

TABLE OF CONTENTS

1: THE ENVIRONMENT AND THE ANTHROSPHERE

Introduction	1
The Environment	2
Components of the Anthrosphere	3
Technology and the Anthrosphere	5
Infrastructure	6
Manufacturing and its Byproducts	9
Transportation	11
Communications	12
Food and Agriculture	13
Effects of the Anthrosphere on Earth	14
Integration of the Anthrosphere into the Total Environment	15
Environmental Protection and the Regulatory Approach to Pollution.	17
The Anthrosphere and Industrial Ecology	20

2: INDUSTRIAL ECOLOGY AND INDUSTRIAL SYSTEMS

Introduction and History	23
Levels of Materials Utilization	26
Links to Other Environmental Spheres	27
Consideration of Environmental Impacts in Industrial Ecology	30
Three Key Attributes: Energy, Materials, Diversity	31
Industrial Ecology and Material Resources	34
Societal Factors and the Environmental Ethic	37

3: PRINCIPLES OF INDUSTRIAL METABOLISM

Introduction	39
Industrial Metabolism and Biological Analogies	43
Material and Energy Flow in Industrial Metabolism	45

Industrial Metabolism	47
Optimizing Industrial Metabolism	49
Internalization (Closing) the Materials Cycle	50
Systems Integration and Industrial Metabolism	51
Eco-Efficiency	52
4: INDUSTRIAL ECOSYSTEMS	
Introduction.	57
The Four Major Components of an Industrial Ecosystem	59
Overview of an Integrated Industrial Ecosystem	62
The Kalundborg Example	62
Other Industrial Ecosystems	65
Coal-Based Industrial Ecosystems	66
The Petroleum Industry as an Example of Systems Integration	68
Implementation and Organization of Industrial Ecosystems	70
5: LIFE CYCLES: PRODUCTS, PROCESSES, AND FACILITIES	
Life Cycles: Expanding and Closing the Materials Loop	75
Life-Cycle Assessment	78
Materials and Product Budgets	79
Consumable, Recyclable, and Service (Durable) Products	81
Design for Environment	83
Design for Recycling	85
Kinds of Materials Recycled	88
Efficient Use of Materials Through Industrial Ecology	90
Improvement Analysis	93
6: INDUSTRIAL ECOLOGY AND RESOURCES	
Introduction	99
Minerals in the Geosphere	100
Extraction and Mining	101
Metals	103
Metal Resources and Industrial Ecology	103
Hazardous Wastes and Metals	112
Nonmetal Mineral Resources	113
Phosphates.	114
Sulfur	116
Soil Resources	117
Water Resources	119
Extending Resources with Industrial Ecology	121
7: ENVIRONMENTAL CHEMISTRY AND INDUSTRIAL ECOLOGY	
Environmental Chemistry	125
Water	126
Aquatic Chemistry	128

The Geosphere	131
Soil	132
Geochemistry and Soil Chemistry	133
The Atmosphere	137
Atmospheric Chemistry	138
The Biosphere	141
Toxicological Chemistry	142

8: HAZARDOUS SUBSTANCES AND WASTES

Introduction and History	145
Kinds of Hazardous Substances	148
Regulatory Classifications of Hazardous Wastes	149
Physical Nature and Classification of Wastes	151
Chemical Nature and Classification of Hazardous Substances and Wastes	152
Toxic Wastes	157
Waste Management	157
Sources and Generators of Wastes	160

9: ENVIRONMENTAL CHEMISTRY OF HAZARDOUS MATERIALS

Introduction	163
Hazardous Wastes and the Anthrosphere	164
Physical and Chemical Properties of Hazardous Wastes	165
Transport, Effects, and Fates of Hazardous Waste Substances in the Anthrosphere	166
Transport, Effects, and Fates of Hazardous Waste Substances in the Geosphere	166
Transport, Effects, and Fates of Hazardous Waste Substances in the Hydrosphere	169
Transport, Effects, and Fates of Hazardous Waste Substances in the Atmosphere	171
Transport, Effects, and Fates of Hazardous Waste Substances in the Biosphere	173

10: HAZARDOUS INORGANIC AND ORGANOMETALLIC MATERIALS

Introduction	177
Hazardous Nonmetallic Elements	178
Hazardous Metals and Metalloids	180
Hazardous Inorganic Compounds	182
Hazardous Organometallic Compounds	188

11: HAZARDOUS ORGANIC MATERIALS

Organic Hazardous Waste Forms	195
Hydrocarbons	196

Organooxygen Compounds	198
Organonitrogen Compounds	199
Organohalide Compounds	201
Organosulfur Compounds	206
Organophosphorus Compounds	210
Polychlorinated Biphenyls	213
Dioxins in Hazardous Wastes	214

12: TOXICOLGICAL AND BIOLOGICAL HAZARDS

Introduction	217
Toxicology	217
Toxicological Chemistry	220
Assessment of Toxicological Hazards	226
Toxic Elements and Elemental Forms	228
Toxic Inorganic Compounds	229
Organometallic Compounds	234
Hydrocarbons	235
Oxygen-Containing Organic Compounds	236
Organonitrogen Compounds	239
Organohalide Compounds	240
Organosulfur Compounds	241
Organophosphorus Compounds	243
Biohazards	244
Hazardous Natural Products	245

13: INDUSTRIAL ECOLOGY OF WASTE MINIMIZATION

Introduction	249
Waste Management for Resource Recovery	249
Recycling	256
Waste Oil Utilization and Recovery	259
Recovery of Solutes from Wastewater	260
Recovery of Water from Wastewater	263
Solvent Recovery	264

14: INDUSTRIAL ECOLOGY OF WASTE TREATMENT

Introduction	267
Physical Methods of Waste Treatment	267
Chemical Treatment of Wastes	272
Acid/Base Neutralization	272
Chemical Precipitation	273
Chemical Flocculation	275
Oxidation/Reduction	275
Electrolysis	277
Reaction with Water	278
Chemical Extraction and Leaching	279

Ion Exchange	280
Chemical Destruction of PCBs	280
Photolytic Reactions	281
Thermal Treatment Methods	282
Biodegradation of Wastes	286
Factors Involved in Biological Treatment	287
Aerobic Treatment of Organic Wastes	289
Anaerobic Treatment of Organic Wastes	290
Composting and Land Treatment	291
Bacterial Destruction of PCBs	293

15: INDUSTRIAL ECOLOGY OF WASTE DISPOSAL

Immobilization	295
Chemical Fixation	296
Physical Fixation	297
Ultimate Disposal	301
<i>In Situ</i> Treatment	303
