Foreword	11
1 Background	13
1.1 The context of landscape considerations in spatial planning processes	15
1.2 Participatory planning as a background philosophy towards sustainable spatial development	25
2 Instruments and tools for sustainable land use and spatial development processes	33
2.1 Landscape-Ecological Planning (LANDEP)	35
2.1.1 Background for Landscape-Ecological Planning	35
2.1.2 LANDEP as the recognised landscape planning methodology	36
2.1.3 The frame of the methodical procedure of the LANDEP	38
2.1.4 LANDEP methodology	39
2.1.5 Implementation of landscape-ecological regulations into territorial-planning documentations in Slovakia	45
2.2 Territorial System of Ecological Stability (TSES) and spatial planning practice	47
2.2.1 Ecological stability of the ecosystem and spatial ecological stability of the landscape	47
2.2.2 Spatial configuration and composition of the landscape	47
2.2.3 Ecological networks and the Territorial System of Ecological Stability (TSES)	49
2.2.4 Principles of the methodology of Territorial System of Ecological Stability	51
2.2.5 The methodology of the Territorial System of Ecological Stability (TSES)	53

2.2.6 Territorial System of Ecological Stability (TSES) and Landscape-Ecological Planning (LANDEP) within the territorial planning framework in Slovakia	62
2.3. Strategic Environmental Assessment (SEA) and spatial planning processes	64
2.3.1 Strategic Environmental Assessment and spatial planning – rational and potential benefits	64
2.3.2 Evolution of SEA concepts, systems and approaches in spatial planning	72
2.3.3 Best practice and experience, future directions	76
2.3.4 Landscape planning and Strategic Environmental Assessment – linkages and mutual benefits	78
3 Practical application – case studies	89
3.1 SEA of Bratislava Master Plan	91
3.1.1 Introduction	91
3.1.2 Procedural and methodological aspect	92
3.1.3 Final remarks	95
3.2 Example of ecological carrying capacity assessment for landscape in Environmental Impact Assessment	97
3.2.1 Introduction	97
3.2.2 Starting points and terms of reference of ecological carrying capacity assessment	97
3.2.3 Example of determining ecological carrying capacity in the process of Environmental Impact Assessment	99
3.2.4 Conclusion	121
3.3 Agriculture and rural development plan of the Slovak Republic over the 2000-2006 period	122
3.3.1 Background and purpose of the environmental appraisal	122
3.3.2 Scope of the prior appraisal and its implementation	123
3.3.3 Methodology	123
3.3.4 Analysis of the current situation	124
3.3.5 Analysis of previous operations	131
3.3.6 Assessment of the relevance and consistency of the proposed strategy	132
3.3.7 Assessment of the expected impacts of the selected priorities	135
3.3.8 Verification of the proposed implementing arrangements	136
3.3.9 Conclusions and recommendations	137
3.4 Evaluation of landscape ecological stability in TSES Kocurany	139
3.4.1 Ecological stability of the system and spatial ecological stability of the landscape	139
Annexes	149
