	Introduction 1 The study of Noun Phrases 2 Theoretical background	1 1 6
1	On NPs, 0-marking and c-command	22
1	Introduction	22
	1 'Dummy' prepositions	23
	2 Subject-object asymmetries	26
	3 On Case-marking	36
	4 On some expected principle C and B violations	40
	5 On ergative Nouns	46
	6 Evidence from NPs for the notion of Complete Functional	
	Complex	50
2	Extraction from NP and the proper notion of head government	57
	Introduction	57
	1 Cinque's generalization	58
	2 On deriving Cinque's generalization	63
	3 The Possessivization Principle	66
	4 Movement through Spec vs opacity	71
	5 Government into Spec	73
	6 Extraction from inverted subjects	80
	7 Scope ambiguities	89
	8 Nouns and Verbs as governors	91
	9 The Consistency Principle	95
	10 Uniqueness and minimality	100
	11 Specifiers and extraction in APs	105 108
	12 The definition of government	108
	Appendix: On some apparent violations of Cinque's	110
	generalization	110
3	NP parametrization: the Head-Subject hypothesis	113
	Introduction	113
	1 The definition of the directionality parameter	116
		ix

X

2	Prenominal and postnominal Genitives	119
	The distribution of predicative Adjectives	122
	The distribution of action til A 1'	125
	Directionality in Noun compounds	129
	Uniqueness of the argument in Spec	132
	Control	134
8	Binding	134
-	The Affectedness Constraint	13/
	Markedness and the position of German	
	The possessive parameters	146
	The structural properties of the possessive	153
12		161
	Appendix: The Head-Subject parameter across categories	171
4 Nu	ll pronominals within NPs and the syntax of DPs	170
4 144	Introduction	176
1		176
Reprinted	Additional arguments for the existence of null subjects within NPs	
c 22	The furniture of them in the second s	177
2	Control of null subjects in sentences and Noun Phrases Control under reconstruction	181
		185
	The subject with unaffected objects	187
	The FRO theorem	191
	A pronominal empty object	192
1	The syntax of DPs	198
