ABSTRAKT	3
SUMMARY	4
INTRODUCTION	6
1 STATE OF THE ART	7
2 OBJECTIVES OF THE HABILITATION THESIS	10
3 THEORETICAL BACKGROUND	11
3.1 Tire loading	11
3.2 Complex fracture behaviour of rubber	12
3.2.1 Endurance limit	14
3.2.2 Stable crack growth	15
3.2.3 Ultimate strength	15
3.3 Fracture processes on tire material in service	16
4. METHODS FOR EXPERIMENTAL DETERMINATION OF COMPLEX FRACTURE BEHAVIOUR OF RUBBER	17
4.1 Complex fracture behaviour of rubber	17
4.1.1 Endurance limit	17
4.1.2 Stable crack growth	18
4.1.3 Ultimate strength	20
4.2 Fracture processes on tire material in service	20
5. MATERIALS	22
6. RESULTS AND DISCUSSION	23
6.1 Complex fracture behaviour of rubber	23
6.1.1 Endurance limit	23
6.1.2 Stable crack growth	25
6.1.3 Ultimate strength	27
6.1.4 Reconstruction of the complete Paris Erdogan plot	27
6.1.5 Fracture processes on tire material in service	28
7. CONTRIBUTION OF THE THESIS TO SCIENCE AND PRACTICE	32
8. CONCLUSION	34
REFERENCES	36
LIST OF SYMBOLS, ACRONYMS AND ABBREVIATIONS USED	39
LIST OF FIGURES	41
LIST OF TABLES	43
CURRICULUM VITAE	44
