**Guinea Pig (Cav) 147**

# Cun Rabbit

*Oryctolagus cuniculus*  
f. *domestica*

|    |                                                                                                                           |    |
|----|---------------------------------------------------------------------------------------------------------------------------|----|
| 1  | Skeleton . . . . .                                                                                                        | 14 |
| 2  | Superficial muscles of the body,<br>cutaneous muscles removed . . . . .                                                   | 15 |
| 3  | General view of the viscera from the right side . . . . .                                                                 | 16 |
| 4  | General view of the viscera from the left side . . . . .                                                                  | 17 |
| 5  | Skeleton of the head from the left side . . . . .                                                                         | 18 |
| 6  | Skeleton of the head from the left side . . . . .                                                                         | 19 |
| 7  | Median section through the head; view of the left side . . . . .                                                          | 20 |
| 8  | Median section through the head; view of the left side . . . . .                                                          | 21 |
| 9  | Orbit; view of the left side . . . . .                                                                                    | 22 |
| 10 | The tympanic and petrous parts of the temporal region . . . . .                                                           | 23 |
| 11 | Skull; dorsal view . . . . .                                                                                              | 24 |
| 12 | Base of skull; view from above . . . . .                                                                                  | 25 |
| 13 | Skull; view of the ventral surface . . . . .                                                                              | 26 |
| 14 | Skull; view of the ventral surface . . . . .                                                                              | 27 |
| 15 | Chondrocranium of 24-day-old foetus (distance between<br>crown and rump, 45 mm); view of the dorsal surface . . . . .     | 28 |
| 16 | Mandible; view of the left lateral and right medial surfaces<br>and the mylohyoideum viewed from the right side . . . . . | 29 |
| 17 | Cutaneous muscles of the head . . . . .                                                                                   | 30 |
| 18 | Muscles of the head; superficial layer . . . . .                                                                          | 31 |
| 19 | Mastication muscles; view of the lateral surface . . . . .                                                                | 32 |
| 20 | Mastication muscles; view of the medial surface . . . . .                                                                 | 33 |
| 21 | Head and the adjacent part of the neck; superficial layer . . . . .                                                       | 34 |
| 22 | <i>Nervus facialis</i> and its facial branches . . . . .                                                                  | 35 |
| 23 | Variations of the branches of <i>nervus facialis</i> . . . . .                                                            | 36 |
| 24 | Lateral surface of the head; deep layer . . . . .                                                                         | 37 |
| 25 | Paramedian section through the head . . . . .                                                                             | 38 |
| 26 | Skeletotopia of the arteries of the head . . . . .                                                                        | 39 |
| 27 | Skeletotopia of the veins of the head . . . . .                                                                           | 40 |
| 28 | Deep intermandibular layer with hyoidal and laryngeal<br>muscles; ventral view . . . . .                                  | 41 |
| 29 | Tongue, larynx, pharynx; view of the dorsal surface . . . . .                                                             | 42 |
| 30 | Palate and upper dental arch . . . . .                                                                                    | 43 |
| 31 | Deep layers of the orbit . . . . .                                                                                        | 44 |
| 32 | Bulb of the left eye; view of the lateral surface and<br>anterior part of the vitreous chamber . . . . .                  | 45 |
| 33 | Auricle and the left auricular cartilages . . . . .                                                                       | 46 |
| 34 | Head and neck; view of the ventral surface . . . . .                                                                      | 47 |
| 35 | Brain; view of the dorsal and ventral surfaces . . . . .                                                                  | 48 |
| 36 | Cerebral arteries; view of the dorsal and ventral surfaces . . . . .                                                      | 49 |
| 37 | Base of lateral cerebral ventricle and cerebral trunk;<br>dorsal view . . . . .                                           | 50 |
| 38 | Brain, showing the major veins; view of the lateral surface . . . . .                                                     | 51 |
| 39 | Median section of the brain . . . . .                                                                                     | 52 |
| 40 | Cerebellum; view of rostral, caudal, and ventral<br>surfaces . . . . .                                                    | 53 |
| 41 | Left side of the cervical vertebrae and isolated vertebrae . . . . .                                                      | 54 |
| 42 | Deep muscles of the neck . . . . .                                                                                        | 55 |
| 43 | Neck; superficial layer . . . . .                                                                                         | 56 |
| 44 | Skeletotopia of the cervical arteries from the left side . . . . .                                                        | 57 |
| 45 | Cross-section through the neck at the level of the<br>second vertebra . . . . .                                           | 58 |
| 46 | Skeleton and muscles of the larynx and the syntopy of the<br>organs in the laryngeal region . . . . .                     | 59 |
| 47 | Skeleton of the thorax region from the left side . . . . .                                                                | 60 |
| 48 | Thoracic spine and isolated thoracic vertebrae . . . . .                                                                  | 61 |
| 49 | The lumbar vertebrae . . . . .                                                                                            | 62 |
| 50 | Muscles of the trunk from the left side . . . . .                                                                         | 63 |
| 51 | Trunk from the left side . . . . .                                                                                        | 64 |
| 52 | Caudal part of the neck, chest, shoulder and arm<br>from the left side . . . . .                                          | 65 |
| 53 | Pectoral and ventral cervical muscles . . . . .                                                                           | 66 |
| 54 | Viscera of the thoracic cavity from the right side . . . . .                                                              | 67 |

|     |                                                                                                                                                                                                                               |     |
|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 55  | Viscera of the thoracic cavity from the left side . . . . .                                                                                                                                                                   | 68  |
| 56  | Skelotopia of the vessels of the thoracic cavity . . . . .                                                                                                                                                                    | 69  |
| 57  | Skelotopia of the branches of the thoracic aorta . . . . .                                                                                                                                                                    | 70  |
| 58  | Thoracic part of the thymus; view of the left and right sides . . . . .                                                                                                                                                       | 71  |
| 59  | The lungs; left and right surfaces . . . . .                                                                                                                                                                                  | 72  |
| 60  | The lungs; left and right mediastinal surfaces . . . . .                                                                                                                                                                      | 73  |
| 61  | The lungs and the heart; view of the diaphragmatic surface . . . . .                                                                                                                                                          | 74  |
| 62  | The heart from the left and right sides . . . . .                                                                                                                                                                             | 75  |
| 63  | Cavities of the heart; view of the right ventricle and the left atrium and ventricle . . . . .                                                                                                                                | 76  |
| 64  | Syntopy of the organs dorsal to the cardiac base and the cardiac base itself; dorsal view . . . . .                                                                                                                           | 77  |
| 65  | Viscera of the thorax entering from the left side . . . . .                                                                                                                                                                   | 78  |
| 66  | The diaphragm; view of the caudal surface . . . . .                                                                                                                                                                           | 79  |
| 67  | Syntopy of organs at the diaphragm . . . . .                                                                                                                                                                                  | 80  |
| 68  | Abdominal viscera from the right side; diaphragm removed . . . . .                                                                                                                                                            | 81  |
| 69  | Abdominal viscera from the left side; diaphragm removed . . . . .                                                                                                                                                             | 82  |
| 70  | Abdominal viscera; ventral aspect . . . . .                                                                                                                                                                                   | 83  |
| 71  | Viscera <i>in situ</i> of gravid female; ventral aspect . . . . .                                                                                                                                                             | 84  |
| 72  | Bowels (opened out); view from the left side . . . . .                                                                                                                                                                        | 85  |
| 73  | Viscera on the dorsal surface of the abdominal cavity of the male . . . . .                                                                                                                                                   | 86  |
| 74  | Transverse section through the abdomen at the level of the third lumbar vertebra . . . . .                                                                                                                                    | 87  |
| 75  | The stomach; view of the visceral surface and a transverse section . . . . .                                                                                                                                                  | 88  |
| 76  | The liver; view of the diaphragmatic and visceral surfaces . . . . .                                                                                                                                                          | 89  |
| 77  | Syntopy of the cranial abdominal organs . . . . .                                                                                                                                                                             | 90  |
| 78  | Intestines from the right side . . . . .                                                                                                                                                                                      | 91  |
| 79  | The kidneys; view of the ventral surface and the blood supply route of the adrenals . . . . .                                                                                                                                 | 92  |
| 80  | Acrylic cast of the renal pelvis and a dorsal aspect, midfrontal plane section of the right kidney . . . . .                                                                                                                  | 93  |
| 81  | Lymph nodes of the intestines and the branches of the portal vein . . . . .                                                                                                                                                   | 94  |
| 82  | The skeleton of the left thoracic limb; lateral surface . . . . .                                                                                                                                                             | 95  |
| 83  | Skeleton of the right thoracic limb; medial surface . . . . .                                                                                                                                                                 | 96  |
| 84  | Muscles of the left thoracic limb; lateral surface . . . . .                                                                                                                                                                  | 97  |
| 85  | Muscles of the right thoracic limb; medial surface, superficial layer . . . . .                                                                                                                                               | 98  |
| 86  | Muscles of the right thoracic limb; medial surface, deep layer . . . . .                                                                                                                                                      | 99  |
| 87  | Skelotopia of arteries of the right thoracic limb; medial surface . . . . .                                                                                                                                                   | 100 |
| 88  | Skeleton of the proximal end of the left thoracic limb; lateral surface . . . . .                                                                                                                                             | 101 |
| 89  | Skeleton of the proximal end of the right thoracic limb; medial surface . . . . .                                                                                                                                             | 102 |
| 90  | Muscles of the scapula, shoulder, and forearm of the right limb; medial surface, superficial layer . . . . .                                                                                                                  | 103 |
| 91  | Muscles of the shoulder, arm and forearm of the left limb from the lateral aspect; superficial layer . . . . .                                                                                                                | 104 |
| 92  | Muscles of the shoulder, arm and forearm of the left limb from the left side; deep layer . . . . .                                                                                                                            | 105 |
| 93  | Medial surface of the shoulder and arm of the right limb . . . . .                                                                                                                                                            | 106 |
| 94  | Humoral or shoulder joint; view of the medial (right limb) and lateral (left limb) surfaces . . . . .                                                                                                                         | 107 |
| 95  | Cubital or elbow joint; view of the lateral (left limb) and medial (right limb) surfaces . . . . .                                                                                                                            | 107 |
| 96  | Skeleton of the distal end of the left thoracic limb from the palmar surface . . . . .                                                                                                                                        | 108 |
| 97  | Skeleton of the distal end of the thoracic limb from the dorsal surface and bones; proximal row of carpus, view of the proximal and distal surfaces; distal row of carpus, view of the proximal and distal surfaces . . . . . | 109 |
| 98  | Muscles of the distal end of the left thoracic limb; palmar surface . . . . .                                                                                                                                                 | 110 |
| 99  | Muscles of the distal end of the left thoracic limb; view of the dorsal surface . . . . .                                                                                                                                     | 111 |
| 100 | Skelotopia of the arteries of the distal portion of the right thoracic limb; view of the palmar surface . . . . .                                                                                                             | 112 |
| 101 | Skelotopia of the arteries of the distal portion of the left thoracic limb; dorsal surface . . . . .                                                                                                                          | 113 |
| 102 | Lateral surface of the forearm and the distal portion of the left thoracic limb . . . . .                                                                                                                                     | 114 |
| 103 | The carpal joint; view of the lateral (left limb) and medial (right limb) surfaces . . . . .                                                                                                                                  | 115 |
| 104 | Skeleton of the pelvis; view of the left lateral and dorsal surfaces . . . . .                                                                                                                                                | 116 |
| 105 | Skeleton of the pelvis; view of the left lateral, right medial and ventral surfaces . . . . .                                                                                                                                 | 117 |
| 106 | Sacrum and the caudal (coccygeal) vertebrae; view of the left lateral surface . . . . .                                                                                                                                       | 118 |
| 107 | External male genital organs and the inguinal region; view of the left side . . . . .                                                                                                                                         | 119 |
| 108 | Pelvic organs of the female; view of the left side . . . . .                                                                                                                                                                  | 120 |
| 109 | Male genital organs; view of the floor of the pelvic cavity . . . . .                                                                                                                                                         | 121 |
| 110 | The prepuce and the pudenda . . . . .                                                                                                                                                                                         | 122 |
| 111 | Female genital organs <i>in situ</i> ; ventral view . . . . .                                                                                                                                                                 | 123 |
| 112 | Skelotopia of the pelvic arteries and the right thigh from the left side . . . . .                                                                                                                                            | 124 |
| 113 | Skeleton of the right pelvic limb; view of the medial surface . . . . .                                                                                                                                                       | 125 |
| 114 | Medial muscles of the thigh; superficial layer . . . . .                                                                                                                                                                      | 126 |
| 115 | Skeleton of the proximal end of the left pelvic limb; view of the lateral surface . . . . .                                                                                                                                   | 127 |
| 116 | Skeleton of the proximal end of the right pelvic limb; medial surface . . . . .                                                                                                                                               | 128 |
| 117 | Muscles of the lateral pelvic surface and the thigh of the left limb; superficial layer . . . . .                                                                                                                             | 129 |
| 118 | Lateral muscles of the pelvis, thigh and crus of the left limb; deeper layer . . . . .                                                                                                                                        | 130 |
| 119 | Lateral muscles of the pelvis, thigh and crus of the left limb; deep layer . . . . .                                                                                                                                          | 131 |
| 120 | Medial surface of the pelvis, and thigh of the right limb . . . . .                                                                                                                                                           | 132 |
| 121 | Lateral surface of the thigh of the left limb . . . . .                                                                                                                                                                       | 133 |
| 122 | Pelvic ligaments and the left hip joint . . . . .                                                                                                                                                                             | 134 |
| 123 | The joint of the patella; view of the lateral (left joint) and medial (right joint) surfaces and ligaments of the menisci . . . . .                                                                                           | 135 |
| 124 | Skeleton of the distal end of the left pelvic limb; view of the plantar surface . . . . .                                                                                                                                     | 136 |
| 125 | Skeleton of the distal end of the left pelvic limb; view of the dorsal surface . . . . .                                                                                                                                      | 137 |
| 126 | Urinary and genital organs of the male and the medial surface of the thigh . . . . .                                                                                                                                          | 138 |
| 127 | Mammary glands and the superficial veins of the body . . . . .                                                                                                                                                                | 139 |
| 128 | Right crus; view of the medial surface . . . . .                                                                                                                                                                              | 140 |
| 129 | Left crus; view of the lateral surface . . . . .                                                                                                                                                                              | 141 |
| 130 | Muscles and nerves of the left pelvic limb; view of the plantar surface . . . . .                                                                                                                                             | 142 |
| 131 | Muscles and nerves at the distal end of the left limb; view of the dorsal surface . . . . .                                                                                                                                   | 143 |
| 132 | Skelotopia of the arteries of the distal extremity of the left pelvic limbs; view of the dorsal surface . . . . .                                                                                                             | 144 |
| 133 | Skelotopia of the arteries of the distal extremity of the right pelvic limb; the right crus and pes from the medial side and the left pes showing the plantar surface . . . . .                                               | 145 |
| 134 | The tarsal joint; view of the lateral (left joint), medial (right joint) and plantar (left joint) surfaces . . . . .                                                                                                          | 146 |

| 135 | Skeleton . . . . .                                                                                                                              | 150 |
| 136 | The superficial muscles of the body without the cutaneous muscles . . . . .                                                                     | 151 |
| 137 | General view of the female viscera from the right side . . . . .                                                                                | 152 |
| 138 | General view of the male viscera from the left side . . . . .                                                                                   | 153 |
| 139 | Chondrocranium of a 27-day-old foetus; view of the dorsal surface . . . . .                                                                     | 154 |
| 140 | Skeleton of the head; view of the left side . . . . .                                                                                           | 155 |
| 141 | Skeleton of the head; view of the left side . . . . .                                                                                           | 156 |
| 142 | Skeleton of the head; view of the dorsal surface . . . . .                                                                                      | 157 |
| 143 | Skeleton of the head; view of the ventral surface (without mandible) . . . . .                                                                  | 158 |
| 144 | Skeleton of the head; view of the ventral surface . . . . .                                                                                     | 159 |
| 145 | Median section of the skeleton of the head, viewed from the left side . . . . .                                                                 | 160 |
| 146 | Median section of the skeleton of the head, viewed from the left side . . . . .                                                                 | 161 |
| 147 | Tympanic and petrous parts of the temporal bone; left view of the internal surface of the right and external left surface of the bone . . . . . | 162 |
| 148 | Tympanic cavity and the auditory ossicles . . . . .                                                                                             | 163 |
| 149 | Mandible viewed from the left lateral and right medial surfaces . . . . .                                                                       | 163 |
| 150 | Superficial muscles of the head . . . . .                                                                                                       | 164 |
| 151 | Muscles of the head; view of the lateral surface, deep layer . .                                                                                | 165 |
| 152 | Head and the adjacent part of the neck; view of the lateral surface . . . . .                                                                   | 166 |
| 153 | Head; deep layer . . . . .                                                                                                                      | 167 |
| 154 | Thymus of a young guinea pig; ventral surface . . . . .                                                                                         | 168 |
| 155 | Orbital organs from the left side . . . . .                                                                                                     | 168 |
| 156 | Skeletotopia of the arteries of the head . . . . .                                                                                              | 169 |
| 157 | Skeletotopia of the veins of the head . . . . .                                                                                                 | 170 |
| 158 | Intermandibular space and the adjacent part of the neck . . . . .                                                                               | 171 |
| 159 | The hyoid; view from the left side, from the front, the thyroid <i>in situ</i> , and the larynx from the left side . . . . .                    | 172 |
| 160 | Organs of the oral cavity; section of buccal structures . . . . .                                                                               | 173 |
| 161 | Internal base of the skull (floor of the skull cavity) viewed from above; crown of the head removed . . . . .                                   | 174 |
| 162 | The base of the brain with the origin of nerves and arteries . .                                                                                | 175 |
| 163 | Brain; view of the dorsal surface and the brain stem . . . . .                                                                                  | 176 |
| 164 | Sagittal section through the brain; view of the median surface .                                                                                | 177 |
| 165 | Cervical spine viewed from the left side, showing isolated vertebrae . . . . .                                                                  | 178 |
| 166 | Neck, chest and shoulders; view of the left side . . . . .                                                                                      | 179 |
| 167 | Neck and trunk; deep layer after removal of the thoracic limb .                                                                                 | 180 |
| 168 | Thorax; view of the ventral surface . . . . .                                                                                                   | 181 |
| 169 | Skeleton of thorax from the left side and the sternum, showing the ventral surface . . . . .                                                    | 182 |

|     |                                                                                                                                                                                                |     |
|-----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 170 | Lumbar spine and the third vertebra . . . . .                                                                                                                                                  | 183 |
| 171 | Viscera of the thoracic cavity from the right side . . . . .                                                                                                                                   | 184 |
| 172 | Viscera of the thoracic cavity from the left side. . . . .                                                                                                                                     | 185 |
| 173 | Skeletotopia of the vessels of the thoracic cavity<br>from the left side. . . . .                                                                                                              | 186 |
| 174 | Skeletotopia of the abdominal aorta and its branches;<br>view from the left . . . . .                                                                                                          | 187 |
| 175 | Skeletotopia of the major blood vessels<br>of the thoracic cavity; view of the right side . . . . .                                                                                            | 188 |
| 176 | Lungs; view of the left and right surfaces . . . . .                                                                                                                                           | 189 |
| 177 | The right and left lungs, showing the mediastinal surface . .                                                                                                                                  | 190 |
| 178 | The lungs and heart; diaphragmatic surface . . . . .                                                                                                                                           | 191 |
| 179 | Heart; view of the left and right surfaces . . . . .                                                                                                                                           | 192 |
| 180 | View into the right and left cavities of the heart . . . . .                                                                                                                                   | 193 |
| 181 | Lymph nodes on the dorsal part of the abdominal cavity . .                                                                                                                                     | 194 |
| 182 | Male abdominal organs, showing the ventral surface . . . .                                                                                                                                     | 195 |
| 183 | Organs in the abdominal cavity of a pregnant female,<br>showing the ventral surface . . . . .                                                                                                  | 196 |
| 184 | Abdominal viscera after removal of the alimentary tract . .                                                                                                                                    | 197 |
| 185 | Diaphragm; view of the caudal surface . . . . .                                                                                                                                                | 198 |
| 186 | Syntopy of organs at the diaphragm; caudal surface . . . .                                                                                                                                     | 199 |
| 187 | Stomach; view of the visceral surface and a transverse section.                                                                                                                                | 200 |
| 188 | Liver; view of the visceral and diaphragmatic surfaces . .                                                                                                                                     | 201 |
| 189 | The kidneys and adrenals with vessels,<br>showing the ventral surface . . . . .                                                                                                                | 202 |
| 190 | Diagram of the extended bowels; view from the right side .                                                                                                                                     | 203 |
| 191 | Skeleton of the right thoracic limb,<br>showing the medial surface . . . . .                                                                                                                   | 204 |
| 192 | Muscles of the right thoracic limb,<br>showing the medial surface . . . . .                                                                                                                    | 205 |
| 193 | Skeleton of the proximal end of the right thoracic limb. . .                                                                                                                                   | 206 |
| 194 | Skeleton of the proximal end of the left thoracic limb . .                                                                                                                                     | 207 |
| 195 | Medial surface of the right shoulder and arm . . . . .                                                                                                                                         | 208 |
| 196 | Skeletotopia of the arteries of the proximal part<br>of the thoracic limb . . . . .                                                                                                            | 209 |
| 197 | Left forearm; view of the lateral surface . . . . .                                                                                                                                            | 210 |
| 198 | Right forearm; view of the medial surface . . . . .                                                                                                                                            | 211 |
| 199 | Skeleton of the distal end of the left thoracic limb . . . .                                                                                                                                   | 212 |
| 200 | Skeleton of the distal end of the right thoracic limb . . .                                                                                                                                    | 213 |
| 201 | Muscles, veins and nerves on the dorsal surface<br>of the distal end of the left thoracic limb . . . . .                                                                                       | 214 |
| 202 | Muscles, veins and nerves on the palmar surface<br>of the distal end of the right thoracic limb; superficial layer .                                                                           | 215 |
| 203 | Muscles and nerves on the palmar surface<br>of the distal end of the right thoracic limb; deep layer . .                                                                                       | 216 |
| 204 | Skeletotopia of the arteries of the distal end of the left thoracic<br>limb; view of the dorsal surface . . . . .                                                                              | 217 |
| 205 | Skeletotopia of the arteries of the distal end<br>of the right thoracic limb; view of the palmar surface . .                                                                                   | 218 |
| 206 | Skeleton of the pelvis;<br>view of the dorsal and ventral surfaces . . . . .                                                                                                                   | 219 |
| 207 | Skeleton of the pelvis with the sacral bone;<br>view of the left surface, the sacral bone,<br>and the ventral and dorsal surfaces . . . . .                                                    | 220 |
| 208 | Male sex organs <i>in situ</i> ; view of the ventral surface . .                                                                                                                               | 221 |
| 209 | Male sex organs <i>in toto</i> ; view of the ventral surface . .                                                                                                                               | 222 |
| 210 | Female sex organs <i>in toto</i> ; view of the dorsal surface . .                                                                                                                              | 223 |
| 211 | Skeleton of the right pelvic limb; view of the medial surface. .                                                                                                                               | 224 |
| 212 | Muscles of the right pelvic limb; view of the medial surface .                                                                                                                                 | 225 |
| 213 | Skeleton of the pelvis and the proximal end<br>of the left pelvic limb; view of the lateral surface<br>and of the left femur bone, showing the cranial surface. .                              | 226 |
| 214 | Skeleton of the right half of the pelvis with the sacrum halved<br>and the proximal part of the right pelvic limb, view of the<br>medial surface; and the femur, showing the caudal surface. . | 227 |
| 215 | Pelvis and the thigh of the right limb;<br>view of the medial surface. . . . .                                                                                                                 | 228 |
| 216 | Skeletotopia of the pelvic arteries<br>and the thigh of the right limb; view of the medial surface .                                                                                           | 229 |
| 217 | Pelvis and thigh of the left limb; view of the lateral surface .                                                                                                                               | 230 |
| 218 | The left crus; view of the lateral surface . . . . .                                                                                                                                           | 231 |
| 219 | The right crus; view of the medial surface . . . . .                                                                                                                                           | 232 |
| 220 | Skeleton of the distal end of the left pelvic limb,<br>view of the dorsal surface; and the talus,<br>view of the dorsal and lateral surfaces . . . . .                                         | 233 |
| 221 | Skeleton of the distal end of the right pelvic limb,<br>showing the plantar surface; and the calcaneus,<br>showing the medial surface . . . . .                                                | 234 |
| 222 | Muscles, veins and nerves of the distal end<br>of the left pelvic limb, showing the dorsal surface . . . . .                                                                                   | 235 |
| 223 | Muscles, veins and nerves of the distal end<br>of the right pelvic limb, showing the palmar surface;<br>superficial layer . . . . .                                                            | 236 |
| 224 | Muscles of the distal end of the right pelvic limb,<br>showing the plantar surface; medial layer . . . . .                                                                                     | 237 |
| 225 | Muscles of the distal end of the right pelvic limb,<br>showing the plantar surface; deep layer . . . . .                                                                                       | 238 |
| 226 | Skeletotopia of the arteries of the distal end<br>of the left pelvic limb, showing the dorsal surface . . . .                                                                                  | 239 |
| 227 | Skeletotopia of the arteries of the distal end<br>of the right pelvic limb, showing the plantar surface . .                                                                                    | 240 |
