

# Contents

Acknowledgments	xi
Introduction	xiii
<b>Part I The Deep History of Our Species</b>	
1 How the Genome Explains Who We Are	3
2 Encounters with Neanderthals	25
3 Ancient DNA Opens the Floodgates	53
<b>Part II How We Got to Where We Are Today</b>	
4 Humanity's Ghosts	77
5 The Making of Modern Europe	99
6 The Collision That Formed India	123
7 In Search of Native American Ancestors	155
8 The Genomic Origins of East Asians	187
9 Rejoining Africa to the Human Story	207
<b>Part III The Disruptive Genome</b>	
10 The Genomics of Inequality	229
11 The Genomics of Race and Identity	247
12 The Future of Ancient DNA	274
Notes on the Illustrations	287
Notes	291
Index	321
