2 Logarithmic Concentration Diagram of a Polyprotic Acid . . . . .	151

<i>Chapter 3 GRAPHICAL REPRESENTATION OF IONIC EQUILIBRIA IN SOLUTIONS . . .</i>	65
3.1 Distribution Diagrams . . . . .	66
3.1.1 Distribution Diagram of the Equilibrium System with Species A, AB and AB <sub>2</sub> . . . . .	69
3.1.2 Distribution Diagrams of Systems Containing Polynuclear Complexes . . . . .	73
3.1.3 Distribution Diagram for the Presence of Solid Phase . . . . .	74
3.1.4 Significance of Distribution Diagrams . . . . .	76
3.2 Logarithmic Concentration Diagrams . . . . .	76
3.2.1 Logarithmic Concentration Diagram for the System A, AB, AB <sub>2</sub> . . . . .	77
3.2.2 Logarithmic Solubility Diagram . . . . .	82
3.2.3 Significance of Logarithmic Diagrams . . . . .	83
3.3 Diagrams for Systems of Two Variables . . . . .	84
3.3.1 Predominance-Area Diagrams . . . . .	84
References . . . . .	86
<i>Chapter 4 PROTOLYTIC EQUILIBRIA . . . . .</i>	88
4.1 Concepts of Acids and Bases . . . . .	88
4.1.1 Constants of Protolytic Equilibria . . . . .	91
4.2 Solvent Effects on Protolytic Equilibria . . . . .	93
4.2.1 Classification of Solvents . . . . .	93
4.2.2 The Ionic Product of the Solvent . . . . .	94
4.2.3 Medium Effects of Ionizing Solvents . . . . .	95
4.3 Dissociation Constants of Acids and Bases in Non-Aqueous Medium . . . . .	103
4.3.1 Scheme of Solvation and Dissociation Equilibria . . . . .	103
4.3.2 Medium Effect on the Dissociation Constant of an Acid in Ionizing Solvents . . . . .	107
4.3.3 Protolytic Equilibria in Solvents of Low Dielectric Constant . . . . .	116
4.3.4 Differentiating Effect of Solvents . . . . .	117
4.4 Scales of Acidity and pH . . . . .	123
4.4.1 Definitions of pH Scales for Aqueous Medium . . . . .	123
4.4.2 Activity Scales for Non-Aqueous Solvents . . . . .	129
4.4.3 HAMMETT Acidity Function . . . . .	131
4.4.4 Conventional Operational pH Scale for Amphiprotic and Mixed Solvents	133
4.5 Problems . . . . .	136
References . . . . .	136
<i>Chapter 5 PROTOLYTIC SYSTEMS IN AQUEOUS MEDIUM . . . . .</i>	138
5.1 Calculation of pH and of the Composition of a Protolytic System . . . . .	138
5.2 Calculating pH in Simple Acid-Base Systems . . . . .	140
5.2.1 Solution of a Strong Acid or Base . . . . .	140
5.2.2 Solutions of Monoprotic Weak Acids and Bases or Mixtures of Conjugate Acids and Bases . . . . .	140
5.3 Calculation of Acid-Base Equilibria of Polyprotic Acids or Bases . . . . .	144
5.3.1 Calculation of the pH of a Solution of a Weak Polyprotic Acid . . . . .	146
5.3.2 Solutions of Ampholytes Formed from a Polyprotic Weak Acid . . . . .	147
5.4 Logarithmic Concentration Diagrams . . . . .	149
5.4.1 Diagram of a Simple Protolytic System . . . . .	149
5.4.2 Logarithmic Concentration Diagram of a Polyprotic Acid . . . . .	151

<i>Chapter 3 GRAPHICAL REPRESENTATION OF IONIC EQUILIBRIA IN SOLUTIONS . . .</i>	65
<b>3.1 Distribution Diagrams . . . . .</b>	66
3.1.1 Distribution Diagram of the Equilibrium System with Species A, AB and AB <sub>2</sub> . . . . .	69
3.1.2 Distribution Diagrams of Systems Containing Polynuclear Complexes . . . . .	73

5.4.1 Diagram of a Simple Protolytic System . . . . .	149
5.4.2 Logarithmic Concentration Diagram of a Polyprotic Acid . . . . .	151

5.5 Buffer Solutions . . . . .	154
5.5.1 Buffer Capacity . . . . .	155
5.5.2 Dilution Effects . . . . .	157
5.5.3 Salt Effects . . . . .	158
5.5.4 Influence of Temperature . . . . .	158
5.5.5 General Considerations in Practical Applications of Buffer Solutions	159
5.6 Problems . . . . .	161
References . . . . .	163
<i>Chapter 6 METAL COMPLEX EQUILIBRIA</i> . . . . .	165
6.1 Complex Compounds . . . . .	165
6.2 Complex Equilibria in Solution . . . . .	166
6.2.1 Competition of Aquo-Complexes . . . . .	166
6.2.2 Reaction Rates of Complex Formation . . . . .	167
6.3 Significance of Thermodynamic Functions for Complex Formation . . . . .	169
6.3.1 The Ratio of Consecutive Stability Constants . . . . .	169
6.3.2 The Chelate Effect . . . . .	171
6.4 Factors Determining the Stability and Other Analytical Properties of Complex Compounds . . . . .	173
6.4.1 Effects of the Central Ion . . . . .	174
6.4.2 Influence of the Properties of the Ligand . . . . .	179
6.4.3 Analytical Functional Groups . . . . .	184
6.5 Consecutive Complex Formation Equilibria . . . . .	185
6.5.1 BJERRUM Formation Function . . . . .	185
6.5.2 Calculation of Relative and Equilibrium Concentrations in a System of Stepwise Complexation . . . . .	187
6.5.3 Polynuclear Complexes . . . . .	191
6.6 Influence of Side-Reactions . . . . .	193
6.7 Masking . . . . .	205
6.7.1 Masking in Complexation Reactions . . . . .	205
6.7.2 Demasking . . . . .	207
6.8 Problems . . . . .	208
References . . . . .	209
<i>Chapter 7 EQUILIBRIA OF PRECIPITATION REACTIONS</i> . . . . .	211
7.1 Influence of Various Factors on the Solubility of Substances . . . . .	211
7.1.1 Ideal and Real Solutions . . . . .	212
7.1.2 Solubility of Electrolytes . . . . .	212
7.1.3 Particle Size Effect on Solubility . . . . .	214
7.1.4 Formation of Precipitates and Their Properties . . . . .	215
7.2 Solubility Product . . . . .	225
7.2.1 Calculation of the Solubility of Sparingly Soluble Substances . . . . .	226
7.2.2 Influence of Protolytic or Complexation Reactions on Solubility . . . . .	229
7.2.3 Effects of Complexation Reactions . . . . .	233
7.3 Selective Dissolution . . . . .	239
7.4 Graphical Representation of Precipitation Equilibria . . . . .	240
7.4.1 Logarithmic Concentration Diagram of a Precipitation Reaction without Side-Reaction Effects . . . . .	240
7.4.2 Logarithmic Concentration Diagram for Precipitation Influenced by Formation of Complexes . . . . .	241

7.4.3 Predominance-Area Diagram for the Precipitation Equilibrium as a Function of pH . . . . .	245
7.5 Problems . . . . .	249
References . . . . .	251
 <i>Chapter 8 OXIDATION-REDUCTION EQUILIBRIA</i> . . . . .	253
8.1 Oxidation-Reduction Processes in Aqueous Solutions and Galvanic Cells . . . . .	253
8.1.1 Equilibrium Constant . . . . .	255
8.1.2 Potentials of Electrodes . . . . .	256
8.1.3 The Potential of a Redox Pair . . . . .	256
8.1.4 Calculation of the Equilibrium Constant from Standard Potentials . . . . .	257
8.2 Formal Redox Potentials . . . . .	258
8.2.1 Salt Effect . . . . .	258
8.2.2 The Influence of Hydrogen Ions . . . . .	259
8.2.3 Effect of Complex Formation . . . . .	259
8.2.4 Effect of the Precipitation of Sparingly Soluble Substances . . . . .	262
8.3 Logarithmic Diagrams of Oxidation Reduction Equilibria . . . . .	263
8.3.1 Logarithmic Activity (or Concentration) Ratio Diagram . . . . .	264
8.3.2 Logarithmic Concentration Diagram of Redox Equilibria . . . . .	265
8.4 Predominance-Area Redox Diagrams . . . . .	267
8.5 Problems . . . . .	268
