List of Figures	xv
List of Tables	xix
Preface	xxi
About the Author	xxiii
1 Introduction to Operational Risk	1
1.1 Why Regulate Banks?	1
1.2 Additional Supervision	4
1.3 The Basel Regulatory Effort	10
1.4 Risk and Capital	13
1.4.1 How Do We Define Risk?	13
1.4.2 What Is Risk Management?	16
1.4.3 Capital	17
1.4.4 Liquidity	22
1.4.5 Ruin Theory	24
1.4.6 Risk and Aversion	26
1.5 What Is Operational Risk?	28
1.6 Economic Capital for Operational Risk	34
1.7 Operational Risk under Basel 2	36
1.7.1 Basic Indicator Approach	36
1.7.2 Standardised Approach	37
1.7.3 Advanced Measurement Approach	39
1.8 Role of Insurance	40
1.9 Regulation after the Crisis	44
2 The Problem Context	49
2.1 General Remarks	49
2.2 The Data Problem	50
2.2.1 Scaling	51
2.2.2 Mixing	51
2.2.3 Paucity	51
2.2.4 External Loss Data	53
2.3 The Dependency Problem	53

2.4	The Insurance Problem	54
2.5	The Mapping Problem	54
2.6	The Management Problem	58
2.7	Strategic Risks of a Bank	58
2.8	AMA Standards	59
2.9	The Knowledge Problem	61
2.10	Probability, Causality and Other Primitives	61
2.10.1	Probability	62
2.10.1.1	Classical Probability	62
2.10.1.2	Logical Probability	63
2.10.1.3	Frequency Interpretations	64
2.10.1.4	Propensity Interpretations	65
2.10.1.5	Subjective Probability	65
2.10.2	Causality and Correlation	67
2.10.3	Elicitation and Expert Knowledge	74
2.10.3.1	Individual Bias	74
2.10.3.2	Group Bias	78
2.10.3.3	Elicitation Theory	80
2.10.4	Risk Perception and Risk Judgements	82
3	The Modelling Approach	85
3.1	Simulation and the Monte Carlo Method	85
3.1.1	General Concepts	85
3.1.2	Monte Carlo Simulation	86
3.1.3	Loss Distribution Approach and Simulation	90
3.2	General Model Structure	91
3.2.1	Modelling Losses	92
3.3	Data Requirements	94
3.3.1	External Data Usage	95
3.4	Data Modelling and Distributions	96
3.4.1	Distributions	97
3.4.2	Annual Aggregate Loss Distributions	98
3.4.3	Compound Distributions	102
3.4.3.1	Frequency Distributions	104
3.4.3.2	Severity Distributions	107
3.4.3.3	Creating New Distributions	118
3.4.3.4	Tails of the Distributions	122
3.4.3.5	Moments of the Compound Distribution	124
3.4.4	Data Fitting	126
3.4.4.1	Parameter Estimation	126
3.4.4.2	Goodness-of-Fit Tests	139
3.4.4.3	Graphical Analysis	141
3.4.4.4	Extreme Value Theory	143
3.4.5	Random Number Generators	144
3.5	Run-Through Example: Quantitative Impact Study Data	146

3.6	Correlation of Losses	152
3.6.1	Motivation	152
3.6.2	Measures of Association	153
3.6.3	Model Choices	158
3.6.4	The Normal Transformation	159
3.6.4.1	The Correlation Transformed	161
3.6.4.2	Feasibility	162
3.6.4.3	Extension beyond Normality	164
3.6.5	Correlation of the Total Losses	167
3.6.6	Estimation of the Correlations	169
3.6.7	Testing for Correlation	171
3.6.7.1	Parametric Tests	171
3.6.7.2	Rank-Based Tests	172
3.6.7.3	Dependencies between Events and Business Lines	175
3.6.7.4	Sound Correlations?	176
3.7	Risk Measures and Allocation	177
3.7.1	Risk Measures	177
3.7.2	Coherent Risk Measures	179
3.7.3	Comparing VaR with Expected Shortfall	181
3.7.4	Allocation	183
3.7.5	Some Properties	184
3.7.6	Allocating Methods	185
3.7.6.1	Covariance Principle	185
3.7.6.2	Expected Shortfall	186
3.7.7	Simulating the Risk Measures	188
3.8	Insurance Modelling and Mitigation	189
3.8.1	Insurance	189
3.8.1.1	Insurance Characteristics	190
3.8.1.2	Insurance Pricing	195
3.8.2	Dedicated Provisions	198
3.9	Mapping Events to Insurance Policies	200
3.9.1	Motivation	200
3.9.2	Preliminaries	201
3.9.3	Nominal Categories	202
3.9.4	Quantitative Consideration	203
3.9.4.1	Estimating a Map	204
3.9.4.2	Back-Testing	205
3.10	Mapping Events to Lines of Business	209
3.10.1	The Simulation Model	209
3.10.2	The Map from Optimisation	210
3.11	Calculating the Economic Capital	215
3.11.1	Accuracy of Result	215
3.11.2	The Jackknife Estimator	216
3.11.3	Conditioning the Data	218

3.12	Results of the Run-Through Example	219
3.12.1	The Economic Capital	220
3.12.2	Insurance Effect	223
3.12.3	Comparison with the Standardised Approach	225
3.13	Summary and Conclusion	226
4	Managing Operational Risk	227
4.1	Management and Organisation	227
4.1.1	Management System	227
4.1.1.1	Conception of Man	228
4.1.1.2	Leadership Theory	230
4.1.1.3	Motivation Theory	232
4.1.1.4	Management Styles	234
4.1.2	Organisational Structures	236
4.1.3	Agency Theory	246
4.2	Environment	247
4.2.1	External Environment	248
4.2.2	Internal Environment	250
4.3	Culture	253
4.3.1	America and Europe	255
4.3.2	Gender Differences	256
4.3.3	Legal Systems	257
4.3.4	Crime	261
4.3.5	Communication	264
4.3.6	Innumeracy, or More on Communication	266
4.4	Operational Risk Framework	273
4.5	Operational Risk Structure	276
4.6	Operational Risk Process	281
4.6.1	Risk Objectives	281
4.6.2	Risk Identification	282
4.6.3	Risk Assessment and Measurement	286
4.6.4	Risk Monitoring and Communication	287
4.6.5	Risk Mitigation and Control	291
4.7	Business Environment and Internal Control Factors	293
4.7.1	Business Environment	293
4.7.2	Internal Control	294
4.7.3	Factors and Indices	301
4.7.4	Implications for the AMA	308
4.8	Scenario Analysis	311
4.9	Optimising the Insurance Programme	317
4.9.1	What Is Optimisation?	317
4.9.2	The Variables	318
4.9.3	The Objective Function	319
4.9.4	Cost and Benefit of Risk Mitigation	321
4.10	Audit, Reporting and Disclosure of Operational Risk	323

4.10.1 Financial Audit	323
4.10.2 Controls Testing	327
4.10.3 Regulatory Audit	330
4.11 Risk Management versus Internal Control	336
4.12 Summary and Conclusion	340

5 Conclusions	343
----------------------	------------

Appendix	347
-----------------	------------

1 Factors Influencing Risk Perception	349
2 Various Death or Harm Frequencies	350
3 Basel 2's Loss Event Type Classification	351
4 Some Regulatory Report Templates	356
5 Monte Carlo Example	358

Bibliography	361
