Preface	v
I Programming	1
1 Setting up	3
1.1 Installing R	3
1.2 Starting R	3
1.3 Working directory	4
1.4 Writing scripts	5
1.5 Help	5
1.6 Supporting material	5
2 R as a calculating environment	11
2.1 Arithmetic	11
2.2 Variables	12
2.3 Functions	13
2.4 Vectors	15
2.5 Missing data	18
2.6 Expressions and assignments	19
2.7 Logical expressions	20
2.8 Matrices	23
2.9 The workspace	25
2.10 Exercises	25

3 Basic programming	29
3.1 Introduction	29
3.2 Branching with <code>if</code>	31
3.3 Looping with <code>for</code>	33
3.4 Looping with <code>while</code>	36
3.5 Vector-based programming	38
3.6 Program flow	39
3.7 Basic debugging	41
3.8 Good programming habits	42
3.9 Exercises	43
4 I/O: Input and Output	49
4.1 Text	49
4.2 Input from a file	51
4.3 Input from the keyboard	53
4.4 Output to a file	55
4.5 Plotting	56
4.6 Exercises	58
5 Programming with functions	63
5.1 Functions	63
5.2 Scope and its consequences	68
5.3 Optional arguments and default values	70
5.4 Vector-based programming using functions	70
5.5 Recursive programming	74
5.6 Debugging functions	76
5.7 Exercises	78
6 Sophisticated data structures	85
6.1 Factors	85
6.2 Dataframes	88
6.3 Lists	94
6.4 The <code>apply</code> family	98
6.5 Exercises	105

CONTENTS

xv

7 Better graphics	109
7.1 Introduction	109
7.2 Graphics parameters: <code>par</code>	111
7.3 Graphical augmentation	113
7.4 Mathematical typesetting	114
7.5 Permanence	118
7.6 Grouped graphs: <code>lattice</code>	119
7.7 3D-plots	123
7.8 Exercises	124
8 Pointers to further programming techniques	127
8.1 Packages	127
8.2 Frames and environments	132
8.3 Debugging again	134
8.4 Object-oriented programming: S3	137
8.5 Object-oriented programming: S4	141
8.6 Compiled code	144
8.7 Further reading	146
8.8 Exercises	146
II Numerical techniques	149
9 Numerical accuracy and program efficiency	151
9.1 Machine representation of numbers	151
9.2 Significant digits	154
9.3 Time	156
9.4 Loops versus vectors	158
9.5 Memory	160
9.6 Caveat	161
9.7 Exercises	162
