1. Introduction

7

- 1.1. Historical Development of Composite and Nanocomposite Materials

8

2. Basic Concepts of nanocomposites

12

- 2.1. The Basic clasification of Nanocomposite Materials

17

- 2.1.1. Metal-Matrix Nanocomposites

17

- 2.1.2. Ceramic-Matrix Nanocomposites

19

- 2.1.3. Polymer-Matrix Nanocomposites

21

Summary

23

References

24

3. Nanofillers for Nanocomposites

28

- 3.1. Layered Nanofillers

31

- 3.1.1. Natural Layered Silicate Minerals

31

- 3.1.2. Graphite, Graphene and Other Graphitic Layers

34

- 3.1.3. Oxides, Nitrides and Sulphides of Metals Layers

37

- 3.2. Tubular and Fibrous Nanofillers

41

- 3.2.1. Carbon Nanotubes, Boron Nitride Nanotubes

42

- 3.2.2. Silicon/ Silica/Silicate Nanotubes

47

- 3.2.3. Tubular Oxides, and Sulphides

50

- 3.2.4. Natural Bionanofillers

56

- 3.2.5. Hybrid nanomaterials

58

Summary

60

References

61

4. Basic Methods of nanofillers for Nanocomposite Materials

Preparation

71

- 4.1. Sol-Gel Technique

72

- 4.2. Hydrothermal Methods

80

- 4.3. Ultrasound Techniques

80

Summary

84

Reference

85

- 4.4. Deposition Techniques

88

4.4.1. Chemical Vapor Deposition	88
4.4.2. Physical Vapor Deposition	91
Summary	94
Reference	95
4.5. Milling Techniques	96
4.5.1 Reactive Ball Milling	98
Summary	104
Reference	104
5. Methods For Nanocomposites Preparation	108
5.1. Metal Matrix Nanocomposites	108
5.2. Ceramic Matrix Nanocomposites	109
5.3. Processes for Polymeric Nanocomposite	112
5.3.1. Polymer Melt Intercalation	117
5.3.2. Intercalation of Polymer or Pre-polymer from Solution	118
5.3.3. Direct Compounding	119
Summary	120
Reference	120
5.4. In - Situ Synthesis	125
Summary	127
References	127
6. Application	129
6.1. Hybrid Nanocomposites	141
References	142
