

Content

Foreword	3
Organising committee	6
Scientific Committee	6
Content	7
Programme	13
Oral presentation	21
Kyncl, Josef History of dendrochronology in the Czech Republic OR01	23
Pinto, Daniel The choir of Santa Cruz church in Coimbra, Portugal: comparing written sources and dendrochronological dating OR02	24
Grabner, Michael Timber in Vienna – the difference between felling and building date OR03	25
Gmińska-Nowak, Barbara Upper Mustang master chronology. Dendrochronological analysis of ancient architecture of Kingdom of Lo (Nepal). OR04	26
Barrett, Marie-Therese Unraveling the story of an Early Medieval crannog through tree-ring analysis OR05	27
Muigg, Bernhard Dendroarchaeology of early medieval water mills OR06	28
Christopoulou, Anastasia Following Schliemann – Potential of the Peloponnese peninsula for dendroarchaeology OR07	29
Oberhänsli, Monika Dendrochronological Dating of charcoal from high-altitude prehistoric copper mining sites in the Oberhalbstein Valley (Grisons, Switzerland) OR08	30
Christie, Duncan Inca rituals in the summits of the Andes of Atacama: a tale of the trees OR09	31
Keck, John R. Updating Holocene subfossil oak chronologies from Croatia and Bosnia-Herzegovina OR10	32
Tegel, Willy The prehistoric pile dwellings of the Lake Constance shore at Eschenz (CH) "Orkopf" from a dendroarchaeological perspective OR11	33
Rybníček, Michal World's oldest dendrochronologically dated archaeological wood construction OR12	34
Čufar, Katarina Dendrochronological questions related to musical instruments OR13	35
Doğan, Yasir Tree-ring dating of some musical instruments from Turkey OR14	36
Bernabei, Mauro A Guarneri in the attic OR15	37
Kusbach, Antonín Pedaanthracological records as tools for revelation of the forest history in the Khan Khentii Mts., northern Mongolia OR16	38
Van den Bulcke, Jan State-of-the-art multiscale X-ray CT scanning of increment cores OR17	39
Lehnebach, Romain X-ray CT analysis of wood formation: development and perspectives OR18	40

García-González, Ignacio Measuring and editing tree rings in ImageJ using the plugin TreeRingJ OR19	41
Mikhailovich, Anna P. Spatio-temporal dynamics of the upper tree line in the polar Urals: centuries-old downward and upward shift OR20	42
Mayer, Konrad A synoptic view on intra-annual density fluctuations OR21	43
Pérez-de-Lis, Gonzalo Can we chop a tree-ring into time-slices? What wood formation dynamics can bring to intra-annual tree-ring sciences. OR22	44
Häusser, Martin Differing effects of two consecutive extreme years on radial growth of pines along an elevation gradient on Corsica OR23	45
Tumajer, Jan Modelling intra-annual growth dynamics of <i>Picea abies</i> in treeline OR24	46
Myśkow, Elżbieta The impact of horse-chestnut leaf miner on cambial activity and differentiation of secondary conductive tissues of horse-chestnut OR25	47
Fajstavr, Marek Tree water status fluctuations directly affecting the xylem cell morphogenesis of drought-stressed Scots pine trees OR26	48
Vieira, Joana The effect of water manipulation on xylogenesis: adjusting rates rather than duration OR27	50
Zhu, Liangjun Temperature rather than precipitation limits vessel features in earlywood and radial growth of Manchurian ash (<i>Fraxinus mandshurica</i> Rupr.) in temperate forests OR28	51
García-González, Ignacio Complex climate-growth relationships of ring-porous oaks are optimized by combining earlywood vessels and latewood width: some examples from northwestern Iberia OR29	53
Krejza, Jan Time lag between stem radial increment and stem carbon allocation and its consequences to net ecosystem production OR30	54
Marchand, Lorène Julia Inter-individual variability in spring phenology of late successional temperate deciduous trees is determined by tree growth characteristics and previous year autumn phenology OR31	55
Dox, Inge New insights on autumn phenology of temperate deciduous trees: comparison of cessation of woody growth and onset of foliar senescence in autumn in the European beech and the silver birch along their distributional range in Europe OR32	56
Bijak, Szymon Does growing longer mean growing wider? OR33	58
Dobrovolný, Petr Past climate from chronicles to trees and beyond OR34	59
Yermokhin, Maxim Impact of climatic factors on the radial increment of hornbeam and grey alder at the borders of their ranges OR35	60
Treml, Václav How coherent are stand-level tree growth trends and climate responses in conifer forests of Central Europe? OR36	61
Trlin, Domagoj Climate sensitivity of narrow-leaved ash in floodplains OR37	62
Lyu, Lixin Drought limitation on tree growth at the Northern Hemisphere's highest tree line OR38	63
Žmegač, Anja Climate sensitivity of black pine from mountainous coastal area in Croatia OR39	64

Akkemik, Ünal October–July precipitation reconstruction for Northern Kazakhstan since 1744 OR40	65
Malik, Rayees Ahmad Climate reconstruction potential of pindrow fir tree rings from northwestern Himalaya OR41	66
Sarir, Ahmad A 424-year tree-ring based PDSI reconstruction of Deodar from Chitral HinduKush Range of Pakistan: linkages to the ocean oscillations OR42	67
Kshetrimayum, Ghanashyam Singh Tree ring analysis of himalayan cedar in relation to climate in sub-tropical moist forest of northeast India OR43	68
Nongthombam, Dhirendra Singh Tree ring formation and intra annual density fluctuation in relation to climate in a sub tropical pine forest OR44	69
Férriz, Macarena Understanding mortality in two co-occurring Mediterranean coniferous species of different drought-tolerance OR45	70
Trouillier, Mario Size, not age, affects trees' climate sensitivity OR46	71
Huang, Weiwei Predictions of future growth based on tree ring chronologies: How sure can we be? OR47	72
Gennaretti, Fabio Divergent tree physiological states in black spruce stands and their implications for millennial-long dendroclimatic reconstructions OR48	73
Novak, Klemen Aleppo pine forest decline in semiarid Mediterranean ecosystems in southeast Spain OR49	74
Drobyshev, Igor Variability in masting of European beech at different time scales: analysis of 329 year long dendrochronological reconstruction from Southern Sweden OR50	75
Plichta, Roman Beech seedlings are more prone to hydraulic dysfunction in spring than in summer OR51	76
Kašpar, Jakub Woody species-specific disturbance regimes and strategies in mixed mountain temperate forests in the Šumava Mts., Czech Republic OR52	77
Čada, Vojtěch Dendrochronological quantification of natural disturbances in the European mountain spruce forests as a guideline for management OR53	78
Matulewski, Paweł Methodological challenges and pitfalls in cross-dating of tree roots subjected to trampling (<i>Pinus sylvestris</i> L., NE Poland) OR54	79
Begović, Krešimir Are forests getting younger? A case study of environmental changes impact on growth dynamics of primary forests of Carpathians. OR55	80
Phulara, Mohit Response of alike tree species at different sites of IHR along treeline ecotone OR56	81
Khan, Afsheen Resilience in some lower Himalayan conifers under disturbed condition; a preliminary tree ring study of growth OR57	82
Kemp, Marthie Elizabeth Exploring the dendroecological potential of riparian Poplar trees, Caledon river, South Africa OR58	83
Poster presentation	85
Akkemik, Ünal A preliminary result from ecological wood anatomy of <i>Quercus ilex</i> in different regions of Turkey PO01	87

Baz, Sher Regeneration potential of conifers in lesser Himalayan tropics under disturbance PO02	88
Bijak, Szymon Tree-ring based dating of the wooden temple in Górzanka (SE Poland) PO03	89
Bleicher, Niels dd+ A new dendro Software for large data sets and for institutions with archives PO04	90
Campelo, Filipe A step-by-step guide to describe wood formation PO05	91
Chojnacka-Ożga, Longina Growth reaction of different Scots pine provenances planted in the central Poland PO06	92
Chojnacka-Ożga, Longina The role of the climatic factors in the process of ash dieback in Poland. PO07	93
Čada, Vojtěch Effect of competition on spruce wood density PO08	94
Dimitrov, Dimitar Petrov Ecoclimatological differentiation and climate susceptibility of European beech (<i>Fagus sylvatica</i> L.) from Balkan Range Mountain (Bulgaria) dendrochronological network PO09	95
Dimitrov, Dimitar Petrov Taxonomical status and tree-ring chronology building from timber excavated from different archaeological sites in Bulgaria PO10	96
Fatiha, Abdoun In situ regeneration and radial growth of Tassili cypress PO11	97
Fomin, Valery V. The effect of the hydromelioration of lowland and highland swamps on the characteristics of forest biogeocoenosis in the middle Urals (Russia) PO12	98
Garcia-Forner, Núria Regulation of bimodal xylem formation pattern in <i>Pinus pinaster</i> saplings PO13	99
Gmińska-Nowak, Barbara Tree-ring studies in Upper Mustang (Nepal). Development of a chronology from Himalayan juniper – chances and limitations. PO14	100
Goisser, Michael Martin Catch the drift: An easy method to quantify sensor related thermal expansion effects on dendrometer measurements PO15	101
Grigoriev, Andrey A. Features of the formation of larch and birch tree stands in the mountains of the subpolar Urals in the conditions of climate change PO16	102
Grynaeus, András Dendrochronological analysis of „Hungarian“ medieval paintings PO17	103
Guada, Guillermo The effect of temperature on wood formation and phenology of oak along two altitudinal gradients under Atlantic climate PO18	104
Hauserová, Eliška Influence of site conditions and stand structure on basic density of stemwood of Silver birch (<i>Betula pendula</i> Roth.) PO19	105
Henley, Benjamin J. Piloting the development of new alpine hydroclimate records from southeastern Australia using wood properties PO20	106
Ifticene-Habani, Naima Influence of climate on radial growth of atlas pistachio in Algeria according to a gradient of aridity PO21	107
Izworska, Katarzyna The growth dynamics of the stone pine (<i>Pinus cembra</i> L.) in cliff forest of the Tatra Mountains PO22	108

Jiang, Yuan Intra-annual xylem growth of prince rupprecht larch at its upper and lower distribution limits on the Luyashan mountain in north-central China PO23	109
Kang, Mui Early monsoon failure and mid-summer dryness induces growth cessation of lower range margin <i>Picea crassifolia</i> PO24	110
Karanitsch-Ackerl, Sandra Introducing a new approach for assessing the temporally variable reconstruction reliability of tree-ring chronologies PO25	111
Kašpar, Jakub Changes in radial growth of <i>Fagus sylvatica</i> L. due to creep in flysch zone of the Carpathians, Czech Republic PO26	112
Kern, Zoltán Early Iron Age floating oak chronology from Eresztvény Forest (Fehérvárcsurgó, Hungary) PO27	113
Kolář, Tomáš Pollution control in the 1980s contributed to unprecedented spruce growth in the "Black Triangle", the Czech-Polish border region PO28	114
Krąpiec, Marek Reconstruction of the Holocene palaeoclimatic changes on the basis of subfossil peatland trees' dendrochronology and peat stratigraphy: the Puścizna Wielka raised bog (Polish Western Carpathians) related to selected peatlands of the Northern Poland PO29	115
Läänelaid, Alar Dendrochronologically dated stringed instruments from Estonia PO30	116
Lukac, Ljubica Bosnian pine tree-ring width chronology in the subalpine belt of the southeastern Dinaric Mountains – preliminary results PO31	117
Matisons, Roberts Tracheid size and cell wall thickness of some provenances of Scots pine in Latvia PO32	118
Matisons, Roberts Wood rays in tree-rings of Scots pine PO33	119
Mikac, Stjepan Tree climate sensitivity in environmental and geographical space over Europe PO34	120
Mykhalivna, Koval Iryna Influence of climate change on the radial growth of European ash in the stands of the Western and Eastern Forest-steppe of Ukraine PO35	121
Nechita, Constantin Radial growth resilience of <i>Quercus</i> spp. after drought in extra-Carpathian region of Romania PO36	122
Nechita, Constantin Climatic and anthropogenic influences in the northern Romania peat bog interpreted from tree-ring widths PO37	123
Orešković, Marko Climate sensitivity of Norway spruce (<i>Picea abies</i> (L.) H. Karst.) in the Dinaric Alps PO38	124
Péres-de-Lis, Gonzalo Tree ring dating and provenance of oaks from a 17th century slipway buried in the Tagus riverbank, Lisbon (Portugal) PO39	125
Popa, Ionel Intra-annual shoots length growth of trees and dwarf shrubs in treeline of Eastern Carpathians PO40	126
Power, Candice Casandra How do sea ice and climate interact to determine willow growth across Greenland? PO41	127
Pukienė, Rūtilė Dendrochronological analysis in support for historical sources: evidence of the battles for the medieval Vilnius Castles PO42	128

Pukienė, Rūtilė Prospects of dendropyrological research into raised bogs in Lithuania PO43	129
Rodrigo, Ruffy Diameter distributions related to age and disturbance history in Carpathians primary spruce forest in Europe PO44	130
Romero, Eunice Growth rings in successional species of a seasonal tropical dry forest in Mexico PO45	131
Schönfelder, Ondřej Effect of regeneration method on within-stem distribution of wood density of Scots pine PO46	132
Shevelina, Irina V. Standards for estimating the birch stem volume in urban green space PO47	133
Stojanović, Marko Relationships between phenology and ecophysiology in two contrasting ring-porous tree species PO48	134
Světlik, Jan Outside-xylem tissues as the main origin of daily stem diameter variation in mature trees of Norway spruce PO49	135
Szychowska-Krapiec, Elżbieta Medieval gold mine in Żłoty Stok (SW Poland): the oldest traces of mining and metallurgy in the light of the radiocarbon and dendrochronological dating. PO50	136
Šenfeldr, Martin Differences in radial growth response to climate between Norway spruce and Dwarf pine growing in the treeline ecotone PO51	137
Tomusiak, Robert Spatio-temporal relationship between false rings and climate at Mayna in Republic of Khakassia, Russia PO52	138
Treimane, Agita Cowberry cover and age structure in Cladinoso-calunosa forest type (Latvia) PO53	139
Vejpustková, Monika Climate response of Douglas fir reveals recently increased sensitivity to drought stress in Central Europe PO54	140
Vitas, Adomas Medieval oak chronology from Klaipėda, Lithuania PO55	141
Wächter, Elisabeth Spatial and temporal variability of wood species selection for timber in Austria PO56	142
Wojtan, Rafał Dendrochronological analysis of the common ash in Poland. PO57	143
Zalesov, Sergei V. Analysis of the forest fires frequency using fire scars in the conditions of the forest-steppe zone in the Urals PO58	144
Zharnikov, Zakhar Yurievich Dating of the Russian heritage – St. Michael the Archangel Church (Transbaikalia) PO59	145
Zunde, Māris The first historical oak tree-ring chronologies for Latvia PO60	146
Excursion	147
List of participant	152
