In Memoriam:

Kenneth Joseph Arrow (1921–2017) xi

Foreword, by Robert M. Solow xix

Preface xxvii

Random Thoughts on “Birth and Death,”

by Kenneth J. Arrow xli

BIRTH AND DEATH:

Arrow Lecture 1

1. Economic Demography 2

2. Utilitarian Ethics 7

3. Ends and Means 9

Capital Goods 10

Inclusive Wealth and Social Well-Being 14

Placing a Value on Opportunity Sets 21

4. Synopsis 25

The Genesis Problem and Actual Problems 25

The Biosphere as a Commodity 30

Common-Property Resources and Fertility Intentions 31

Our Impact on the Biosphere 32

Part I Foundations

5. Genesis Under Total Utilitarianism 36
 Production and Consumption Possibilities 36
 Social Well-Being and the Sidgwick-Meade Rule 39
 Measurability, Comparability, and the Aggregation of Personal Well-Beings 41
 Zero Well-Being 43
 Optimum Population Size 45
 Critical-Level Utilitarianism 53
 Socially Embedded Well-Being 54
 Non-Archimedean Intuitions and Non-Additive Social Well-Being Functions 57
6. Death 61
7. A Problem Like Sleeping Beauty 65
 Imperatives 66
 Wider Cases 68
8. Generation-Centered Prerogatives in the Timeless World 69
 The Two-Stage Decision 70
 Reproductive Replacement 72
 Coherence 74
9. Generations Across the Indefinite Future 77
 Discounting Future Generations 79
 Dynastic Well-Being 86
 Overlapping Generations 88
 Generation-Relative Utilitarianism 91
 Intergenerational Consistency 92
 The Stationary Optimum 93
 Extreme Theories 95

Part II Applications

10. The Biosphere as a Renewable Natural Resource 95
 Open-Access Resources 96
 Ecosystem Services 97

<i>Erosion of Natural Capital</i>	100
<i>Global Ecological Footprint</i>	104

11. Estimates of Globally Optimum Population 106

Earth's Human Carrying Capacity 107

Parameter Values 109

Sensitivity Analysis 110

12. Technology and Institutions 112

13. Existential Risks and Informed Ends 116

APPENDIX ONE 121

Socially-Embedded Well-Being Functions 121

APPENDIX TWO 123

Common Property Resources and Reproductive Choices 123

Decentralizing Population Optima 124

Open-Access Resources and Population Overshoot 125

APPENDIX THREE 127

Notes on Rawls' Principle of Just Saving 127

Parental Motivations 128

Inclusive Wealth as Rawlsian Primary Goods 133

Wealth and Materialism 135

APPENDIX FOUR 139

Modeling the Biosphere 139

Pure Resources 139

Prototype Capital Model 143

Population Size as Choice 144

Birth Rate as Choice 147

Qualifications and Extensions 148

APPENDIX FIVE 151

Inclusive Wealth and Social Well-Being 151

Two Types of Change 155

Policy Analysis 157

Sustainability Analysis 158

Inclusive Wealth and Substitutability of Capital Goods	159
GDP and the Short Run	160

APPENDIX SIX 163

Valuing Freedom of Choice	163
