About the authors	xv
Acknowledgments	xvii
Preface	xix
Chapter 1 – Developmental psychology: themes and research	1
Introduction	1
Studying development	2
Themes in developmental psychology	5
Heredity and environment	5
Physical growth and motor development	6
Cognitive development	6
Conceptions of intelligence and creativity	8
Cognition and information processing	9
Personal and social development	9
Moral development	10
Psychology and the scientific method	11
Basic and applied research	13
Research methods	13
Experimental research	14
Quasi-experimental research	14
Correlational research	15
Qualitative research	16
Integrative reviews and meta-analyses	17
General principles of good research	18
Validity in measurement	18
Reliability in measurement	20

Ethics and research	20
Internet resources	21
Chapter 2 – Heredity and environment and special learning needs	23
Introduction	23
Basis of heredity – a simplified overview	23
Dominant and recessive genes	24
Personality characteristics and genes	27
Sex related characteristics	28
Polygenetic determination	29
Diagnostic tests of the foetus	31
Interactions between heredity and environment	32
Genetic engineering	34
Family studies	34
Twin studies	35
The environment	35
Prenatal Influences	36
The impact of the environment on early development	36
Teratogens	37
Maternal diseases and disorders	37
Drugs	38
Maternal diet	39
Parental age	39
Birth factors and development	40
Deprived postnatal environments	40
Developmental problems in childhood and educational implications	42
Attention deficit hyperactivity disorder (ADHD)	42
Intellectual disability	44
Autism	44
Cerebral palsy	45
Visual impairment and hearing impairment	45
Other disabilities	46

Streaming and ability grouping	47
Inclusion and teaching	47
The importance of early intervention	48
Chapter 3 – Physical and motor development: infancy to late childhood	51
Introduction	51
Principles of development	52
Orderly and sequential development	52
Developmental milestones	53
Cephalocaudal and proximodistal growth	53
Overview of developmental stages	58
Prenatal development and the newborn	59
Infancy	60
Early childhood	61
Is there a 'critical period' for brain development?	62
Middle and late childhood to puberty	64
Principles of motor development	66
Maturation	67
Motivation	68
Experience	69
Practice	69
Individual differences in motor development	69
Motor development norms	70
Sex differences in motor development	70
Chapter 4 – Physical and motor development: puberty to adulthood and developmental health	73
Introduction	73
Puberty and adolescence	73
Growth spurts and interpersonal comparisons	74
Differences in physical growth, muscle growth, and motor development.	74
Implications for education	75
Multicultural issues	75

Developmental trajectories: early and late maturation	76
Early maturing males	77
Early maturing females	77
Adolescents and body image	81
Eating disorders	82
Bulimia nervosa and anorexia nervosa	83
Body shape and personality	83
Educational implications of body shape	85
Health issues and the school environment	86
Potential health problems	86
Hearing and sight	87
Dietary deficiencies – undernourishment and obesity	87
Other issues	89
Physical safety and legal requirements	90
Chapter 5 – Cognition and cognitive development: infancy to late childhood	91
Introduction	91
Continuity and change in cognitive development	91
Jean Piaget	92
Biological model of cognitive development	92
Balance between assimilation and accommodation	93
Operative knowledge	94
Stages of intellectual development	95
Sensorimotor stage	95
Preoperational stage	97
Development of perception, language, reasoning, and problem solving skills	98
Size and shape constancy	99
Classifying objects into sets	100
Perception and judgements of quantity	100
Number concepts and time concepts	101
Concepts of time: past, present, and future	103

Concrete operations stage	104
Seriation and classification	105
Implications of Piaget for education	108
Developmentally appropriate education	108
Social interaction and cognitive development	108
Spiral curriculum and curriculum integration	109
Lev Vygotsky	109
Sociocultural dimensions of learning	109
The importance of cultural context	110
Holistic education	111
Mediating learning	112
Classroom applications of Vygotskian theory	113
Jerome Bruner	113
Concept development	113
The course of cognitive growth	114
Ways of thinking	115
Discovery learning	116
Language development	117
Features of language	118
Theories of language development	118
Interactionist perspective	120
Stages of language acquisition	120
The school connection	121
Chapter 6 – Cognitive development: adolescence to adulthood	123
Introduction	123
Piaget and adolescent cognition	123
Formal-operations stage	123
Combinatorial logic	124
Propositional thinking	124
Proportional reasoning	124
Hypothetical reasoning	126

Using formal thinking processes	126
Cross-cultural implications	128
Current status of Piaget's theory	128
Further thoughts on Vygotsky	131
Culture and the zone of proximal development	131
Metacognition	135
What is metacognition?	135
Does metacognitive training improve student learning?	135
Cognitive and situated learning	137
Distributed cognition	138
Chapter 7 – Conceptions of intelligence and creativity in childhood and adolescence	141
Introduction	141
Psychometrics and intelligence	141
One and two factor theories of intelligence	142
Primary mental abilities	143
Guilford's structure of the intellect	143
Gardner's 'Frames of Mind'	145
Multiple intelligences	145
Educational implications of multiple intelligences	146
Psychometric approaches to cognitive measurement	147
Intelligence testing	147
Key principles of the Binet-Simon test	148
Wechsler tests	148
Sternberg's triarchic theory of intelligence	149
Group tests of intelligence	150
What do intelligence tests measure?	151
Non-verbal intelligence tests	152
Variables that may influence IQ	152
Is Intelligence increasing?	155
Creativity	156
The nature of creativity	157

Personality characteristics	157
Creativity as a way of thinking	158
Creativity as a product	160
The assessment of creativity	161
The validity of creativity tests	162
Relationship of creativity to intelligence	163
Chapter 8 – Cognition and information processing in childhood and adolescence	165
Introduction	165
Information processing	166
Cybernetics and information processing	167
Information processing theory and computer models	167
The components of the human information processing system	168
Sensory receptors, working memory, and long-term memory	168
Remembering and forgetting	172
Meaningfulness and encoding	172
Strategies to help learning	173
Learning non-meaningful material	175
Number of units of information that can be processed	176
Mental imagery	176
Mnemonic images	176
Why do mnemonics work?	177
Classifying to help learning	178
Concept mapping	178
Networking	179
Remembering and Forgetting	181
Factors affecting remembering	182
Whole and part learning	182
Repetition and drill	183
Overlearning and automaticity	183
Distributed practice	184
Serial position effect	184

Why do we forget?	185
Interference effects	186
How do experts differ from novices in information processing?	187
Using the information processing approach in the classroom	189
Chapter 9 – Personal and social development in childhood	191
Introduction	191
Sigmund Freud	191
Stages of psychosexual development	193
Anxiety and personal development	194
Current status of Freud's theory	197
Classroom implications of Freud's theory	198
Erik Erikson	199
Erikson's stages of personal development	199
Trust and mistrust	200
Autonomy and shame	200
Initiative and guilt	200
Industry and inferiority	202
Parental and grandparental involvement in school	203
Humanism and personal development	205
Carl Rogers	206
Abraham Maslow	207
Maslow's hierarchy of needs	207
Classroom implications of humanistic perspectives	211
Realness, acceptance, and empathy	211
Open education	211
Social and emotional development in childhood	215
Attachment	215
Social and emotional development	217
The peer group	217
Sociometry	218

Chapter 10 – Personal and social development in adolescence	223
Introduction	223
Social and emotional development, social identity, and adolescence	223
Family relationships, social development, and relationship to academic adjustment	224
Parenting styles	224
Connectedness to parents	225
Autonomy and independence	225
Erikson: identity formation	226
Erikson: young adulthood and beyond	227
Classroom applications of Erikson's theory	228
Importance of teachers and peers	228
Identity crisis	228
James Marcia	229
Parental involvement and identity formation	232
Conflict with parents	233
The importance of the peer group to adolescents	235
Positive and negative peer effects	237
Friendships	237
Adolescent grouping	238
Adolescent sexuality	239
Social development and alienation	240
Social skills, antisocial behaviour, and academic achievement	241
Adolescent suicide	241
Ethnic differences	242
Risk factors in adolescent suicide	242
Preventing mental health problems	243
Self-concept, self-esteem, and effective learning	245
How is self-concept formed?	245
Developmental changes in self-concept	246
Big-fish–little-pond effect	247

Self-regulation and adolescence	248
Self-efficacy and adolescence	249
High school environments and the development of adolescents	251
Mismatch between school and adolescent needs	252
Chapter 11 – Moral development in childhood and adolescence	253
Introduction	253
Moral development	254
Jean Piaget's stage theory of moral development	255
Critique of Piaget's theory	257
Lawrence Kohlberg's stage theory of moral development	258
Kohlberg's methodology	258
Kohlberg's stages of moral development	262
Current status of Kohlberg's theory	265
Elliot Turiel's domain theory of moral development	267
Moral actions and conventional actions	268
Moral reasoning and moral action	269
Carol Gilligan and gender differences in moral development	269
Morality of care	270
Neo-Kohlbergian approaches to moral development	272
Defining Issues Test (DIT)	272
Moral schemas in the DIT	272
Classroom applications of moral development theory	274
Approaches to teaching moral values	274
Four-component framework of moral education	275
Nel Noddings and caring schools	275
Glossary	277
References	289
Index	325
