CONTENTS

1. BASIC CONCEPTS IN NUTRITION 1
1.1. Energy and protein balance 1
1.2. Body composition 6
1.2.1. Measurement of body composition 6
1.2.1.1. Background 6
1.2.1.2. Densitometry 7
1.2.1.3. Hydrometry 7
1.2.1.4. Anthropometry 8
1.2.1.5. Electrical conductance 9
1.2.1.6. Body imaging 10
1.2.1.7. Discussion 10
1.2.2. Bioelectrical Impedance Analysis 12
1.2.2.1. Basic principle of the method 12
1.2.2.2. Factors which influence BIA measurement 14
1.2.2.3. BIA as marker of tissue health 15
1.2.2.4. BIA methods used in clinical practice 16
1.3. Diagnosis of malnutrition – Screening and Assessment 18
1.3.1. Definition of Malnutrition 18
1.3.1.1 Malnutrition – Undernutrition 18
1.3.1.2. Interaction between undernutrition and inflammation 18
1.3.1.3. Malnutrition – Overnutrition 19
1.3.2. Screening for malnutrition 20
1.3.3. Nutritional Assessment 20
1.3.4. Techniques used in nutritional assessment 23
1.3.4.1. Anthropometry 23
1.3.4.2. Advanced measures of function 24
1.3.4.3. Laboratory Tests 24
1.4. The influence of malnutrition on function 27
1.4.1. Cognitive function 28
1.4.2. Muscle function 28
1.4.3. Cardiovascular function 28
1.4.4. Renal function 28
1.4.5. Respiratory function 29
1.4.6. Gastrointestinal tract 29
1.4.7. Thermoregulation 29
1.4.8. Immune system 29
1.4.9. Wound healing 30
1.4.10. Quality of life 30
1.5. Overnutrition – functional and clinical consequences 31
1.5.1. Physiology of adipose tissue 31
1.5.2. Acute overfeeding 33
1.5.3. Chronic overfeeding – Obesity 33
1.5.3.1. Aetiology of obesity 33
1.5.3.2. Classification of obesity 35
1.5.3.3. Obesity and metabolic complications 35
1.5.3.4. Metabolic syndrome 36
1.5.4. Treatment of obesity 36
1.6. Prevalence of malnutrition 39
1.6.1. Malnutrition 39
1.6.2. Identifying malnutrition 40
1.6.3. Prevalence of malnutrition 41
1.6.3.1. Underweight and BMI in different countries and world regions 41
1.6.3.2. Prevalence of Malnutrition in a European Country (United Kingdom (UK)) 43
1.6.3.3. Geographic location (geographic inequalities) 45
1.6.3.4. Distribution of malnutrition according to individual characteristics 46
1.6.4. Causes of malnutrition (undernutrition) and evidence for treatment 46
1.7. Nutritional requirements for health at rest and upon exercise 48
1.7.1. Adult subjects 48
1.7.1.1. Macronutrients 48
1.7.1.2. Micronutrients 53

1.7.2. Nutritional needs of infants, children and adolescents 55
1.7.2.1. Nutrient requirements for growth and development 55
1.7.2.2. Nutrient requirements 57

2. NUTRITIONAL PHYSIOLOGY AND BIOCHEMISTRY 69
2.1. Appetite and its control 69
2.1.1. Peripheral signals 70
2.1.2. Homeostatic control of feeding 71
2.1.3. Hedonic control of feeding 73
2.1.4. Loss of appetite during disease 73
2.1.5. Summary 73
2.2. Digestion and absorption of nutrients 74
2.2.1. Principal sites of digestion and absorption 75
2.2.2. The small intestine 76
2.2.2.1. Carbohydrates 76
2.2.2.2. Lipids 78
2.2.2.3. Proteins 80
2.2.2.4. Vitamins 82
2.2.2.5. Water, electrolytes, and trace elements 82
2.2.3. The absorptive functions of the colon 83
2.2.3.1. Water and electrolytes 83
2.2.3.2. Metabolic and digestive functions 83
2.3. Energy metabolism 85
2.3.1. Calorimetry for the measurement of energy expenditure 85
2.3.2. Components of energy expenditure, measurement, and determinants 87
2.3.3. Disease-related alterations in energy expenditure 88
2.4. Carbohydrate metabolism 90
2.4.1. Carbohydrates in normal metabolism 90
2.4.2. Regulation of glucose metabolism 91
2.4.3. Effects of stress on glucose metabolism 92
2.4.4. Metabolic responses to critical illness 94
2.5. Lipid metabolism 95
2.5.1. Basic pathways in lipid metabolism 95
2.5.2. Lipid metabolism in fasting conditions 98
2.5.3. Influence of surgical stress, sepsis, and organ failure 99
2.6. Protein and amino acid metabolism 101
2.6.1. Physiology 101
2.6.2. Protein turnover 102
2.6.3. Metabolism of amino acids 104
2.6.4. Whole body protein synthesis and/or breakdown 104
2.6.5. Methods for measuring protein metabolism 108
2.7. Water and electrolytes in health and disease 112
2.7.1. Water and fluid compartments 112
2.7.2. Flux of fluid through the gastrointestinal tract 114
2.7.3. Role of the kidney 114
2.7.4. External fluid balance 116
2.7.5. Effects of starvation and injury 116
2.7.6. Electrolytes 117
2.8. Physiological functions and deficiency states of trace elements and vitamins 123
2.8.1. Trace elements 123
2.8.1.1. Zinc 123
2.8.1.2. Copper 123
2.8.1.3. Iron 124
2.8.1.4. Selenium 124
2.8.1.5. Chromium 125
2.8.1.6. Molybdenum 125
2.8.1.7. Manganese 125
2.8.2. Vitamins 127
2.8.2.1. Thiamine (vitamin B_1) 127
2.8.2.2. Riboflavin (vitamin B_2) 127
2.8.2.3. Niacin (vitamin B_3 or PP) 127
2.8.2.4. Vitamin B_6 128
2.8.2.5. Folate 128
2.8.2.6. Vitamin B_{12} 128
2.8.2.7. Biotin 129
2.8.2.8. Vitamin C 129
2.8.2.9. Vitamin A 129
2.8.2.10. Vitamin D 130
2.8.2.11. Vitamin E 130
2.8.2.12. Vitamin K 131
2.8.2.13. Vitamins – Summary of influence of metabolic stress 131
2.8.2.14. Assessment of vitamin status in clinical practice 131
2.9. Antioxidants in health and disease 133

2.9.1. Oxidative stress 134
2.9.2. Oxidation in vivo and neutralisation of RNOS 135
2.9.3. Dietary recommendations for antioxidants 136
2.10. Dietary fibre: metabolism and physiological effects 137
2.10.1. Physicochemical properties and metabolism of fibre 137
2.10.2. Physiological effects and clinical implications of fibre in the gut 140
2.11. The role of gut bacteria in nutrition and metabolism 146
2.11.1. Recent innovations in gut microbiome research 146
2.11.2. Characteristics and regulation of the intestinal microbiome 147
2.11.3. Physiological functions of the intestinal microbiome 149
2.11.4. The role of the intestinal microbiome in obesity and the metabolic syndrome 151
2.11.5. The role of the intestinal microbiome in malnutrition/undernutrition 152
2.12. Simple and stress starvation 155
2.12.1. Energy stores 155
2.12.2. Simple starvation 156
2.12.3. Stress starvation 157
2.12.4. Malnutrition and the response to injury 158
2.13. Injury and sepsis 161
2.13.1. The effects of cytokines during injury and sepsis 161
2.13.1.1. Reaction of the immune system 162
2.13.1.2. Endocrine changes during the inflammatory response 163
2.13.1.3. The immune response exerts a high metabolic and nutritional cost upon the body 163
2.13.1.4. Adverse effects of cytokines 165
2.13.1.5. Antioxidant defenses are depleted by infection and trauma 165
2.13.1.6. Influence of phenotype on the cytokine response 166
2.13.2. The neuroendocrine response 167
2.13.2.1. Neural stimuli and the sympathetic nervous system 168
2.13.2.2. Endocrine effects on metabolism 169
2.13.2.3. Therapeutic implications 170
2.13.3. Metabolic response to injury, stress, and inflammation 172
2.13.3.1. Stress response: 173
2.13.3.2. Metabolic and biochemical response during the flow phase 173
2.13.3.3. Convalescent or anabolic phase 176
2.13.3.4. Treatment 176
2.14. Metabolic response to hypoxia 179
2.14.1. Transient response to anoxia or acute hypoxia 180
2.14.2. Functional adaptation to hypoxia 181
2.14.3. Molecular adaptation to hypoxia 182
2.14.4. Nutritional consequences of chronic hypoxia 183
2.15. Nutritional aspects of chronic inflammatory disease 185
2.15.1. Chronic inflammation 186
2.15.2. Characteristic disease processes or conditions 187
2.15.3. Interventions 188
2.16. Pathophysiological consequences of intestinal failure 191
2.16.1. Definition and classification of intestinal failure 191
2.16.2. The process of digestion and absorption of food 192
2.16.3. Mechanisms of intestinal failure in pathophysiological conditions 194
2.17. Metabolic aspects of neurological disease 198
2.17.1. Denervation atrophy 198
2.17.2. Metabolic consequences of muscle denervation 199
2.17.3. Hormonal and systemic consequences 200
2.17.4. Amyotrophic lateral sclerosis (ALS) 201

3. INDICATIONS FOR NUTRITIONAL SUPPORT 205
3.1. Background 205
3.2. A clinical framework for considering the indications for nutritional support 205
3.3. A practical framework for considering the indications for nutritional support 207
3.3.1. Identify malnutrition or those at risk of malnutrition 207

3.3.2. Treat malnutrition or those at risk of malnutrition with the appropriate type of nutritional support 209
3.4. Common indications for nutritional support according to healthcare setting and disease 209

4. ORGANIZATION AND LEGAL ASPECTS 213
4.1. Organization of nutritional care ... 213
4.1.1. Policy, standards, protocols, and Nutrition Steering Groups (NSGs)... 214
4.1.2. Hospital food and catering 215
4.1.3. Education and training 216
4.1.4. Dieticians 216
4.1.5. Nutritional Support Teams (NSTs)... 216
4.1.6. Purchasing and equipment 218
4.2. Ethical and legal aspects 219
4.2.1. Beneficence and Non-maleficence... 219
4.2.2. Autonomy 221
4.2.3. Special situations 222
4.2.4. Justice 224

5. SUBSTRATES USED IN PARENTERAL AND ENTERAL NUTRITION 229
5.1. Energy 229
5.1.1. Goals of nutritional support 229
5.1.2. Energy intake during nutritional support 230
5.1.3. Energy intake and acute disease stage 232
5.2. Carbohydrates 234
5.2.1. Carbohydrate metabolism and nutritional support 234
5.2.2. Carbohydrates used in nutrition support 237
5.2.3. Dosages of carbohydrates in parenteral and enteral nutrition 239
5.3. Lipids 244
5.3.1. Enteral nutrition 244
5.3.2. Parenteral nutrition 245
5.3.2.1. Different intravenous lipid emulsions for parenteral nutrition 245
5.3.2.2. Reduction of lipid peroxidation 247
5.3.2.3. Lipid clearance 247
5.3.2.4. Dosage for intravenous lipid emulsions 247
5.3.2.5. Monitoring intravenous lipid emulsions 247
5.4. Proteins and amino acids 249
5.4.1. Requirements of proteins and amino acids in humans 249
5.4.2. Requirements of protein and essential amino acids in disease 250
5.4.3. Sources and chemical nature 250
5.4.4. Assessment of the biological quality of proteins 251
5.4.5. Amino acids: the building blocks of protein 251
5.5. Water and electrolytes during nutritional support 254
5.5.1. Monitoring 255
5.5.2. Normal requirements 255
5.5.3. Abnormal requirements 255
5.5.4. Oral rehydration solutions 256
5.5.5. Enteral nutrition 256
5.5.6. Subcutaneous fluids 256
5.5.7. Parenteral fluids 257
5.6. Trace elements and vitamins in parenteral and enteral nutrition ... 258
5.6.1. Micronutrients and trace elements... 258
5.6.1.1. Individuals at risk of deficiency 258
5.6.1.2. Clinical deficiency syndromes and subclinical deficiency states 259
5.6.1.3. Optimisation of provision of micronutrients 259
5.6.1.4. Legislation from the European Union and enteral nutrition (EN) ... 260
5.6.2. Trace elements in PN and EN 261
5.6.3. Vitamins in EN and PN 263
5.7. Dietary fibre: definition and classification 265
5.7.1. Definition 265
5.7.2. Classifications 266
5.7.3. Fibre and GUT microbiota 269
5.8. Special substrates 271
5.8.1. Antioxidants and phytochemicals in nutrition 271
5.8.1.1. What is an antioxidant? 271
5.8.1.2. Damage associated with depletion of antioxidants 271
5.8.1.3. Who might benefit from antioxidant supplements: biomarkers of oxidative stress 272

5.8.1.4. Overview of antioxidant strategies... 272
5.8.1.5. Dietary antioxidants..... 273
5.8.1.6. Some remaining questions related to antioxidant therapy:..... 273
5.8.2. Nutrients that influence inflammation and immunity: omega-3 fatty acids .. 274
5.8.2.1. Omega-3 (ω-3) fatty acids..... 274
5.8.2.2. Dietary sources and typical intakes of ω-3 fatty acids 275
5.8.2.3. Supplementation with long-chain ω-3 fatty acids alters the fatty-acid composition of plasma, cells, and tissues in humans 275
5.8.2.4. Mechanisms of action of long-chain ω-3 fatty acids, with a focus on inflammation and immunity 276
5.8.2.5. Experimental studies with long-chain ω-3 fatty acids 277
5.8.2.6. Fish oil in artificial nutrition support..... 277
5.8.3. Nutrients that influence immunity: experimental and clinical data 280
5.8.3.1. Glutamine 280
5.8.3.2. Arginine..... 282
5.8.3.3. Nucleotides 283
5.8.3.4. Polyunsaturated fatty acids (PUFAs) . 284
5.8.3.5. Micronutrients 284

6. TECHNIQUES OF NUTRITIONAL SUPPORT..... 287
6.1. Enteral nutrition..... 287
6.1.1. Indications and administration of nutrition 287
6.1.1.1. Indications for enteral nutrition..... 287
6.1.1.2. Contraindications to enteral nutrition..... 287
6.1.1.3. Routes for enteral tube feeding..... 287
6.1.1.4. Choice of feeding solution..... 287
6.1.2. Methods of delivering enteral nutrition..... 289
6.1.2.1. Oral nutritional supplements 289
6.1.2.2. Transnasal access 291
6.1.2.3. Endoscopic access: PEG, PEG-J, and D-PEJ 292
6.1.2.4. Surgical access: gastrostomy, needle catheter jejunostomy 298
6.1.2.5. Administration of enteral tube feeds . 300
6.1.2.6. Equipment for delivering enteral nutrition..... 301
6.1.3. Diets for enteral nutrition 303
6.1.3.1. Homemade enteral (tube) nutrition – blenderised tube feeding 303
6.1.3.2. Commercially prepared diets for enteral nutrition 307
6.1.4. Pharmaceutical aspects in enteral feeding and drugs..... 314
6.1.4.1. Basic principles and requirements... 315
6.1.4.2. General approach to evaluate a drug-nutrient regimen in enteral tube feeding..... 315
6.1.4.3. Feeding tube 317
6.1.4.4. Nutrients 318
6.1.4.5. Best practices for co-administration of drugs and enteral tube feeding.... 318
6.1.5. Complications of Enteral Nutrition .. 319
6.1.5.1. Gastrointestinal complications..... 320
6.1.5.2. Mechanical complications..... 321
6.1.5.3. Metabolic complications 322
6.2. Parenteral nutrition 324
6.2.1. Methods of delivering parenteral nutrition..... 324
6.2.1.1. Peripheral parenteral nutrition (PPN) 324
6.2.1.2. Central parenteral nutrition 328
6.2.1.3. Complications associated with central venous catheter insertion and care 336
6.2.2. Different systems for parenteral nutrition (AIO vs. MB) 342
6.2.2.1. Multiple bottle system 342
6.2.2.2. All-in-One (AIO) system..... 342
6.2.3. Pharmaceutical aspects of parenteral nutrition support 345
6.2.3.1. How to prepare parenteral nutrition (PN) admixtures, and the role and function of the pharmacist 345
6.2.3.2. Stability and compatibility of parenteral nutrition (PN) admixtures..... 354
6.2.3.3. Drugs and nutritional admixtures... 362
6.2.4. Metabolic complications of parenteral nutrition 371
6.2.4.1. Clinically relevant acute metabolic complications 371
6.2.4.2. Long-term metabolic complications 374

7. MONITORING OF NUTRITIONAL SUPPORT 377
7.1. Clinical monitoring 377
7.1.1. Aims and objectives 377
7.1.2. Integrated nutrition 378
7.1.3. Parameters 378
7.2. Laboratory measures of response to nutrition 379
7.2.1. Nitrogen balance 379
7.2.2. Proteins as markers of nutritional status 380
7.3. Refeeding syndrome 383
7.3.1. Pathophysiological factors 384
7.3.2. Clinical manifestations 385
7.3.3. Recommendations for prevention and treatment of RFS in adult patients at risk 387

8. NUTRITIONAL SUPPORT IN DIFFERENT CLINICAL SITUATIONS 391
8.1. Nutritional support in severe malnutrition 391
8.1.1. Nutritional support 392
8.1.2. Oral nutritional support 392
8.1.3. Enteral nutrition 393
8.1.4. Parenteral nutrition 393
8.1.5. Monitoring 393
8.1.6. Rehabilitation 393
8.2. Perioperative nutrition 395
8.2.1. Preliminary remarks 395
8.2.2. Patients at low risk from nutrition-related complications 396
8.2.3. Malnourished patients 398
8.2.4. Complicated surgical patients 399
8.2.5. Prescription of feed 399
8.2.6. Integration 400
8.2.7. Implementation of evidence and adherence to guidelines 400
8.3. Nutritional support in critically ill and septic patients 402
8.3.1. Enteral versus parenteral nutrition 403
8.3.2. Energy supply 404
8.3.3. Glucose and carbohydrates 404
8.3.4. Lipids 406
8.3.5. Proteins and amino acids 406
8.3.6. Vitamins and trace elements 407
8.4. Nutritional support in inflammatory bowel disease 410
8.4.1. Effect of inflammatory bowel disease on nutritional status and metabolism 410
8.4.2. Indications for nutritional support 411
8.4.2.1. Treatment and prevention of malnutrition 411
8.4.2.2. Treatment of active phase 413
8.4.3. Preoperative nutrition 414
8.4.4. Relapse prevention 415
8.4.5. Pharmaconutrition in IBD 415
8.4.6. Symptomatic therapy 415
8.5. Nutrition support in liver disease 417
8.5.1. Oral diet 417
8.5.2. Dietary supplements 418
8.5.3. Enteral feeding 418
8.5.4. Parenteral nutrition 419
8.5.5. Conclusions for diagnosis related nutritional therapy 420
8.6. Nutritional support in renal disease 422
8.6.1. Pathophysiology 422
8.6.2. Nutritional therapy for patients with renal disease 423
8.6.2.1. Non-catabolic patients with stable chronic kidney disease (CKD) 423
8.6.2.2. Non-catabolic CKD patients on chronic RRT (with or without malnutrition) 424
8.6.2.3. Patients with AKI and HD/CAPD patients with acute catabolic disease 426
8.6.2.4. Solutions for nutritional support 429
8.6.2.5. Complications and monitoring of nutritional support 430
8.6.3. Nutritional management of renal transplantation (RTX) 430
8.7. Nutrition in pulmonary and cardiac disease 433
8.7.1. Epidemiology 433
8.7.2. Pathophysiology and consequences of malnutrition 434
8.7.2.1. Pulmonary disease 434
8.7.2.2. Cardiovascular disease 436
8.7.3. Nutritional support and intervention 437
8.7.3.1. Pulmonary disease 437
8.7.3.2. Cardiovascular disease 438

8.8. Nutritional support in acute and chronic pancreatitis 441
8.8.1. Acute pancreatitis 441
8.8.1.1. Outcome predictors 442
8.8.1.2. Physiology and pathophysiology with respect to nutrition and fluid resuscitation..... 442
8.8.1.3. Treatment of acute pancreatitis 444
8.8.1.4. Nutritional support..... 445
8.8.2. Chronic pancreatitis..... 449
8.8.2.1. Nutritional treatment in chronic pancreatitis..... 449
8.9. Nutritional support for GI fistulas . 452
8.9.1. Definition and classifications 452
8.9.2. General principles of fistula treatment 453
8.9.3. Metabolic care and nutrition..... 454
8.9.4. Nutritional preparation for elective surgery of the persistent fistula..... 457
8.10. Nutritional support in extensive gut resection (short bowel syndrome) .. 459
8.10.1. Aetiology of short bowel syndrome .. 460
8.10.2. Pathophysiology 460
8.10.3. Complications of SBS..... 461
8.10.4. Small bowel adaptation 463
8.10.5. Management of SBS 463
8.10.6. Dietary management of SBS 464
8.10.7. The role of the dietician and specialist nurse in SBS treatment 468
8.11. Nutritional support in the diabetic patient 470
8.11.1. Dietary management of diabetes mellitus..... 471
8.11.2. Nutritional support of the diabetic... 471
8.11.3. Perioperative management 474
8.12. Nutritional support in burn patients 477
8.12.1. Pathophysiology 477
8.12.1.1. Fluid loss 477
8.12.1.2. Metabolic response..... 477
8.12.2. Treatment 478
8.12.2.1. Fluid resuscitation 478
8.12.2.2. Energy and substrate requirements .. 479
8.12.2.3. Nutriceuticals in burns..... 481
8.12.2.4. Route of nutritional administration.. 482
8.12.2.5. Non-nutritional measures 483
8.12.2.6. Monitoring the response to nutritional therapy 483
8.13. Nutritional support in cancer patients 485
8.13.1. General features of the nutritional support..... 486
8.13.2. Nutritional regimen 486
8.13.3. Indications..... 488
8.13.4. Perioperative nutrition..... 488
8.13.5. Non-surgical cancer patients..... 490
8.14. Cancer cachexia..... 496
8.14.1. Definition and classification 496
8.14.2. Pathophysiology 497
8.14.3. Clinical impact of cachexia 501
8.15. Radiation enteropathy 503
8.15.1. Risk factors for RE 504
8.15.2. Clinical approach 504
8.15.3. Role of oral dietetic regimens and parenteral nutrition 505
8.15.4. Nutritional regimen 506
8.15.5. Outcome..... 507
8.16. Nutritional support in AIDS..... 509
8.16.1. History and pathophysiology 509
8.16.2. Metabolic and nutritional consequences of HIV infection..... 510
8.16.3. Side effects of the drugs 510
8.16.4. Indications for and aims of nutritional support..... 511
8.16.5. Dietary counselling..... 513
8.17. Effect of anticachectic agents in cancer 514
8.17.1. Appetite-stimulating agents 514
8.17.2. Anticatabolic agents 516
8.17.3. Anabolic agents..... 517
8.17.4. Other agents 517
8.18. Nutrition and wound healing..... 519
8.18.1. Phases of wound healing 519
8.18.2. Non-healing chronic wounds 521
8.18.3. Local wound management 522
8.18.4. Nutrition and wound healing 522
8.18.5. Special substrates and wound healing 523
8.19. Nutrition and pressure ulcers 525
8.19.1. Classification and aetiology of pressure ulcers..... 525
8.19.2. Pathophysiology 526
8.19.3. Nutritional status and pressure ulcers..... 526
8.19.4. Nutritional management is relevant to total PU care 527

8.19.5. Nutritional intervention and pressure ulcers – what is currently known 527
8.20. Nutritional therapy for neurological disorders 531
8.20.1. Nutritional assessment..... 531
8.20.2. Nutritional requirements 532
8.20.3. Nutritional support 533
8.21. Eating disorders – Anorexia nervosa..... 536
8.21.1. Pathogenesis 537
8.21.2. Physiological changes..... 537
8.21.3. Clinical manifestations and complications 537
8.21.4. Complications 539
8.21.5. Nutritional assessment..... 539
8.21.6. Nutritional treatment..... 539
8.21.7. Long-term effects 540
8.22. Nutrition support in obese patients 542
8.22.1. The obesity paradox 542
8.22.2. Sarcopenic obesity 543
8.22.3. Consequences of obesity in the hospital setting 543
8.22.4. Critical care obese patients 544
8.22.5. Surgical obese patients..... 545
8.22.6. Non-surgical obese patients 545
8.22.7. Calories and Protein: how much?..... 546
8.22.8. Micronutrient deficiencies..... 546
8.22.9. Drug avoidance to prevent obesity... 547
8.23. Nutritional consequences of bariatric and metabolic surgery 551
8.23.1. Principal bariatric and metabolic modalities..... 551
8.23.2. Perioperative nutritional management 551
8.23.3. Expected weight loss 553
8.23.4. Early nutritional complications 554
8.23.5. Long-term nutritional and metabolic complications 555
8.23.6. Priorities in nutritional supplementation..... 556
8.23.7. Recommendations for pregnancy ... 558
8.23.8. Attention to children and adolescents 558
8.23.9. Refeeding the undernourished bariatric subject..... 559
8.24. Nutritional care of the polymorbid patient in medical wards 561
8.24.1. Pathophysiological considerations .. 561
8.24.2. Practical consequences 562
8.25. Nutritional support during pregnancy and breastfeeding..... 565
8.25.1. Pathophysiology 565
8.25.2. Indications for and aims of nutritional support..... 566
8.25.3. Parenteral nutrition in pregnancy and lactation..... 567
8.26. Nutritional support in neonatology 569
8.26.1. Enteral or parenteral nutrition? 570
8.26.2. Goals of nutritional support 571
8.26.3. Early nutritional management 572
8.26.4. Parenteral nutrition 573
8.26.5. Complications of parenteral nutrition..... 581
8.26.6. Monitoring of Nutritional Status 582
8.26.7. Enteral nutrition..... 583
8.27. Nutritional support in infants, children, and adolescents..... 587
8.27.1. Diagnostic approach..... 587
8.27.2. Nutritional support..... 589
8.27.2.1. Enteral nutrition 590
8.27.2.2. Parenteral nutrition 601
8.28. Nutrition in very old patients 611
8.28.1. Determinants of undernutrition in the elderly 612
8.28.1.1. Changes in body composition and function 613
8.28.1.2. Appetite in the elderly 615
8.28.1.3 Small-bowel bacterial overgrowth 617
8.28.1.4. The ageing immune system 617
8.28.2. Drug interactions in the elderly 618
8.28.3. Undernutrition in the elderly and outcomes 618
8.28.4. Detection of undernutrition in the elderly 619
8.28.5. Changes in nutrient requirements 621
8.28.6. Nutritional intervention 623
8.28.7. Ethical considerations 626
8.29. Home artificial nutrition 628
8.29.1. Home parenteral nutrition (HPN)... 628
8.29.1.1. Indications for HPN..... 629
8.29.1.2. Methods for HPN application..... 630
8.29.1.3. Complications of HPN..... 631
8.29.2. Home enteral nutrition (HEN)..... 632
8.29.2.1. Techniques of HEN 632

8.29.2.2. Complications of HEN. 633
8.29.3. How to begin home artificial nutrition. 633
8.30. Nutrition in sports 635
8.30.1. Energy expenditure during physical activity 636
8.30.1.1. Aerobic and anaerobic energy metabolism 636
8.30.2.2. Anaerobic and aerobic pathways for energy production 637
8.30.1.3. Exercise intensity and substrate utilisation. 640
8.30.1.4. Adaptations in metabolic and physiological systems depend on the type of exercise 641
8.30.2. Relative energy deficiency syndrome. 641
8.30.2.1. Pathogenesis 642
8.30.2.2. Clinical and performance relevance of relative energy deficiency in sports. 642
8.30.2.3. Diagnosis of relative energy deficiency in sports. 642
8.30.2.4. Treatment of relative energy deficiency in sports. 643
8.30.3. Sport-specific nutrition: The endurance athlete 645
8.30.3.1. Recommendation for daily nutrient intake for endurance athletes 645
8.30.3.2. Nutritional preparation of an endurance athlete for competition . . . 647
8.30.3.3 Recommendations for food and fluid intake during endurance competitions 647
8.30.3.4. Nutrition for recovery from competition or exhausting training sessions 648
8.30.4. Sport-specific nutrition: Power and strength sports. 648
8.30.4.1. Carbohydrate intake for power and strength sports. 649
8.30.4.2. Protein intake for power and strength sports. 649
8.30.4.3. Fat intake 651
8.30.5. Nutritional supplements in sports 651
