

TABLE OF CONTENTS:

LIST OF NON-STANDARD ABBREVIATIONS USED	7
1. INTRODUCTION	8
1.1. A BRIEF HISTORY OF ROBOTS AND ROBOTICS.....	8
1.2. SCOPE OF THE PROBLEM STUDIED	11
2. INDUSTRIAL ROBOT ACTUATION SYSTEM	13
2.1. KINEMATIC PAIRS IN THE CONSTRUCTION OF INDUSTRIAL ROBOTS	13
2.2. IRaM KINEMATIC CHAIN.....	14
2.2.1. Classification of IRaM actuation system mechanisms	14
2.2.2. Locomotion mechanism – stationary and non-stationary robots	16
2.2.3. Positioning mechanism.....	17
2.2.4. Orientation mechanism	18
2.2.5. End effectors	19
2.3. BASIC KINEMATIC CHAIN OF IR&M – RECAPITULATION.....	20
3. THE THEORY OF THE STRUCTURES OF THE BASIC KINEMATIC CHAIN OF INDUSTRIAL ROBOTS	21
3.1. SELECTED SIGNIFICANT QUOTATIONS FROM LITERARY SOURCES IN THE FIELD OF THE THEORY OF THE BASIC KINEMATIC CHAINS OF INDUSTRIAL ROBOTS.....	21
3.2. BASIC AND DERIVED COMBINATIONS OF KINEMATIC PAIRS IN THE POSITIONING ASSEMBLY OF INDUSTRIAL ROBOTS	23
4. COMBINATORIAL ALGORITHMS FOR KINEMATIC PAIR ARRANGEMENTS AND THEIR ASSESSMENT	26
4.1. THE ARRANGEMENT OF KINEMATIC PAIRS IN COMBINATIONS	26
4.2. GENERAL DETERMINATION OF THE NUMBER OF THE POSSIBLE ARRANGEMENTS OF KP	27
4.3. THE THEORETICAL NUMBER OF POSSIBLE ARRANGEMENTS	27
4.3.1. The theoretical number of all the possible arrangements of KP in the basic kinematic chain with one DOF	27
4.3.2. The theoretical number of all the possible arrangements of KP in the basic kinematic chain with one DOF	28
4.3.3. The theoretical number of all the possible arrangements of KP in the basic kinematic chain with one DOF	29
4.4. THE PRINCIPLE OF ASSESSMENT AND REPRESENTATION OF THE KP ARRANGEMENTS RECOMMENDED FOR CONSTRUCTION	30
5. ACTUAL ASSESSMENT OF THE COMBINATORIAL ALGORITHMS FOR THE DIFFERENT KINEMATIC PAIR ARRANGEMENTS OF THE BASIC KINEMATIC CHAINS FOR N = 1, 2 AND 3	32
5.1. ACTUAL ASSESSMENT OF THE COMBINATORIAL ALGORITHMS FOR KP COMBINATIONS WITH ONE DOF.....	32
5.2. ACTUAL ASSESSMENT OF THE COMBINATORIAL ALGORITHMS FOR KP COMBINATIONS WITH TWO DOF	33
5.2.1. Assessment of the arrangements in the TT combinations of kinematic pairs	33
5.2.2. Assessment of the arrangements in the RT combinations of kinematic pairs.....	34
5.2.3. Assessment of the arrangements in the TR combinations of kinematic pairs.....	35
5.2.4. Assessment of the arrangements in the RR combinations of kinematic pairs	36
5.2.5. Comprehensive assessment of all KP arrangements with two DOF	37

5.3. ACTUAL ASSESSMENT OF THE COMBINATORIAL ALGORITHMS FOR KP COMBINATIONS WITH THREE DOF	37
5.3.1. Assessment of the combinatorial algorithm for KP arrangements in the TTT combination	37
5.3.2. Assessment of the combinatorial algorithm for KP arrangements in the RTT combination	39
5.3.3. Assessment of the combinatorial algorithm for KP arrangements in the TRT combination	41
5.3.4. Assessment of the combinatorial algorithm for KP arrangements in the TTR combination	43
5.3.5. Assessment of the combinatorial algorithm for KP arrangements in the RRT combination	44
5.3.6. Assessment of the combinatorial algorithm for KP arrangements in the RTR combination	46
5.3.7. Assessment of the combinatorial algorithm for KP arrangements in the TTT combination	48
5.3.8. Assessment of the combinatorial algorithm for KP arrangements in the RRR combination	49
6. SUMMARY OF THE RESULTS AND AN OUTLINE OF THE DIRECTIONS OF FUTURE RESEARCH AND DEVELOPMENT	51
6.1. A COMPREHENSIVE ASSESSMENT OF ALL THE ARRANGEMENTS FOR THE CONSTRUCTION OF THE BASIC KINEMATIC CHAIN OF IR&M WITH THREE DOF (N=3)	51
6.2. OTHER CONSTRUCTIONAL FACTORS INFLUENCING THE MORPHOLOGY OF THE BASIC KINEMATIC CHAIN (BKC).....	52
6.2.1. Analysis of the particulars of the possible design of translational kinematic pairs.....	52
6.2.2. Unconventional and innovative features in the construction of IR&M.....	53
6.2.3. Industrial robots with parallel kinematics	54
7. PRACTICAL APPLICATIONS	57
7.1. OVERVIEW OF PRACTICAL IMPLEMENTATION OF THE THEORETICALLY ASSESSED ARRANGEMENTS	57
7.2. EXAMPLES OF AVAILABLE INDUSTRIAL ROBOTS	58
7.2.1. Examples of available solutions of industrial robots in the TTT combination of kinematic pairs (KP) (Cartesian, rectangular robots).....	58
7.2.2. Examples of applicable solutions of industrial robots in the RTT combination of kinematic pairs (cylindrical robots).....	59
7.2.3. Examples of applicable solutions of industrial robots in the TRT combination of kinematic pairs (spherical robots)	60
7.2.4. Examples of applicable solutions of industrial robots in the RRT combination of kinematic pairs (spherical robots)	60
7.2.5. Examples of applicable solutions of industrial robots in the TRR combination of kinematic pairs (spherical robots)	62
7.2.6. Examples of applicable solutions of industrial robots in the RRR combination of kinematic pairs (anthropomorphous robots).....	63
8. CONCLUSION	65
9. REFERENCES	66
ACKNOWLEDGEMENTS	71
