List of abbreviations

1. Introduction	5
2. Definition of dyslexia	5
3. Characteristics and manifestations of dyslexia	6
4. History of dyslexia	8
4.1. Beginning of the study of developmental dyslexia (1895 - 1950)	9
4.2. Evolution stage of study of developmental dyslexia (1950-1970)	10
4.3. Modern theories (1970 – up today)	11
5. Epidemiology of dyslexia	12
5.1. Geographical (language) differences	12
5.2. Gender differences	15
6. Subgroups of dyslexia	15
7. Etiology of dyslexia	17
7.1. Genetic theory	18
7.2. Prenatal and perinatal brain damage	19
7.3. Environmental factors	20
7.4. Neurobiology of normal reading	21
7.5. Neurobiological deficits in dyslexia	24
7.6. Theories of dyslexia origin	26
7.6.1. Phonological hypothesis	27
7.6.2. Automaticity/cerebellar hypothesis	29
7.6.3. Temporal (rate) processing hypothesis	29
8. Visual disorders in etiology of dyslexia	30
8.1. Paralel pathways of the visual system	31
8.2. Visual magnocellular deficit theory in dyslexia	35
8.2.1. Visual motion processing in dyslexia tested by psychophysical studies	36
8.2.2. Eye movement abnormalities in dyslexia	39
8.2.3. Visual motion processing in dyslexia tested with fMRI	39
8.2.4. Scotopic sensitivity syndrom (Irlen syndrome)	40
9. Testing of the visual deficit in dyslexia with visual evoked potentials (VEPs)	42
9.1. Methods of "motion-onset VEPs" testing of the magnocellular pathway	43
9.1.1. VEPs related to visual perception of motion	43
9.1.2. Characteristics of motion-onset VEPs related to motion stimuli parameters	44
9.1.3. Recommended stimulus parameters for the motion-onset VEPs	48
9.1.4. Recording conditions	53
9.1.5. Topographic variability of motion-onset VEPs recordings	54
9.1.6. Age related changes of the motion-onset VEPs	55
9.2. Motion-onset VEPs in dyslexia	58
9.2.1. Magnocellular theory verification	59
9.2.2. Delayed maturation of the magnocellular system in dyslexics	61
9.2.3. VEPs testing of color background effect	63
9.2.4. Proportion of delayed motion-onset VEPs in dyslexics	65
9.3. Cognitive visual evoked potentials (ERP) in dyslexics	67
10. Conclusions	69
11. References	71
